## ideas that promise, ideas that deliver, ideas that make a difference.

### Inverter Technology

Panasonic **Inverter Technology** perfects the art of cooking with microwave ovens, delivering delicious flavor, excellent color, superb shape and texture in the foods you cook. The consistent delivery of microwave energy means delicate foods can simmer without the edges and surfaces overcooking. Foods have the look and taste of conventional-oven cooking – without the wait!

### One-Touch Genius Sensor Cook and Reheat

The Genius Sensor adjusts power levels and calculates cooking and reheating times automatically for various food types.

### Inverter Turbo Defrost™

Panasonic has succeeded in evolving the Turbo Defrost™, which allows you to defrost foods even faster than previous Panasonic Auto Defrost. Panasonic Inverter Turbo Defrost technology is an advanced microwave sequencing system using the inverter low-power delivery feature.

### Control Panel with Push-Button Door Release

The easy-to-use standard flat panel keypad makes it possible to operate the microwave oven easily.

The easy-to-use door for easy access to cavity.

### Keep Warm Feature

A pulsing delivery of very low microwave power keeps food temperatures at a constant level – without overcooking. So, foods like stew, gravy and desserts remain warm in the oven until ready to serve.
