

DISHDRAWER® BENEFITS

Independent operation

Fisher & Paykel's dishwasher is two totally separate, independently operated wash units. The DishDrawer® delivers two dishwashers in one.

DishDrawer® allows you to wash delicate crystal and heavily soiled baking dishes all at the same time, washing the delicate glassware in one drawer on the delicate cycle, with pots and pans in the other drawer on a heavy duty cycle. Fisher & Paykel's DishDrawer® lets you match the wash program to the type of load, there is no compromise. Dishes are better cared for.

Environmentally Outstanding

DishDrawer® is kind on the environment, minimizing water, energy and detergent used, so it costs less to run. It introduces the economical, guilt free small load, by using as little as 1.98 gallons of water (2.4 gallons on average for the Normal cycles). A single unit or half a load, means you save half the energy, water and detergent of a conventional dishwasher. Breakfast or lunch dishes can be taken care of immediately.

Superior Ergonomics

DishDrawer® is ergonomically superior, incorporating the familiar kitchen sliding drawer concept into dishwashing, giving the user easier access, improved visibility and less movements to open, load and close. Now you can open and close the dishwasher just like every other kitchen drawer.

Excellent wash performance

When you change the wash cycle on the DishDrawer® you not only change the time and the temperature, you change the amount of water pressure used. So, your delicate dishes are treated delicately and a more strenuous water pressure is used for your heavy dishes.

With many conventional dishwashers, when you change a wash cycle, all you are really changing is the length of the wash cycle and, in some dishwashers, the water temperature.

Fisher & Paykel have designed a flow through detergent dispenser. So, with the DishDrawer®, the detergent is not just "spilled" into the drawer at a designated time during the cycle as it is with all other dishwashers. DishDrawer® premixes the detergent with water to activate the enzymes of the detergent so that they can go to work on your dirty dishes. This also serves to "soften" the detergent and decrease the chance of detergent burn on your dishes.

Flexibility

No two households are the same, as family units grow, Fisher & Paykel now gives you the opportunity to develop with these changes.

Start small...

DishDrawer® is also available as a single unit and can be installed independently to accommodate small households, limited spaces and unique requirements. Even a single DishDrawer® comfortably fits 6 dinner plates, 6 dessert plates, 6 bowls, 6 saucers, 6 sets of cutlery and 6 cups. So when space is at a premium or the household is small, you can still enjoy all the convenience, economy and efficiency of a single DishDrawer® - in half the space of a conventional dishwasher.

...Then get bigger

As your family grows and your lifestyle changes, your DishDrawer® can grow with you. Accommodate extra entertaining and the demands of a bigger household by adding a single DishDrawer® - when and where you need it the most.

So whether your demands are large or small, whether your household is growing or contracting, the single DishDrawer® gives you freedom to design and use your kitchen without compromise. Think outside the box - we did when we developed DishDrawer® - Don't unload the dishes at all - Think of DishDrawer® as a storage unit that washes dishes. Install a single DishDrawer® in the bar area or in the kitchen island for easy clean-up of preparation dishes. Many people have installed the single DishDrawer® in boats, planes and RV's.

The Hidden DishDrawer®

Fully Integrated

An integrated finish enables you to conceal the DishDrawer® in the same cabinetry as the rest of your kitchen. So outwardly, your DishDrawer® appears to be nothing more than another set of kitchen drawers - with the only hint of its presence being a stylish control badge.

Choose your own finish

Units frontages can be finished in almost any material you choose - wood, laminates or paneling. So whether your kitchen is traditional, country or simplistically modern, your integrated DishDrawer® will all but disappear, beautifully.

Integrated models come with Chrome badges. Additional control badges are available in black, satin and brass.
