

◆ New

Key Features

- S-AIR Technology - Multi-room listening made easy.
- Multi-room "S-AIR" Technology integrated
- Multi-room S-AIR receiver/speaker system included
- S-AIR Wireless Rear Speaker system included
- iPod Cradle (TDM-iP10) for DIGITAL MEDIA PORT included
- 1080p Upscaling via HDMI
- BRAVIA Sync
- 1000W, 5-Disc DVD/CD Player
- ◆ DIGITAL MEDIA PORT
- ◆ BRAVIA™ Matching and Adjustable Floor Standing Speakers

Key Technologies

S-AIR Technology Multi-room listening made easy. Free your music. From room. To room. To room. AirStation automatically syncs to allow multi-room listening through simple, wireless plug-and-play technology while letting you control what you listen to.

BRAVIA® Sync As a leader in products with HDMI connectivity, Sony has created BRAVIA® Theatre Sync to go beyond simple audio and video transmission. When combined with a BRAVIA® Theatre Sync-ready BRAVIA® Televisions and other Sony audio and video products, in addition to audio and video transmission, control functions will be transmitted via the HDMI cable. With "One Touch Play," operations that took several steps have been reduced to one. Press the PLAY button on the remote, watch the audio and/or the video component(s) turn on then the BRAVIA® television turn on and switch to the correct video input—Simple—Easy—BRAVIA® Theatre Sync.

DIGITAL MEDIA PORT As the demand for digital content continues to be strong, here's the challenge: how do you access digital music in various devices from a home theater system— The answer: Sony's DIGITAL MEDIA PORT (DMP). This proprietary interface adds networking and connectivity to the options of home theater systems and components, connects with various devices today and in the future, provides the ability to control and power devices while making set up easy and operation simple to use. The DMP will be compatible with various accessories which will include a PC Client device, Bluetooth receiver and Audio Docking Stations compatible with Network Walkman and iPod® products. So regardless of how you store your music, Sony's DIGITAL MEDIA PORT grants access, provides control and integrates your portable music into a traditional home theater system.

HDMI™ Output with 720P/1080p upscaling of DVD Media³ Reads the data on a standard DVD at 480P and maximizes the video resolution to best fit your HDMI compatible TV. This allows for you to enjoy the best in video performance while delivering digital Video and Audio over one simple cable.

Digital Cinema Auto Calibration Now the optimal speaker for your living room is only a press of button away. Simply place the included microphone in your listening position and allow the strength of Sony's Digital Signal Processing to take over. Speaker placement, distance, and delays are all adjusted automatically to ensure a worry free listening experience.

Portable Audio Enhancer Simplified front audio and video connections are part of what makes the DAV-HDX576WF ideal for today's portables. Beyond the simplified connection a powerful Digital Signal Processor is used to expand the quality from any device that is connected.

Multi Speaker Formation Select from the on screen display to configure the system for different speaker layout.

Music/Movie Mode System automatically adjusts sound characteristics to match the source (movie vs. music).
