

# Virtually Invisible® 191 Speakers

Designed for placement in *walls* and *ceilings*.

Enjoy the rich sound of music and movies from speakers that blend into your room.

Introducing the new Virtually Invisible® 191 speakers. The speakers are easy to install

flush to your wall or ceiling and can even be painted to match your room. Proprietary Bose® technologies deliver quality performance and

*Design blends in.  
Sound stands out.*

lifelike sound – just what you’d expect from the most respected

name in sound. Finally, room-filling sound that doesn’t interfere with your décor. Experience the Virtually Invisible® 191 speakers today and see how beautifully Bose performance can fit into your life.

- Virtually Invisible® speaker design provides room-filling sound from speakers that blend into the room.
- Stereo Everywhere® speaker performance is delivered by Articulated Array® speaker design to provide rich stereo sound throughout the room, instead of in one small “sweet spot” as with most conventional speakers.
- Proprietary ported enclosure reinforces low-end notes, and provides a consistent, predictable performance while significantly reducing the amount of sound that radiates into other rooms.
- The largest part of the speaker is hidden behind the wall, so only a small footprint is exposed: rectangular grille: 8 $\frac{1}{2}$ "W x 6"H; circular grille: 10 $\frac{1}{4}$ "D.
- Speakers install flush to the wall or ceiling.
- Can be used as stereo or home theater speakers.
- Both rectangular and circular grilles are included in the box for choice of style.
- Available in white; can be painted to match room décor.
- Installation simplified by pre-connected parts.
- Compatible with amplifiers or receivers rated from 10 to 100 watts per channel RMS and 4 to 8 ohms, including the Lifestyle® SA-1 amplifier.
- Five-year transferable warranty.
