

The Tivoli Audio Story:

Tivoli Audio was started by Tom DeVesto, a respected and established leader in the audio industry, with the goal of bringing simple to use, high-quality audio products to the consumer at reasonable prices. Says DeVesto, "the Model One table radio is so impressive, I started a company to sell it." His thirty-year association with Henry Kloss includes senior management positions at Advent and Kloss Video and co-founding Cambridge SoundWorks. As the CEO and head of research and development at his former company, Tom was responsible for the development of many of today's best-selling hi-fi and multimedia products. Tom's latest products, the Model Two, Model Subwoofer, Model CD, RadioCombo and the Model Three Clock Radio incorporate Henry's tuner technology into a new line of elegant high-performance products.

Henry Kloss' refusal to be constrained by budgets, deadlines, and trends has resulted in some of the best sounding audio products ever made. His long love affair with audio began back in the early 1950's when, as a student at M.I.T., he began building speaker enclosures for fellow students who wanted to exploit the sound of live FM broadcasts of the Boston Symphony Orchestra. After co-founding Acoustic Research in 1952, he helped develop the first acoustic suspension loudspeaker, which forever changed the way audio was reproduced. Next came KLH and the Model Eight, the first highly sensitive FM table radio, now a highly sought-after collectible. Ten years after at Advent, Henry brought to market one of the first projection televisions (which later earned him an Emmy Award), and one of the first consumer cassette decks with Dolby B noise reduction*. Kloss Video entered the picture in 1977. In 1988, Henry co-founded Cambridge SoundWorks** with long-time associate Tom DeVesto, offering factory direct savings in hi-fi and multimedia speakers. In 2000, at the age of 70, Henry emerged from retirement to once again team-up with DeVesto to produce the critically acclaimed Model One table radio. His classic Tivoli Audio designs stand as a permanent testament to his passion for fine audio, simplicity, and value.

The Henry Kloss Model One AM/FM Table Radio™:

Who said "bigger is better"?

Where performance and simplicity are paramount but space is sparse, the Model One mono table radio fits the bill. With just three knobs, it is the antithesis of today's ever more complex electronic products. But behind the Model One's simple, innocent appearance, hides a multitude of technology enabling higher fidelity sound reproduction and better reception over anything else near it in size or cost. The furniture-grade, handmade wood cabinet is not just for appearance sake, but also doubles as an acoustically inert housing. A heavy-magnet, long-throw 3-inch driver is allied to a multi-stage frequency contouring

circuit that adjusts the speaker's output over half-octave increments. The result is musically accurate tonal balance and bass response. Instead of a standard, off-the-shelf integrated circuit, the Model One uses a state of the art, discrete-component FM tuner featuring GaAs MES-FET mixers. Originally developed for cellular telephones, the Model One was the first radio to adopt this technology for better FM reception and increased clarity on closely spaced stations. Discovering those stations is a joy thanks to the large analog tuning knob. Its geared-down 5:1 tuning ratio permits easy and accurate tuning. The amber tuning indicator lets you know when you've achieved proper tuning. Built-in AM and FM antennas provide satisfying reception, while a rear 75 ohm jack allows connection of an external FM antenna in difficult reception areas. Also provided is a headphone jack, auxiliary input to connect a portable CD player or other device, and a record output for recording, or to use the Model One as a high quality outboard tuner. Available in a variety of colors/wood finishes to suit most tastes, the Model One looks right at home whether perched on a kitchen counter, in a dorm room, bedroom, at the office, vacation home, on a workbench, or in an RV or boat (using the 12v input). *Stereophile* magazine lists the Model One as a Recommended Component and said it has "a richness, a warmth, a generosity of tone, and a clarity that made for enjoyable listening." *MSNBC* advises, "if you're looking for the best sounding AM/FM table radio ever made, then you should check out Henry Kloss' latest and greatest invention—the Model One." The Model One has made numerous appearances including *NBC's Today* show. Henry said his Model One was "the culmination of more than 40 years of bringing music into people's homes via products they tend to keep and enjoy." So perhaps it was inevitable that the Model One quickly established itself as our most popular product. External FM antenna and 9' power cord included. One year warranty.

Offered in: Beige/Walnut, Blue/Cherry, Green/Maple, Silver/White.

Dimensions:
4"H x 8 3/8"W x 5"D.

Weight: 4lbs.

Operates on AC or 12v.

Model One

Model Two

The Henry Kloss Model Two AM/FM Stereo Radio™: Divide and Conquer.

Stereophonic reproduction involves the separation of the left and right audio channels. So why then do most "stereo" radios closely-space two speakers in a single cabinet? The two-piece Model Two does stereo right...and left. Placing the matching companion speaker, with its 15' of cord, several feet from the main unit, provides the detailed imaging and accurate soundstage that is so essential for true stereo reproduction. We consider the Model Two to be one of the finest stereo radios available, but don't take our word for it. *Stereophile* magazine said, "the Model Two is a fun piece of gear, and the left and right speakers in separate cabinets provide much more convincing stereo than two channels stuffed in one box." *MSNBC* said, "The Model Two is a terrific sounding radio and could be the basis for a terrific sounding stereo system." And *The Audiophile Voice* described the Model Two as an "outstanding radio", and proclaimed it to be "perhaps today's best bargain in small-scale audio." The Model Two carries forth the same GaAs MES-FET tuner technology used in the Model One, 5:1 ratio analog tuning dial for easy and accurate tuning, and the same inputs and outputs as the Model One, but with several important additions: A mixing input permits audio from your computer to be mixed in with the radio. There is also a dedicated subwoofer output (for the optional matching Model Subwoofer) and a balance control. The bass ports are located in the rear to accommodate vertical positioning where space is tight. For added convenience, the front source knob has an auxiliary position, making it easier to hear our optional matching Model CD or other device. The Model Two is definitely not your stereotypical stereo radio. Mate the Model Two with the matching Model Subwoofer and/or Model CD and you have a first-rate, high fidelity stereo system. External FM antenna, rubber feet, and 9' power cord included. One year warranty. Offered in Metallic Taupe/Cherry. Dimensions of each unit: 4"H x 8 3/8"W x 5"D. Weight: 9 lbs total. Operates on AC or 12v.

Model Two AM/FM Stereo Radio with companion speaker: \$159.99

Model Three

The Henry Kloss Model Three Clock Radio™:

Start your day the Tivoli Audio way.

You don't need a degree in rocket science to operate the Model Three clock radio. Like our other products, the Model Three is simple to use, so you won't lose sleep wondering if you'll wake up. The analog clock's fine quartz mechanical movement provides accurate time keeping and compliments the analog tuning dial. The handsome exterior houses a rather high-tech interior. The Model Three uses the same sensitive tuner with GaAs MES-FET mixers, 5:1 ratio analog tuning dial, and the same inputs and outputs as the Model Two, but because it's a clock radio, we've added a 20-minute sleep timer, a snooze button, a sleek thumbwheel to set the alarm time, and the option to wake to a buzzer or the great sounding AM/FM radio. It's this warm sound, ease of use, and distinguished appearance that gives the Model Three clock radio its wonderful bedside manner. The constant, gentle illumination makes the clock visible in low or no light without keeping you awake. Add the optional matching companion speaker for stereo sound, or for a complete sound system, add the optional matching Model Subwoofer and Model CD. The Model Three clock radio: It's about time. External FM antenna and external AC power supply included. One year warranty. Offered in Metallic Taupe/Cherry. Dimensions: 4"H x 8 3/8"W x 5"D. Weight: 4.5 lbs. Operates on AC or 12v.

Model Three AM/FM Clock Radio: \$199.99[†]

Optional: Matching Companion Speaker with 15-foot cable[†]

Model CD

The Model CD™: Your CD's will thank you.

The Model CD's unique front-loading design makes playing a CD fun and easy. Its compact size permits more placement flexibility over larger, tray-loading players, or pop-open top designs. The 12VDC input even lets you use the Model CD in an RV or a boat. And as is the tradition with all Tivoli Audio products, the Model CD couldn't be simpler to use. The minimalist front panel sports a large, easy-to-read display paired with the primary controls, while the remote duplicates the primary controls and adds Shuffle, Repeat, Volume, Intro, and Direct Track Access functions. On the inside, the Model CD yields excellent sound quality and superb shock protection. The cosmetics match the Model Two and Three, or add the Model CD to enhance your existing stereo system. Credit card-sized remote, connecting cable, and external AC power supply included. One year warranty. Offered in Metallic Taupe/Cherry.

Dimensions: 4"H x 8 3/8"W x 5 15/16"D. Weight: 5 lbs. Operates on AC or 12v.

Model CD with remote: \$199.99

Model Subwoofer

The Model Subwoofer™: We've reached a new low.

For the critical listener looking to get the most from their music, computer games, or television sound, the diminutive Model Subwoofer extends the Model Two and Three's bass response by a half-octave. Don't confuse our Model Subwoofer with inexpensive computer speaker subwoofers with sloppy bass. The Model Subwoofer's 5" bass driver, 20 watt internal amplifier, front ported design, and wood cabinet all translate into rich, musical sound.

The Boston Globe said the Model Subwoofer "adds heft and foundation to the music. And it's fairly tight, not too thumpy." The Auto On/Standby circuit, an unusual feature for a subwoofer of this size, activates the subwoofer automatically when it receives a signal and places it in standby when the signal is absent. The cosmetics provide a perfect match to the Model Two or Three. Connecting cable and 9' power cord included. One year warranty. Offered in Metallic Taupe/Cherry. Dimensions: 6"H x 9"W x 6 5/16"D.

Weight: 6.5 lbs. Operates on AC or 12v.

Model Subwoofer: \$79.99

RadioCombo

RadioCombo™: Three isn't a crowd.

Put Tivoli Audio's Model Two, Model Subwoofer, and Model CD in one room and what do you get? Besides great sound, RadioCombo exemplifies Tivoli Audio's commitment to producing innovative, affordable music systems designed to simplify your life and enhance your listening pleasure. Put simply, RadioCombo is the best of what Tivoli Audio has to offer. You'll be hard-pressed to find a sweeter sounding trio. And once you get it home, just connect the components with the included cables, plug the units in, and you're done. Hi-fi couldn't be any easier. If only everything in life was that simple. One year warranty. Offered in Metallic Taupe/Cherry. Total weight: 21 lbs. Operates on AC or 12v.

RadioCombo: \$439.97

The Henry Kloss Portable Audio Laboratory™:

Everyone needs a PAL™

Ever wish you could enjoy the Model One's trademark sound quality and reception outdoors? You can, if you have a PAL. The Portable Audio Laboratory's treated 2.5" magnetically shielded driver and rubberized cabinet are weather resistant, so your PAL can keep you company by the pool or the patio. And its environmentally-friendly rechargeable Nickel Metal Hydride battery pack has no memory and fully charges in about 3.5 hours, providing many hours of cordless playback*. The clever little green LED serves as both a power and

battery status indicator. The PAL borrows the same geared-down 5:1 ratio analog tuning dial as used in our critically-acclaimed Model One table radio for easy, accurate tuning. Also on tap is an auxiliary input to connect a CD, MP3 player, or other device, and a stereo headphone output for private listening (headphones not included), as a recording output, or to use the PAL as a high-quality outboard tuner. The tuner features Automatic Frequency Control (AFC) which locks on to the center of the station for best reception and lowest distortion, while the adjustable telescoping FM antenna extends and rotates for improved FM reception (there is also a built-in AM antenna). Perhaps most amazing of all is its expansive sound which must be heard to be believed. Offered in a profusion of fun colors, your new PAL is sure to be the life of the party, and you don't have to feed him. Can't decide which color to buy? Why not collect them all? After all, you can never have too many PALs. NiMH battery pack and AC adapter included. One year warranty. Offered in Earth Brown, Moonlight Gray, Spring Green, Pearl White, Sunset Red, Electric Blue, Neon Yellow and Basic Black.

Dimensions: 6 1/4"H x 3 11/16"W x 3 7/8"D. Weight: 2 lbs. Operates on AC or 12v.

Henry Kloss AM/FM Portable Audio Laboratory: \$129.99

*Playback time varies depending on volume level

Portable Audio Laboratory (PAL)

Every Tivoli Audio product is manufactured in our own factory, which affords us exceptional quality control. Our family of products represent a level of sound and build quality unequalled in their price range. Words cannot accurately convey what makes our products so special. Since the human ear is the most sensitive instrument for assessing sound quality, we invite you to audition our products today at your local authorized Tivoli Audio dealer. Please visit our web site for the latest news and reviews, or feel free to contact us if you have questions. All of our products also make elegant, distinctive gifts for Christmas, Father's Day, weddings, graduations, birthdays, housewarmings, and other special occasions.

TIVOLI AUDIO™

Simple. Elegant. Affordable.
