KDF-55/60WF655

High Definition LCD Projection Television

- Hi-Scan 1080i™ Display
- ATSC Integrated Tuner and Digital Cable Ready with CableCARD™ Slot
- 3.28 million dots resolution
- WEGA Engine™ system
- Slim, lightweight design
- Digital Amp S Master

The WEGA Engine™ System Sony's proprietary WEGA Engine™ system maintains the picture in the digital domain from the first stage to the last – end-to-end digital accuracy to deliver superb picture quality from any video source. Direct Digital Circuitry (DDC) increases the signal to noise ratio before it passes through to the DRC® circuit. Digital Reality Creation™ MultiFunction Circuitry raises standard definition signals to HD quality to display clear, stable images from any video source. MID®-X Multi Image Driver Circuitry scales all incoming standard and high definition signals to the configuration of the panel without degrading signal quality, and provides Twin-View™ picture-and-picture features. DCP Digital Component Processor fine-tunes the signal to improve overall contrast and sharpness before the image is displayed.

*All Sony digital still cameras and camcorders except models DSCD-700, DSCD-770, DCR-TRV900 and DSR-PD100A store images on a Memory Stick in the DCF file format, which is required for playback on these projectors. If the image file is renamed or manipulated, the DCF file format must be restored before playback is possible. Images captured on all other digital still cameras and camcorders will need to be formatted on a PC to the DCF file format (with third party software not supplied with the projector) before they can be viewed.
