

# Lifestyle® RoomMate®

POWERED SPEAKER SYSTEM

*Bose® link-enabled products and accessories make expanding a Lifestyle® home entertainment system easy and enjoyable.*

**PRODUCT POSITION:**

The Lifestyle® RoomMate® powered speaker system is our most affordable, complete solution for expanding a Lifestyle® system into other areas of your home. Its small footprint, room-filling performance, Bose® link technology and advanced remote make it an ideal extension of a Lifestyle® system in the kitchen, dining room, bedroom – wherever Bose quality sound is desired in an additional room.

**REASONS TO OWN:**

1. You enjoy using the uMusic® intelligent playback system and would like it in other areas of your home.
2. You want access to your entire music collection anywhere in your home.
3. You appreciate a “plug-and-play” setup.
4. You value great sound from a system that takes up little space.

FEATURE	FUNCTION	BENEFIT
Bose® link technology	Seamless integration with Lifestyle® systems. Allows up to 14 additional rooms of sound, each with independent volume control and choice of two audio streams.	Ability to enjoy and control all sources of the Lifestyle® system from almost anywhere around your home. Makes entire music collection accessible throughout your home.
Bose® link input	One-cable connection to your Lifestyle® media center.	Simplified setup.
Personal® music center II radio frequency remote	Provides complete control of the Lifestyle® media center beyond the main room.	Our most advanced expansion controller includes built-in LCD screen. Enables the user to control and view the status of a selected source from almost anywhere around your home. Provides real-time TTAG information when in the uMusic® system library or presets (Lifestyle® 38 and 48 systems only).

# Lifestyle® RoomMate®

POWERED SPEAKER SYSTEM

FEATURE	FUNCTION	BENEFIT
Bose® link AL8 homewide wireless audio link compatibility	Works with AL8, eliminating the wire connection between the RoomMate® system and the Lifestyle® media center.	Simplifies setup with Lifestyle® systems and provides placement flexibility.
Local mute control	Temporarily mutes audio signal.	Touch-panel local mute sensor located on the front of the system mutes audio playback with the touch of a finger. Ideal when there is a need to mute the system and the remote is not nearby.
Compact, elegant system design	Single enclosure with slim profile and small footprint takes up very little space.	Complements almost any room décor.
Integrated system design	Matches amplifiers, equalizers and speakers to each other for better acoustic performance.	Consistent acoustic quality without the hassle of complex system adjustments.
Sophisticated port design	Produces deeper sound from a relatively small enclosure.	Rich, full sound from a small-sized system.
Active electronic equalization	Balances output of low, mid and high frequencies.	Music is reproduced accurately, with natural tonal balance and clarity.
Digital signal processing (DSP) circuitry	Maintains audio accuracy with greater consistency.	Exciting realism and highly consistent quality of sound.
Auxiliary input	Allows the connection of a local audio or video source.	Provides more choices for entertainment.
Compression circuitry	Proprietary electronics ensure that unusually high peaks in music don't "clip" and cause distortion.	Helps prevent objectionable distortion so music sounds natural, even at high volume levels.
Shielded transducers	Prevent interference when the system is placed next to TVs or computer CRT screens, and prevents erasing data from storage media.	Greater placement flexibility.
