

## In-Wall Music Systems

July 2005

In-Wall	Part#	Retail	Description
---------	-------	--------	-------------

IW-1	70001	\$200	In-Wall (IW) docking station for the iPod®. Charges the iPod when docked. Universal cradle works with all iPod hard drive based music players. No adapters necessary. Unbalanced audio and video output via RJ45 connectors. Unbalanced audio wall plate included. Unbalanced video wall plate kit optional. Ideal for a local connection to audio amplifiers and video display devices. Power supply included.
------	-------	-------	---

IW-2	70002	\$350	Includes all the features of the "-1" model and adds IR remote functionality with a built in IR receiver. Control the iPod from across the room. Remote control not included. Works with iPort remote controls as well as any learning or universal IR remote control. Starting with the "-2" models, an upgrade path is available to add features. May be upgraded to balanced audio or video, as well as two-way RS-232 communication via optional kits.
------	-------	-------	--

IW-3	70003	\$600	Includes all the features of the "-2" model with the addition of a factory mounted balanced audio module and the substitution of a balanced audio wall plate. Rated for placement up to 500 feet away from the amp or receiver.
------	-------	-------	---

IW-4	70004	\$800	Includes all the features of the "-3" model with the addition of a factory pre-mounted RS232 module for two-way communication. Includes RJ11 to DB-9 female adapter cable. This enables control of the iPod and for the display of the metadata on the control device. The metadata from the iPod includes Playlists, Track, Artist and Album name, etc. The iPod currently does not supply album art.
------	-------	-------	--

IW-5	70005	\$1,100	Includes all the features of the "-4" model and adds a factory pre-loaded balanced video module and a balanced video wall plate. Balanced video allows placement of the iPort up to 250 feet from the balanced video wall plate.
