

DC14 All floors

For all floor types.

For all floor types

- **Brush Control**
Brushbar turns off to protect rugs and delicate floors.

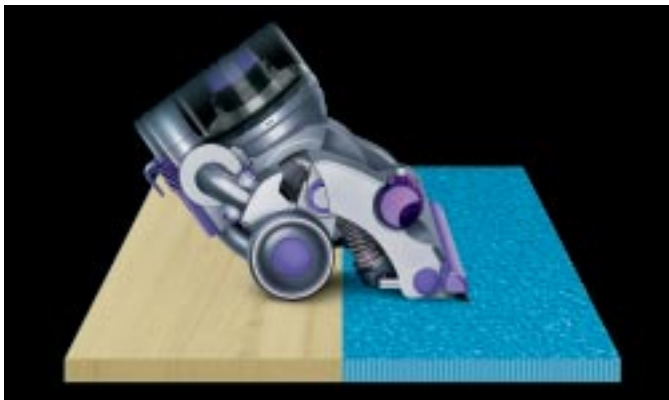

Includes the new 5 year warranty.

Features

5 year warranty

5 year worry-free use.

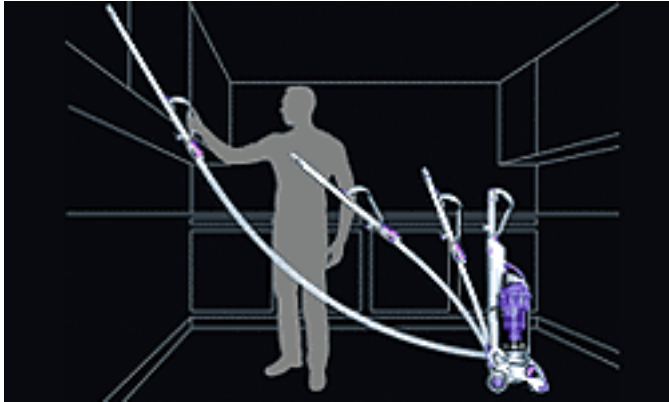

Brush control

Brushbar turns off to protect rugs and delicate floors.

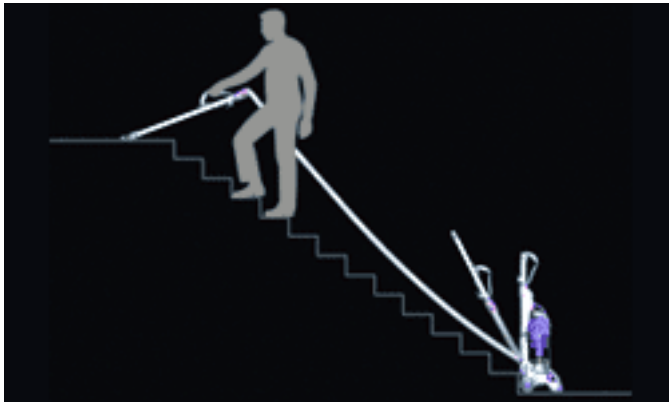

Root Cyclone™ technology

Dyson Root Cyclone™ maintains powerful constant suction.

Telescope reach™

No awkward parts to assemble for high-reach cleaning.

Instant stair cleaning

Wand expands 17 ft. at the touch of a button.

Wide channel for large pieces

Picks up bigger pieces that others can leave behind.

The only quick-draw hose

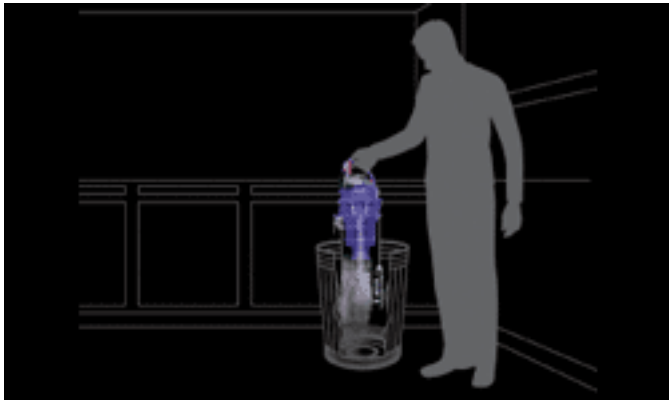

Just press the catch and the 14ft hose is ready to use:

- no awkward parts to assemble
- reaches to the top of the stairs
- cleans under low furniture
- doesn't pull the machine over

Easy to carry ergonomic design

Low handle feels lighter to carry.

Hygienic and quick to empty

No need to touch the dust - just pull the trigger.

No extra costs, no bags or filters to buy.

The pre-motor filter removes particles down to 0.1 micron and is washable.

The post-motor electrostatic filter traps harmful carbon emissions from the motor. This filter never needs replacing.

Approved for allergy sufferers

British Allergy Foundation seal of approval DC14 telescope reach models have been approved by the British Allergy Foundation.

BAF is a UK national charity with the aim of improving awareness, prevention and treatment of allergies.

High velocity airflow tools

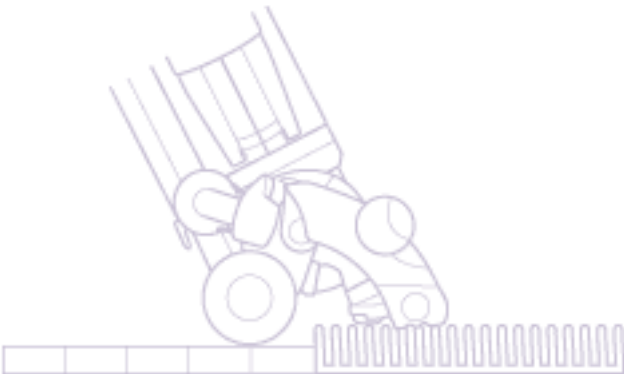

The intake nozzles of the DC14 tools direct high velocity airflow down into the carpet pile. This has two main advantages:

- You pick up more because the directional force of the air agitates and dislodges dust
- The airflow is continuous even when vacuuming curtains or upholstery preventing them from becoming stuck to the cleaner

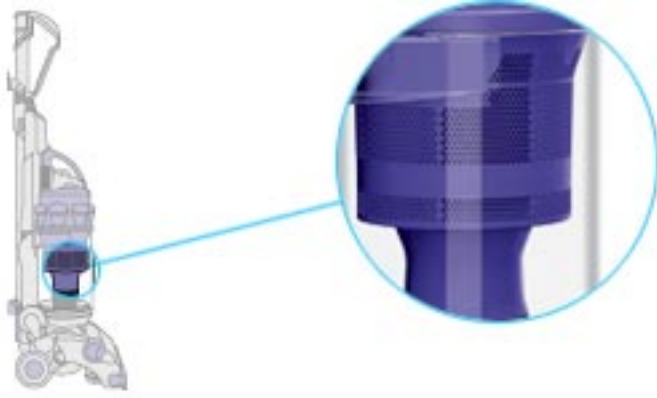

Lifetime HEPA filter

Air expelled from a Dyson has up to 150 times less bacteria and mold than the air you breathe.

Auto carpet-height adjustment

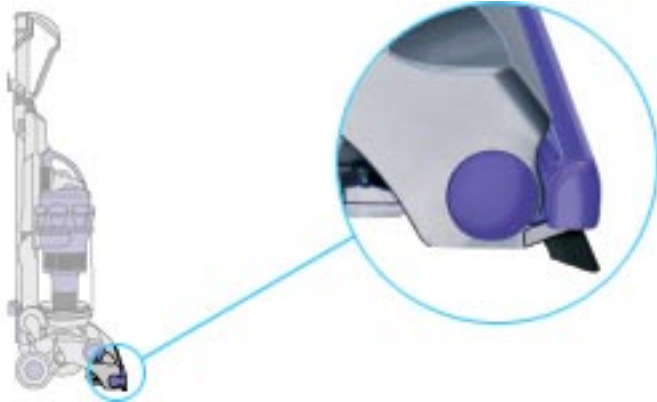

Maintains constant contact with the floor to maximize dust pick-up.

Clear bin™

This has 4 clear advantages:

- You can see how well the Dyson works
- There are no bags to buy
- You can always tell when it's full
- It is easy to empty

Edge cleaning whiskers

DC14's suction is channelled right to the edges of the cleaner head, unlike many uprights. Its specially-designed whiskers, angled to reach down between the skirting board and the floor, flick the dust from the edge into the airflow.

Technical Specifications

Dimensions	Height: 44.86"
	Width: 14"
	Depth: 13.38"
Weight	18.56 lbs
Motor wattage:	12 amps. The power of a vacuum cleaner is best measured in airwatts (suction power). Motor wattage simply tells you how much electricity a cleaner uses.
Bin capacity	0.71 gal
Cord length	35.4ft
Maximum reach	52.4ft
