

Cut installation time in half with Broan's exclusive EZ1 installation system.

EZ1™ ONE-PERSON INSTALLATION

The EZ1 installation system enables fast, one-person installation. No need for a helper so you reduce labor costs. EZ1 brackets hold the hood firmly in place while you make final preparations for electrical and ducting connections. Work freely, work smarter and help prevent damage to the range hood and other finished surfaces.

EZ1 brackets for framed and frameless cabinets.

Affix the brackets to the cabinetry with three short screws, slide the hood into position and then secure the hood. It's easy, fast, and saves up to 50% of the time.

160 CFM Models	Finish	Width
