

TRANSITIONAL DF RANGE

DOP36P86D

Performance

- Promotes professional cooking results with a single burner maximum output of 22K BTU capable of simmer using solid brass dual stack burners
- Achieve meats that are juicy on the inside yet crispy on the outside using Steam Assist with external steam generator
- Extra large capacity oven can accommodate multiple dishes with 6.3 cubic feet of space
- Reduce cooking time with superior consistency of zero flavor transfer by distributing heat evenly across the oven with dual Four-Part Pure Convection

Convenience

- Easily slide pots and pans across spacious cooking surface with continuous grates
- Rest easy knowing that oven door will not be damaged by accidental slamming of the door
- Easily clean the oven cavity using pyretic self clean or gentle steam Greenclean
- Wi-Fi enabled 2.25" OLED touch control panel allows SmartThings integration for communication between appliances as well as monitoring/operating remotely
- Easily slide oven racks in and out using Gliderack with ball-bearing slides

Craftsmanship

- The beauty of the appliance is accentuated with long horizontal brush stroke finish which also hides blemishes
