

MODERNIST GAS COOKTOP

DTI30P876BB & DTI36P876BB

Performance

- Quickly boil water or sear steak to perfection using powerful induction elements capable of 4,800W of boost power
- Cook dish of any size using FlexZone feature with adjustable cooking surfaces which combine into one larger cooking surface

Convenience

- Connected ventilation will activate and adjust fan speed automatically with Bluetooth connectivity to the cooktop while being able to be monitored through SmartThings integration

Design

- Prevent scratches with grooves on the heat resistant ceramic glass to ensure that the surface of the unit stays clean
- Intuitive glass touch control is easy to use and lets the user know if there is residual heat present
- Install the cooktop without interfering with the rest of the kitchen design as the unit is designed to be installed flush with the countertop
