ADVANTAGE TOSHIBA

27" FST PURE® TV with Full-Featured DVD Player and built-in VCR for the ultimate in convenience.

Storing, sharing and transporting data is simplified by a USB Interface, which provides simple multimedia playback of mass storage classification devices plays JPEG, WMA, MP3 and (unencrypted) DivX® .

DivX® Home Theater Certified allows playback of DivX®, AVI and MPEG4 (.ASF) compressed files downloaded from the internet from a personal computer and stored on a CD-R/RW.

Digital Cinema Progressive Scan display of DVD images so you can enjoy movies with images free of annoying scan lines and flicker.

DVD-Video/CD/Video CD playback. DVD-R/CD-R/CD-RW compatible playback ensures discs made with recording devices can be played back in the home theater system, too.

Front AV Inputs for easy connection of video games or a camcorder.

TECHNOLOGY & BENEFITS

VIDEO

FST PURE® 4:3 (480i) Flat Tube Design - Due to its flat design, viewing angle and picture linearity are greatly improved over traditional tube designs, delivering the most accurate, life-like images possible.

Digital Cinema Progressive Scan - With DVD playback, typical NTSC artifacts such as video noise and flicker are virtually eliminated. The end result is a low noise, highly-detailed picture with improved color purity and smooth filmlike images.

Digital Picture Zoom - This interactive DVD feature allows the user to select an area of the picture to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.

JPEG Viewer - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

AUDIO

Double Baffle Stereo Speaker System - These front-firing, side-mounted speakers deliver the best stereo sound by keeping the sonic image widely separated within the cabinet.

VHS Hi-Fi Stereo - Delivers the highest quality stereo sound from tapes recorded with a high fidelity soundtrack.

WMA & MP3 Playback - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats are compatible with the DVD player.

StableSound® - This feature maintains television volume within a preset range regardless of the source signal. This eliminates the annoyance of normal program volume being followed immediately by extremely loud commercial messages or drastic volume fluctuations while changing channels.

Coaxial Dolby® Digital and DTS® Surround Sound Output - Use the single RCA-type output jack to send signature multi-channel audio to an audio/video receiver with a compatible input.

CONVENIENCE

Toshiba Combo models featuring a **USB Interface** will support "mass storage classification devices" for simple multimedia playback. These formats include JPEG, WMA, MP3, and DivX® (unencrypted).

SD Bridge Recording allow the user to record content received via the HD tuners onto VHS in a Standard Definition format. Models with this feature will receive the HD signal, downconvert it to SD and record it on a VHS tape. The recording will be unconverted during playback.

Icon TV/VCR Menu, Text DVD - Offers simple operation by using picture symbols of key menu functions instead of plain text. Quickly access various TV features via pull down menus.

Picture Preference Modes - Includes preset picture settings tailored for various programs and allows quick adjustments at the touch of a button. Instead of accessing Brightness, Contrast, Color, or Tint each time you switch from a movie to a sporting event, use the preset Picture Preference Modes (Standard, Sports, Movie, Memory) to change the quality of the picture without all the fuss. The Memory Mode allows you to customize your own settings and save them into the television's memory.

Commercial Skip for VCR - After a program has been recorded, pressing the SKIP button once during playback will automatically advance the tape 30-seconds forward bypassing recorded commercials. Pressing the skip button on the remote again will advance the recorded tape for another 30-seconds for a total of 60-seconds (30 sec x 6 Maximum).
