iLX-407

Alpine Shallow Chassis 7-inch Multimedia Receiver with PowerStack™

Android Auto | Apple CarPlay | Bluetooth | HDMI In | HD Radio | iDatalink Maestro Ready

PRODUCT OVERVIEW

Packed with even more features, iLX-407 is the next evolution of the PowerStack™ receiver and the ultimate sound system builder.

PRODUCT FEATURES

New Technology – The iLX-407 upgrades your vehicle's technology with Apple CarPlay, Android Auto, and Bluetooth for hands-free calling with audio streaming. Built-in HD Radio, SiriusXM (tuner and subscription required), and an HDMI input give you all the entertainment options you need.

Customizable Screen – Customize the screen exactly the way you want it. Use the capacitive touchscreen to move an icon using drag-and-drop motions with your finger. With over 22 available widgets, you can prioritize your three home screens so you can quickly find the apps you want.

PowerStack™ for Simple System Building – The iLX-407 is PowerStack™ capable and can be paired with the KTA-200M Mono Power Pack Amplifier, providing an easy way to add amplication for a subwoofer, like the S-SB10V 10-inch Alpine Halo S-Series Preloaded Subwoofer Enclosure.

System Compatibility – Upgrading dash technology can often result in a loss of factory functionality, such as steering wheel controls and access to engine codes. The iLX-407 is compatible with the iDatalink® Maestro Module (sold separately) so select OEM features are retained and vehicle information is displayed on the 7-inch screen.
