

PARASOUND

Introducing the JC 3 Jr. Phono Preamplifier

John Curl is an audio legend with over 30 years experience designing the very finest sounding phono preamps. His latest design just happens to be his most affordable, ever.

PARASOUND

JC 3 Jr. Phono Preamplifier

The JC 3 Jr. is John Curl's ultimate value-engineered phono preamplifier

John Curl has designed acclaimed phono stage preamps for Vendetta Research, Constellation Audio, Audible Illusions and for Parasound, whose JC 3+ is a Stereophile Class A Recommended Component. The JC 3 Jr. is his most affordable...ever.

- S/N up to 94 dB and THD less than 0.02%
- Vampire brand 24k gold-plated RCA jacks
- Neutrik locking balanced XLR outputs connectors
- Cartridge options for 47kΩ MM and MC
- Variable MC impedance adjustment of 50-550 ohms
- Mono switch improves sound of mono & older LPs
- Gain select for 40 dB/50 dB/60 dB unbalanced, or 46 dB/56 dB/66 dB balanced
- Circuit boards designed by Carl Thompson
- Convenient auto turn-on by 12V trigger
- RIAA accurate to within 0.2 dB
- Vishay-Dale resistors in the audio path
- Incredible S/N ratio achieved with aluminum shield to isolate audio circuitry from power supply board and additional shielding of the toroid power transformer
- High speed-soft recovery bridge rectifiers and common mode inductor for purest sound
