

## Installation Using an RFU Adaptor

### PlayStation2 computer entertainment system (70000 series)

#### Step 1: CABLES

Connect the flat end of the RFU Adaptor to the AV MULTI OUT connector on the back of the PlayStation 2 system.

Connect the RFU OUT connector to the cable connector on the back of your TV. This is where you ordinarily connect your coaxial cable for an antenna, cable TV, or VCR. Plug the cable into the area marked ANT on the RFU adaptor.

Set the RFU Adaptor switch to either channel 3 or 4.

Connect the AC adaptor to the AC power cord. Connect the AC adaptor end to the PlayStation 2 system.

Plug the AC power cord end into a working electrical outlet.

#### Step 2: CONTROL

Press the on/standby/reset button on the front of the console. Make sure the indicator light turns green.

Press the open button on the front of the console and set a disc in the disc holder. Press down gently on the disc until all three tabs on the disc holder are above the surface of the disc. Press the "PUSH" label on the disc cover to close it.

#### Step 3: CONTROL

Turn on the power to your TV.

Set your TV to either channel 3 or 4 depending upon the RFU Adaptor switch setting.
