SAFETY PRECAUTIONS

WARNING — TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

A. Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer.

B. Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.

C. Do not use this unit with any solid-state speed control device.

D. Use with approved cord-connection kit only.

E. This unit must be grounded.

WARNING — TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE:

A. Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.

B. Always turn hood ON when cooking on high heat or when flambeing food (i.e., Crepes Suzette, Cherries Jubilee, Peppercorn Beef Flambé).

C. Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.

D. Use proper pan size. Always use cookware appropriate for the size of the surface element.

(continued next page)
OPERATING INSTRUCTIONS

Always turn your hood on before you begin cooking to establish an air flow in the kitchen. Let the hood run for a few minutes to clean the air after you turn the range off. This will keep the whole kitchen cleaner.

Controls

The hood is “OFF” when the glass visor is pushed completely in.
LIGHT—The light will turn “ON” when the glass visor is pulled out approximately 1/2 inch.

BLOWER—The blower will turn “ON” when the drawer is pulled out approximately 1 1/2 inches. The blower speed is set using the slide control, located to the right of the drawer.
Automatic Heat Sensor

Your hood is equipped with an automatic thermostat. This thermostat is a device that will turn on or speed up the blower if it senses excessive heat above the cooking surface.

If your blower is not on, or if it is running at low speed, the thermostat will sense excessive cooking heat, override the normal blower control and turn the blower on to high speed. The blower will run until the temperature drops to normal operating level. The blower will then automatically return to its original setting.

CARE AND CLEANING

WARNING: ALWAYS DISCONNECT ELECTRIC POWER SUPPLY BEFORE SERVICING HOOD.

Use a mild detergent suitable for painted surfaces. DO NOT USE ABRASIVE CLOTH, STEEL WOOL PADS OR SCOURING POWDERS. Vacuum the blower to clean it. Do not immerse the blower in water.

The glass visor assembly and light lens are easily removable for cleaning: DO NOT clean in a dishwasher. Remove the light lens by opening the filter panel and turning the 2 metal clips holding the lens in place.

Filter

Slide the glass visor open.

Open the filter panel by turning the two clips and allowing it to swing free.

Flex the filter in the middle to remove it.

Wash and rinse the filter in a mild detergent solution.

Replace the filter before using the exhaust fan.

Light Bulb Replacement

This hood uses a 24” long F20T12 fluorescent tube and an FS-2 starter, which are available at most hardware stores or home centers.

To check or replace tube:

1. Pull the drawer out.
2. Rotate the filter panel clips and lower the filter panel.

If the tube flickers or does not light, check the prongs on the ends of the tube to make sure they are properly seated in the tube holders.

If the tube continues to flicker or does not light, replace the tube. Slide the tube into the holders and rotate the tube so that the prongs in the holders grip the tube and hold it in place.

If the ends of the tube light but the center does not, the starter may require replacement. The starter is located behind the filter panel on the right hand side.

Install the new starter by pushing the starter in and turning it clockwise.

Stainless Steel (on some models)

Do not use a steel wool pad; it will scratch the surface.

To clean the stainless steel surface, use warm sudsy water or a stainless steel cleaner or polish. Always wipe the surface in the direction of the grain. Follow the cleaner instructions for cleaning the stainless steel surface.

To inquire about purchasing stainless steel appliance cleaner or polish, or to find the location of a dealer nearest you, please call our toll-free number:

- Caulking
- Level
- Flashlight

PLAN THE INSTALLATION

Caution: Remove the house fuse or open the circuit breaker before beginning the installation. Your new hood will fit a standard 30" wide flush bottom or recessed bottom, framed or frameless kitchen cabinet which has a minimum depth of 11" from the face to the inside of the back wall.

The unit is ducted vertically. To change to horizontal ducting see the instructions.

For safe operation, the mounted hood must be a minimum of 24" above the cooking surface.

For easiest installation, the range hood should be installed in the cabinet before mounting the cabinet to the wall.

NOTE: Remove the glass visor from the unit before installing the hood in the cabinet to protect the visor from damage.

This hood can easily be installed by following these basic steps:
- Mark and cut out the cabinet bottom.
- Secure the hood to the cabinet.
- Mount the cabinet on the wall.
- Connect the ductwork and the power cable.

INSTALL THE HOOD

1. Mark and cut out the cabinet bottom.

Prepare the cabinet bottom as shown above. Be sure to locate the cut-out and four holes from the front of the cabinet to assure a flush mount.
2. Attach the damper/duct connector.

Use two (2) screws (provided) to attach the connector to the housing. The damper flap should open in the direction indicated by the arrow.

3. Remove the electrical knockout.

Choose either the top or side of the housing for the electrical cable entrance. Remove the appropriate knockout.

4. Set the housing into the opening.

Carefully lower the housing into the cabinet opening with the slide control to the front.

5. Remove the access cover.

6. Open the filter panel.

Pull the visor slides out. Rotate the panel clips and swing the panel open.

7. Install the mounting brackets.

Insert the bent end of the installation rod into the access hole in the housing.

Choose the mounting bracket with the center hole. Hang the bracket from the rod, through this center hole, as shown. Pull the bracket up between the cabinet and housing.

Hold the mounting bracket in place with the rod. Two sets of screws are provided. Use the short screws for flush bottom cabinets or the long screws for recessed bottom cabinets. Insert two (2) screws through the housing and into the mounting bracket. Do not tighten the screws completely.
Insert two (2) screws, short or long as appropriate, through the control box and into the other mounting bracket. Do not tighten the screws completely.

8. Secure the hood to the cabinet.

Align the hood with the sides and front edge of the cabinet. Tighten the screws in each mounting bracket. Place plastic caps (provided) over the ends of these screws from the inside of the cabinet.

Install two (2) additional screws into the cabinet bottom, through the front mounting holes along the front edge of the hood.

9. Replace the access cover.

Secure the access cover with the two (2) screws removed in step 5.

10. Mount the cabinet on the wall.

Make sure the cabinet is securely attached to the wall and/or adjoining cabinets. The mounted cabinet must be able to support the added weight of the hood.

11. Attach the ductwork and the front trim.

Complete the ductwork from the hood to the outside using a roof cap or elbow and wall cap. Tape all joints. Shelves may be installed if trimmed to clear the ductwork.

The front trim piece covers the gap between the housing and the front edge of the cabinet cut-out. Mount the front trim to the housing with two (2) screws (provided).

12. Connect the electrical wiring.

Remove the wire box cover. Attach the power cable to the hood using the proper connector. Connect black to black, white to white and green or bare wire to ground screw. Replace the wire box cover.

CAUTION: DO NOT TURN THE BREAKER ON OR INSERT THE HOUSE FUSE AT THIS TIME.

13. Install the glass visor assembly.

Slide the glass into the visor slides, above each visor clamp (see the illustration in step 14). Align the visor trim and tighten the thumb screws to secure the glass.

To remove the glass visor:
Simply loosen the thumb screws and pull the glass from the visor slides.

14. Fine adjustments to the visor trim position.

The visor slides each have a screw for adjusting the height of the visor trim, if necessary. The vertical adjustment screw allows the top and bottom edges of the visor trim to be matched with the control trim.

15. Connect the power.

16. Check operation.
### WHAT IS COVERED

**LIMITED ONE-YEAR WARRANTY**

For one year from date of original purchase, we will provide, free of charge, parts and related service labor to repair or replace *any part of the hood* that fails because of a manufacturing defect.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. In Alaska, the warranty excludes the cost of shipping or service calls to your home.

All warranty service provided by our Factory Service Centers, or an authorized Customer Care® technician. To schedule service, on-line, 24 hours a day, visit us at ge.com, or call 800.GE.CARES (800.432.2737). Please have serial number and model number available when calling for service.

### WHAT IS NOT COVERED

- Service trips to your home to teach you how to use the product.
- Improper installation, delivery or maintenance.

If you have an installation problem, contact your dealer or installer. You are responsible for providing adequate electrical, exhausting and other connecting facilities as described in the Installation Instructions provided with the product.

- Replacement of the replaceable filters.
- Replacement of house fuses or resetting of circuit breakers.

- Failure of the product if it is used for other than its intended purpose or used commercially.
- Damage to product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage caused by possible defects with this appliance.
- Damage caused after delivery.
- Product not accessible to provide required service.

### EXCLUSION OF IMPLIED WARRANTIES

Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are in your state, consult your local or state consumer affairs office or your state’s Attorney General.

Warrantor: General Electric Company
Consumer Support.

**GE Appliances Website**
Have a question or need assistance with your appliance? Try the GE Appliances Website 24 hours a day, any day of the year! For greater convenience and faster service, you can now download Owner's Manuals, order parts or even schedule service on-line.

**Schedule Service**
Expert GE repair service is only one step away from your door. Get on-line and schedule your service at your convenience 24 hours any day of the year! Or call 800.GE.CARES (800.432.2737) during normal business hours.

**Real Life Design Studio**
GE supports the Universal Design concept—products, services and environments that can be used by people of all ages, sizes and capabilities. We recognize the need to design for a wide range of physical and mental abilities and impairments. For details of GE's Universal Design applications, including kitchen design ideas for people with disabilities, check out our Website today. For the hearing impaired, please call 800.TDD.GEAC (800.833.4322).

**Extended Warranties**
Purchase a GE extended warranty and learn about special discounts that are available while your warranty is still in effect. You can purchase it on-line anytime, or call 800.626.2224 during normal business hours. GE Consumer Home Services will still be there after your warranty expires.

**Parts and Accessories**
Individuals qualified to service their own appliances can have parts or accessories sent directly to their homes (VISA, MasterCard and Discover cards are accepted). Order on-line today, 24 hours every day or by phone at 800.626.2002 during normal business hours.

*Instructions contained in this manual cover procedures to be performed by any user. Other servicing generally should be referred to qualified service personnel. Caution must be exercised, since improper servicing may cause unsafe operation.*

**Contact Us**
If you are not satisfied with the service you receive from GE, contact us on our Website with all the details including your phone number, or write to: General Manager, Customer Relations
GE Appliances, Appliance Park
Louisville, KY 40225

**Register Your Appliance**
Register your new appliance on-line—at your convenience! Timely product registration will allow for enhanced communication and prompt service under the terms of your warranty, should the need arise. You may also mail in the pre-printed registration card included in the packing material.
