

SEL14TC

1.4x Teleconverter Lens

1.4x Teleconverter compatible with select telephoto lenses

Extend your range by 1.4x. Full optical quality and operability are retained ¹, offering outstanding performance for sports or wildlife photography in a compact, lightweight kit. Multiplies focal length by 1.4x with only a 1-stop light loss. Maintain the full image quality and AF performance of the lens, and feature a dust and moisture resistant design for maximum reliability when shooting outdoors. ²

Bullets

- Extends focal length of lens by 1.4x
- Increase focal length without degrading resolution
- A handy tool for minimizing gear
- Compatible with a range of lenses
- Compact alternative to bulky additional lenses

Extend your range by 1.4x

Multiplies the focal length of the lens used by 1.4x without degrading optical performance, AF speed and precision, or operability. Light loss with the teleconverter is approximately 1 stop. An ideal way to extend available focal length range for sports or wildlife photography without having to carry additional large, heavy lenses.
