

12AWG CC EXTENSION CABLES

Our Patented Coastal Connector Extension Cables are the backbone of our systems. These direct burial cables are the toughest, best cables in the world for outdoor lighting and audio. Our original black 12AWG cables ensure limited voltage drop, and are still our recommended cable for large systems and where black is an acceptable cable color. Each high-strand count, marine-tinned wire has a durable PVC jacket and then each pair of wires has a super-thick durable outer jacket. Male and female twist connectors are tested to IP68 standards.
