

CAS1200/4 AMPLIFIER

The CAS1200/4 is a fully DSP-enabled outdoor amplification system delivering a total of 1200W between four channels. This system is designed to be used in exterior wall mount applications for outdoor speaker systems. It comes ready with dual 5P Line Level Inputs. The four programmable channels offer unrivaled control and flexibility.

NOTES:

1. This amplifier ships with the channels preconfigured for the CS speakers ordered with the system.
2. CAS should always be installed in a shady area if possible, and the lid should be fully screwed down to ensure waterproofing.
