## Front Panel Information G1000 Fully Integrated Models

## Custom Panel Installations

Some Miele dishwashers do not come equipped with a front panel. These dishwashers are designed to accept a custom door panel supplied by the cabinet maker. Miele has a unique panel integration system which allows the dishwasher to align with the surrounding cabinets.

Panel size is determined in the following manner:

Width: $\quad 23$ 7/16" in all cases
Thickness: $\quad 3 / 4^{\prime \prime}$ in all cases

Height: Determined using the following calculation:
Panel Height $=$ HTC - TKH
HTC = Height to the underside of countertop
TKH = Toe-kick height

Note: Control panel is along the top edge of the unit. It is not visible when the unit is closed. A handle MUST be located on the front panel in order to open the unit

| Maximum panel height: | $303 / 8^{\prime \prime}$ |
| :--- | :--- |
| Minimum panel height: | $255 / 8^{\prime \prime}$ |
| Maximum panel weight: |  |

## GFVi Panel Installations

Miele offers pre-fabricated stainless steel panels for all fully integrated units. These panels are designed for various toe-kick heights and offer a choice of handle options.
