

ADA Height
Dishwashers

INFINITE FLEXIBILITY, SPOTLESS RESULTS

Already acclaimed for their innovative features, Cove Dishwashers now have ADA height models that provide even greater design and installation flexibility.

INTUITIVE FLEXIBILITY

Every bright green component is an adjustment point. The height-adjustable middle rack and fold-down tines accommodate large pots and tall items.

HIGH-PERFORMANCE CLEANING

Three powerful spray arms and 43 spray jets clean every item expertly; fine-mesh filter traps food and grease for fresher water through every cycle.

THOROUGH DRYING

Every glass, dish, and utensil comes out spotless and dry thanks to the hot rinse and fan assist.

WHISPER-QUIET OPERATION

Operates in near silence that never interrupts.

INTERIOR AESTHETICS

Quality and style meet in a striking stainless-steel interior with a clean, fastenerless design.

LED LIGHTING

Interior LED lights provide greater visibility.

CUSTOMIZED WASH CYCLES AND OPTIONS

Mix-and-match wash cycles and add-on options to customize your cleaning needs.

LEAK PROTECTION SYSTEM

Enjoy peace of mind in the rare event of a leak. A conductivity sensor in the base of the unit will automatically stop a cycle in progress if it detects water outside the tub.

HIDDEN CONTROL PANEL

Dishwasher disappears into the kitchen with a hidden control panel and discreet status light.

NEW

ADAPTABLE FOR ANY HOME AND HOMEOWNER

Standard and ADA height models fit standard openings in both new and renovated kitchens. Handleless designs are achievable for panel-ready models.

ADVANCED CLEANING FOR EVERY ITEM

Cove's cleaning system ensures spotless results with every cycle—yet it's so quiet you won't even know it's running.

DESIGN COHESION

Coordinates perfectly with classic Sub-Zero and Wolf stainless-steel appliances or accepts custom panels to integrate with kitchen cabinets.

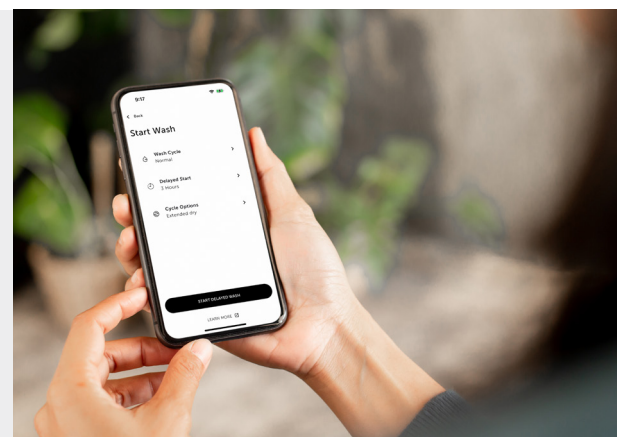

BUILT TO LAST

Made of premium-grade materials, Cove dishwashers are designed to last a minimum of 20 years. Major components are subjected to extreme stress tests prior to assembly, and every major function is tested before shipping.

CONVENIENT OWNER'S APP

Wi-Fi enabled features allow you to remotely monitor cycle progress, start a new cycle, or receive alerts when detergent or rinse aid is low—even receive auto-shipments of new supplies.
