

AP730/735 AeroStyle Compact

AIR PURIFIER

eliminates 99.97 % particulate matter,
viruses & formaldehyde

The H13 and coarse dust filters of the high-performance AP730/735 AeroStyle Compact Air Purifier remove up to 99.97 % of particulate matter and viruses from indoor air. The active carbon filter also eliminates harmful gases like formaldehyde or VOC gases. Its AirFlow 360 technology ensures highly efficient air purification performance with uniform distribution of purified air without causing bothersome drafts. Simultaneously, the large scale and multi-level filter provides consistent and highly efficient air purification. The ideal device for modern living spaces up to 800 ft².

FUNCTIONS

- Highly efficient air purification of particulate matter, viruses & formaldehyde gases
- Revolutionary and highly efficient air purification performance with AirFlow 360 technology
- High-quality sensor system for real-time air quality display
- App and voice control via Alexa or Google

MSRP \$499.99

SKU 8073036 (White)

8073536 (Black)

UPC code 801505030369 (White)

801505035364 (Black)

ADVANTAGES AT A GLANCE

- 360° air discharge for uniform and natural air distribution throughout the entire room, without causing annoying air drafts
- Low power consumption
- Extremely quiet
- High-performance, large-scale and multi-level filters for triple-filtered air purification: H13, active carbon, pre-filter
- Extra power: 5 power settings and Turbo mode for more powerful purification performance
- Automatic mode: automatic protection against increased pollution levels
- Easy to operate & clean
- Made in Germany

Coverage up to 800 ft²

AirFlow 360 technology

99.97% air purification of particles as small as 0.3 microns

Extra power with 5 power settings and Turbo mode

Interactive touch display

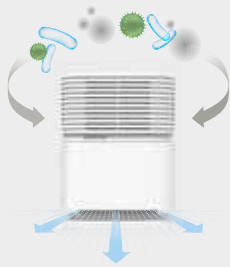

High-quality sensor technology manages air quality

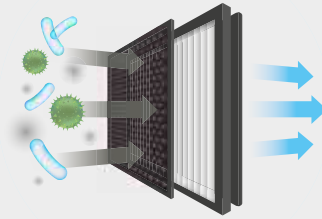

App and voice control via Alexa or Google

The touch display on the top of the AeroStyle Compact enables easy, convenient control. The different operating modes can be activated directly on the device for the desired use of your air purifier. The automatic mode ensures continuous protection against air pollutants, the Turbo mode for more powerful and faster purification performance, and the Sleep mode for whisper-quiet operation in the bedroom. The high-quality sensor technology measures, monitors, and controls air quality in real time when set to PM2.5. The LED light strip can also be used for individual ambient lighting or to display air quality according to the Air Quality Index. The the AeroStyle Compact can be operated and monitored via the app, or through voice assistant using Alexa or Google, thereby ensuring comprehensive monitoring and control of the indoor air quality.

Revolutionary and highly efficient air purification performance with AirFlow 360 technology

Based on the Coanda effect, the AirFlow 360 technology and its 360° air discharge ensures natural air distribution and highly-effective air purification. The air flow glides along the floor of the room and consequently achieves long, pleasant and hardly perceptible air flows that are distributed evenly and naturally in the space.

High-performance filters for triple-filtered air purification: H13, active carbon, pre-filter

With its cube-shaped design, the filter covers a very large filter area to ensure high-performance air purification. In combination with the H13 and active carbon filter, it filters out particulate matter, viruses and harmful gases, such as formaldehyde and VOC gases. The coarse dust filter increases the efficiency and service life of the H13 filter by filtering out airborne particles such as house dust and pet hair.

High-quality sensor system, app and voice control

The sensor measures, monitors, and controls air quality in real time and automatically adapts purification performance to combat the amount of indoor pollutants & allergens. Use the Venta app on your smartphone (free for Android or iOS) to check and adjust the air quality in your rooms – wherever you are. Also available with optional voice control via Alexa and Google.

Model	AP730/735 AeroStyle Compact
Colors	White/Black
Coverage area	up to 800 ft ²
Operation	Touch display, app, and voice control
Measuring sensors	Air quality PM2.5
Filters	H13, active carbon, and coarse dust filters
Power settings	5 + Automatic + Turbo
MSRP	\$499.99

Accessories:

H13 & anti-formaldehyde filter

Scope of delivery:

- 1 AP730/735 AeroStyle Compact Air Purifier
- 1 Filter
- 1 Quick start instruction guide
- 1 Safety instructions
