

ITEM FL2000

POINT-OF-USE FILTRATION SYSTEM

SPECIFICATIONS / KEY FEATURES SUMMARY

NSF/ANSI 42 & 52 Certified
0.5 Micron Carbon Block
0.01 Micron Fiber Membranes
Pathogenic Bacteria/Virus Removal
.55 US Gallon GPM Flow Rate
1500 US Gal/5,678 Liter Capacity
3"x 12" Space-Saving Design

FILTRATION REDUCTION PERFORMANCE

High-Density Carbon Block Reduction Performance

Tested/Certified for the Reduction of .5 Microns Class 1 Particulates . . .
Aluminum - 99.9% Arsenic - 99.7% Cadmium - 99.8% Chlorine - 97.5%
Chromium - 98.6% Copper - 99.9 Iron - 99.9% Lead - 99.5%
Magnesium - 99.9% Mercury - 98.8% Zinc - 99.9%

Ultrafiltration Hollow Fiber Membranes Contaminant Performance

Certified to remove .01 Microns Pathogenic Bacteria/Viruses
Polyphosphate added for Scale-Reduction
