

The super-slim, 8.1 MP DSC-T70 makes a brilliant lifestyle statement in silver, black, white or pink -- with a giant 3.0"¹ Widescreen LCD for simple touch-screen operation and spectacular photo display. Face Detection and Smile Shutter mode help you catch people at their best, the Sony Double Anti-Blur Solution and Carl Zeiss® 3X Optical zoom lens design deliver sharp color images even in low light, and HD Output² lets you share images in high definition on your Sony Bravia® HDTV or other compatible HDTV screens.

- **Design That Makes a Statement**
With ultra-slim body in silver, black, white or pink, the DSC-T70 makes a sleek fit for any lifestyle -- with simplified camera operation with a 3.0"¹ Widescreen touch-panel LCD that replaces function buttons with easy on-screen icons.
- **8.1 MP Super HAD™ CCD**
More megapixels give you more detail and definition when you make big prints or crop in tight on your subject. The advanced Sony® Super HAD™ (Hole Accumulated Diode) CCD design allows more light to pass to each pixel, increasing sensitivity and reducing noise.
- **Carl Zeiss® 3X Optical Zoom Lens Design**
An ingenious Carl Zeiss® lens design provides 3X Optical zoom in amazingly compact dimensions -- and even at full zoom the lens doesn't project beyond the camera body, preserving its ultra-slim styling.
- **The Sony Double Anti-Blur Solution With Super SteadyShot® optical image stabilization and high sensitivity (ISO 3200), the DSC-T70 compensates for shaky hands, minimizes blur and allows flash-free shooting to preserve the mood -- and Sony Clear RAW™ Noise Reduction reduces the picture noise that can ruin low-light shots.**
- **3.0"¹ Widescreen Clear Photo LCD Plus™ Display**
A widescreen display in the palm of your hand! Clear Photo LCD Plus™ design enables the giant 3.0"¹ Widescreen LCD of the DSC-T70 to display photos with superb clarity and color reproduction -- with AR (anti-reflective) coating for excellent visibility even in bright sunlight.
- **Touch-Screen Operation**
The DSC-T70's Widescreen touch-panel LCD replaces small buttons with simple on-screen icons and a user-friendly interface that make camera operation faster and simpler. You can touch any point on screen, in shooting mode, to focus on the person or object you've selected -- and touch and zoom in playback mode to concentrate on your subject.
- **Simple Icon Setup Controls**
To the left and right of the image area on your widescreen display, simple icons allow quick touch-screen operation of essential camera functions. The icons can be switched off to provide a full 16:9 widescreen view of your photos -- and the on-screen Function Guide display helps you learn camera setup operations.
- **Face Detection**
Because the face makes the photo, Sony has created Face Detection technology that recognizes up to 8 faces in a photo and automatically controls focus, exposure, color and flash to bring out the best in everyone. Unlike some competitive systems, Sony Face Detection makes skin tones look more natural and reduces red-eye with pre-strobe flash.
- **Smile Shutter Mode**
In Smile Shutter Mode, the DSC-T70 helps you capture more smiles by shooting automatically when your subject laughs, smiles, even grins. You select the person to watch and the expression to catch -- your Cyber-shot® camera's Face Detection system and intelligent Smile Shutter algorithm do the rest!
- **HD Output²**
Direct HD output² to your Sony Bravia® HDTV or other compatible HDTV screen lets you view DSC-T70 still photos in spectacular clarity and detail. Optional HD solutions include a Cyber-shot® cradle/charger with component cable output and high-speed Picture Station™ Photo Printers that make 4" x 6" prints in about 45 seconds (excluding processing time). (Cradle/charger, and printer sold separately.)
- **Multi-Resizing Function**
The in-camera feature that resizes your photos for any purpose! Standard 4:3 can be resized to widescreen 16:9 and 2 MP for giant-screen HDTV display², images at 16:9 and larger than VGA resolution can be resized to 4:3 VGA for e-mailing (internet connection required) to friends and family, and a simple 4-direction touch-screen control makes it easy to trim photos.
- **Wide Zoom Display**
To use the entire image area of your DSC-T70 Widescreen LCD and compatible HDTV² screens, Wide Zoom automatically expands standard 4:3 images to 16:9.
- **HD Slide Show with Music**
It's the high-definition viewing experience that makes photos more entertaining to watch, accompanied by your choice of visual effects and any of four preset musical selections stored in memory or your favorite music downloaded from PC to your camera for use as background music⁴.
- **9-Point Auto Focus**
Because an off-center subject can make your shot more interesting, the DSC-T70 can measure auto-focus precision at 9 points on your screen -- giving you greater creative freedom to compose your image.
- **D-Range Optimization**
Powered by the exclusive Sony Bionz™ high-speed processing engine, D-Range Optimization preserves image data in bright highlights and reveals more detail in shadows or backlit areas -- for great results even in difficult lighting conditions.
- **In-Camera Retouching**
The DSC-T70 lets you add 8 creative effects to photos after you shoot -- including new "radial blur" effect, "retro" color tint and trimming function along with soft edge filter to soften backgrounds, cross filter to place stary "dazzles" at highlight points, partial color filter to mute surrounding colors, and fish-eye filter to create interesting fish-eye lens effects.
- **In-Camera Red-Eye Reduction**
Irritating "glowing eyes" can ruin even the most creative photos -- so the DSC-T70 provides in-camera correction at the touch of a button to reduce lingering red-eye effect that other systems might miss.

ADDITIONAL FEATURES

- Enhanced Paint Function
- 31 MB Internal Memory.
- Up to 15X Smart Zoom® Feature⁵
- MPEG Movie VX Fine Mode
- Stamina® Battery Power
- Software for Managing Your Memories

Specifications

General

Megapixel: 8.1 MP
 Imaging Device: 1/2.5" Super HAD™ CCD
 Recording Media: 31MB¹ Internal Flash
 Memory, optional Memory Stick® DUO
 Media, optional Memory Stick PRO DUO™
 Media

Convenience

White Balance: Automatic, Cloudy, Daylight,
 Fluorescent 1, Fluorescent 2, Fluorescent
 3, Incandescent, Flash
 Self Timer: Yes (10 seconds, 2 seconds, Off)
 Memory Stick PRO™ Media Compatibility:
 Tested to support up to 8GB Memory Stick
 PRO DUO™ media capacity⁹; does not
 support Access Control security function.
 Still Image Mode(s): Burst, JPEG (Fine),
 Exposure Bracketing
 Red-Eye Reduction: Yes (On/Off all modes)
