ONKYO

ICON SERIES

C-30

CD PLAYER

FOR THE LOVE OF MUSIC

For nearly a century, Onkyo products have been the heartbeat of home entertainment. Discerning AV enthusiasts around the globe trust Onkyo reliability and performance.That history and reliability have been passed down to Onkyo's new CD player, the C-30. The C-30 delivers beautiful, pure sound from a new, sophisticated design case that began with the ICON Series.

FOR THE CD LOVERS

Engineered for discerning listeners, it features Onkyo's exclusive VLSC (Vector Linear Shaping Circuit)—a proprietary technology that removes pulse noise from the signal path using advanced algorithms. The result is a clean, distortion-free analog output revealing every nuance of your music with breathtaking clarity.

A high-precision ±10PPM clock ensures remarkable timing accuracy and a focused, stable stereo image, elevating your listening experience to true high-fidelity standards.

Combined with fan-less design to eliminate noise, premium stereo DAC (32bit / 768kHz) that reduces distortion, and extrusion aluminum heat sink for vibration suppression, this preamp lays a solid foundation for superior sound.

Engineered for exceptional sonic purity, the C-30 boasts a vibration-resistant, aluminum front panel designed to reduce resonance and deliver cleaner playback. The front panel of the C-30 has a sandblasted finish. This retains the texture of the aluminum while reducing gloss and giving it a luxurious feel.

On the rear panel, Hi-Fi-grade RCA, optical, and digital coaxial outputs ensure effortless integration with a variety of premium audio systems.

The C-30 supports playback of CD, CD-R, CD-RW, MP3, and WMA.

SPECIFICATIONS

VLSC	Onkyo's proprietary digital noise reduction circuit, VLSC (Vector Linear Shaping Circuit), removes pulse noise from the signal sent from the DAC chip using a proprietary calculation program to generate a pure analog signal only.
ALUMINUM FRONT PANEL	The front panel of the C-30 has an elegant blast finish. This front panel is made of aluminum, which is highly rigid and minimizes vibration from the speakers.
HIGH-PRECISION CLOCK	The C-30 is equipped with a high-precision ±10PPM clock. Improved clock accuracy enables perfectly focused sound imaging.
QUALITY COMPONENTS	The rear panel features gold-plated RCA terminals, while the front panel features similar headphone terminals. This not only gives it a luxurious look, but also prevents deterioration over time, ensuring the best sound quality for many years to come.
FLAT CHASSIS	The C-30 features a flat chassis designed to thoroughly suppress vibration. This makes it resistant to both internal and external vibration.
VARIOUS PLAYBACK MODES	It features a variety of playback modes, including "random playback," which shuffles the order of songs randomly, "memory playback," which plays songs in your preferred order, and "repeat playback," which repeats all songs or a single song. You can also combine random playback and repeat playback.
