Date calendar

CONVOY CHRONO

Chronograph functions:

1/10th second, 60-second and 30-minute counters

Split timing

Tachymeter scale

All Swiss Army watches are covered by a 3-year warranty

Born for an active life, the new **Convoy** chronograph demonstrates its great functionality at first sight: an oversized 30-minute sub-dial totalizer in a contrasting tone allows immediate visual access to this key feature during short time measurement.

This state of the art Swiss-made quartz chronograph movement allows extremely accurate timing with one tenth of a second precision and split timing capability.

Designed to be worn in all types of situations, **Convoy's** functional ruggedness is achieved by its case dimension and shape, crown protection feature, tachymeter scales, and by its enhanced legibility from large, luminous hands and numbers.

Eight styles are offered in this collection including five chronographs available with red or black dials on black rubber straps or satin and polished stainless steel bracelet, and a silver dial with a titanium case and bracelet. The collection's exceptional durability and legibility are also achieved in a 3-hand version offered in three styles with black or yellow dials on rubber straps or a black dial with a satin and polished stainless steel bracelet.
