covered by a 3-year warranty

SWISS ARMY

Its name says it all: launched in Fall 2006, this sleek, medium sized quartz chronograph collection from Swiss Army has already become a "Classic".

Middle sized with a 40mm case, this collection is a fresh expression of sporty classicism, underlined by a bezel with tachymeter scale and highly legible, oversized sub-dials and hands. And thanks to its extremely accurate Swiss made quartz movement, this chronograph not only measures to 1/10th of a second, it also offers a split time feature ideal for all kinds of sport activities.
