

THE FUTURE OF ICE MAKING IS HERE

Designer Undercounter Ice Maker

SUBZERO

A Higher Standard

The All-New Designer Undercounter Ice Maker

At last, an ice maker with the quality, performance, reliability, and convenient features Sub-Zero is known for. The new Designer Undercounter Ice Maker—designed entirely in-house, from the ground up—offers exceptionally quiet operation, generous production and storage capacity, and easy cleaning with the touch of a button.

Product Highlights

WHISPER-QUIET PERFORMANCE

Innovative MaxQuiet™ technology ensures near-silent operation.

EASY CLEANING

An intuitive, low-interaction cleaning system with a visual floor light indicator makes upkeep simple and stress-free.

CLEARLY BETTER CUBES

The ice maker produces clear cube-shaped ice with a newly designed rounded scoop that optimizes pickup with every pass.

SMART ICE STORAGE

Our patented ice distribution system and ultrasonic sensor monitor ice levels to ensure maximum ice storage—up to 25 lbs.

DESIGNED TO DISAPPEAR

A panel-ready exterior, integrated hinges, and custom toe kick compatibility mean this ice maker will blend seamlessly into surrounding cabinetry.

COHESIVE CONTROLS

The intuitive controls match other Sub-Zero touchscreens and are located on top of the door for easy access and viewing.

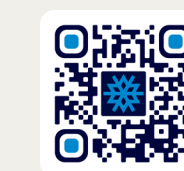

EXTRA PEACE OF MIND

If the unit senses a water leak, it will shut down to prevent further leakage and notify the user through an alarm and in the Owner's App.

ANYWHERE ACCESS

With the Owner's App, the user can update ice production, remotely monitor the unit, adjust settings, and receive cleaning alerts from their mobile device.

 Wi-Fi enabled
