LAUNDRY ASSORTMENT**

ASKO

75 YEARS OF CARE AND INNOVATION

For 75 years, we have been crafting appliances with care, combining timeless design with a vision for the future. From our kitchen heroes to laundry champions, ASKO appliances are crafted to meet the highest standards.

As our story continues to unfold, we remain dedicated to innovation, quality, and sustainability that inspires generations to come.

Thank you for being part of our journey.
Welcome to ASKO.

A UNIQUE LAUNDRY EXPERIENCE IS WAITING TO UNFOLD

The ASKO story began with the invention of a life-changing laundry appliance. Our story is still unfolding, and each new chapter brings new ideas and appliances; new levels of health and hygiene; and new ways of caring for clothes while caring for the world around us.

But even though our story is constantly evolving, certain timeless elements remain—like our passion for innovation, our commitment to quality and craftsmanship, and our respect for timeless Scandinavian design. We will continue combining these elements and keep building laundry appliances that make life easier and better.

It was our passion for innovation that resulted in our unique ASKO Steel Seal™ concept –where steel replaces rubber for a more hygienic wash and a germ-free drum. It was our commitment to quality and craftsmanship that led to Quattro Construction™ 2.0 – our exclusive suspension system that virtually eliminates noise and vibrations. And it was our respect for our proud Scandinavian design heritage that inspired us to create timeless laundry appliances that effortlessly integrate with and enhance their surroundings.

ASKO laundry appliances are always designed to provide something extra – from higher performance and larger loading capacity to greater hygiene and more ease of use. But we have also created an entire range of smart and useful laundry products and accessories that will take any laundry experience to the next level – from drying cabinets to hidden helper shelves and ironing boards that help make the most of any space.

Our state-of-the-art ASKO washing machines and tumble dryers are designed to work in perfect unison and provide the ultimate laundry solution whatever your needs – whether it's machines with a larger capacity for a busy household or a more compact appliance to suit modern urban living. And with high-quality materials and durable construction, ASKO appliances are guaranteed to deliver superior performance for years to come. With ASKO washing machines and dryers, a unique laundry experience is just waiting to unfold.

ASKO laundry appliances built
with care since 1950.

ASKO 5-series washing machine and tumble dryer in a full laundry care solution with Hidden Helper™ and drying cabinet in graphite black.

LAUNDRY PERFECTION

With over 75 years of expertise in crafting innovative laundry care appliances, ASKO knows how to care for clothes the right way. Our Scandinavian Laundry Care 2.0 technology combines advanced wash cycles with precision drying to protect every type of fabric, providing a comprehensive solution for all your laundry needs. Trust ASKO to give your most precious fabrics the delicate care they deserve.

ASKO laundry appliances are engineered to deliver outstanding washing and drying performance with care that protects even your most delicate garments. In the washer, Active Drum™ technology gently moves clothes to the center for balanced tumbling and minimal fabric wear. The Pro Wash™ system ensures deep, even detergent penetration, while programs like Stain and Quick Pro Cotton adapt to your garments and schedule. For drying, ASKO's exclusive Butterfly Drying™

with Bundle Guard prevents tangling by gently reversing drum direction—keeping garments evenly separated and ensuring a consistent dry, every time. From intelligent detergent dosing to extra rinse sensors, every detail is designed to treat your clothes with precision and care. Designed in Sweden and crafted in Europe, ASKO laundry systems give you premium performance—without compromising the longevity or feel of your favorite fabrics.

INSPIRED BY SCANDINAVIA

At ASKO, thoughtful design goes beyond aesthetics—it's about creating appliances that are intuitive, durable, and made to enhance everyday life for years to come. Inspired by Scandinavian design principles of functionality, simplicity, and user-centered thinking, ASKO adds a distinct layer of generosity to its design language.

This generosity is evident in the tangible details: generously sized jog dials, clearly legible display text, and a wide range of thoughtfully developed programs and functions that give users true freedom of choice.

Durability is at the core of ASKO's philosophy, and it shows in the material choices. By incorporating a high proportion of metal, both inside and out, ASKO ensures not only superior longevity but also a sense of quality that's felt with every touch. The use of metal contributes to sustainability by reducing the need for replacement, and it lends each appliance a timeless, enduring appearance. Tap on the surface of an ASKO washing machine and you'll feel the difference.

Equally important is ease of use. ASKO's design coherence creates a seamless and intuitive user experience, reducing complexity through consistency. Key design elements, like the ASKO action color, guide the user toward key interaction points. The user interface is structured with clarity in mind, presenting menus from left to right with unified layouts that make navigation straightforward and familiar across the product range.

Altogether, ASKO's laundry appliances embody a design philosophy that balances enduring materials with intelligent simplicity. They are built not only to last, but to be understood, appreciated, and relied upon—year after year.

DESIGNED FOR YOUR WELLBEING

ASKO's laundry solutions prioritize health and well-being with innovative features that deliver a cleaner, more hygienic wash every time. Ideal for allergy sufferers, ASKO appliances offer specialized steam programs that effectively reduce allergens and bacteria. With a full suite of products—including washing machines, tumble dryers, Hidden Helpers, and drying cabinets—ASKO provides a complete laundry care solution focused on cleanliness, health, and peace of mind for you and your family.

At ASKO, we believe that true cleanliness goes beyond spotless clothes—it's about creating a healthier home. That's why our laundry appliances are packed with smart features that support your wellbeing, every single day.

Take our Steel Seal™ door, for example. By removing the rubber bellow, we've eliminated a major source of bacteria build-up. The result? A drum that stays cleaner and more hygienic—with 95% less bacterial growth than traditional machines.

For those with allergies or sensitive skin, our Auto Super Rinse function adds up to two extra rinses when it detects detergent residue—helping

to protect your skin without wasting water. And our Anti-Allergy programs are proven to kill 99.99999% of bacteria while rinsing four times to remove every last trace of allergens.

Our Steam Disinfection option delivers a deep hygienic clean, even at low temperatures, while the Drum Cleaning program helps keep your washer fresh inside—cycle after cycle. And thanks to our durable stainless steel inner and outer drums, ASKO machines maintain their performance and hygiene over time.

It's all part of our commitment to creating appliances that don't just care for your clothes, but care for you and your family too.

ASKO LAUNDRY CARE SYSTEM

Space saving laundry with family size capacity

Our XL washers and dryers can fit up to 26.5 lbs laundry. You can fit one king comforter in our 3 series and two king comforters in our 5/7 series washers and dryers. The higher capacity means fewer wash loads. The larger drum space also ensures less wrinkles and tangling of clothes, giving you optimum wash performance.

Space saver

The ASKO Laundry Care System fits seamlessly into less than 8 square feet (0.76m²). Perfect for compact living, it delivers full-scale functionality without compromising on space, so you can enjoy more room to live.

Customize your perfect laundry setup

Whether you need washing, drying, ironing, or folding, ASKO lets you combine appliances and accessories to suit your lifestyle. Design your ideal system with modular flexibility and innovative solutions like Hidden Helpers.

Care for all your garments

From delicate silks to everyday cottons, ASKO's advanced laundry technology ensures optimal treatment for every fabric. Protect your wardrobe with systems engineered for precision, performance, and lasting garment care.

A LAUNDRY SOLUTION THAT FITS ANY HOME

We all need space. Especially at home. It helps us relax and gives us a sense of freedom. Our ASKO laundry solutions are designed to integrate effortlessly with your home. So even when space is at a premium, our laundry appliances can be combined in a way that allow you to enjoy a premium laundry experience and more room to live.

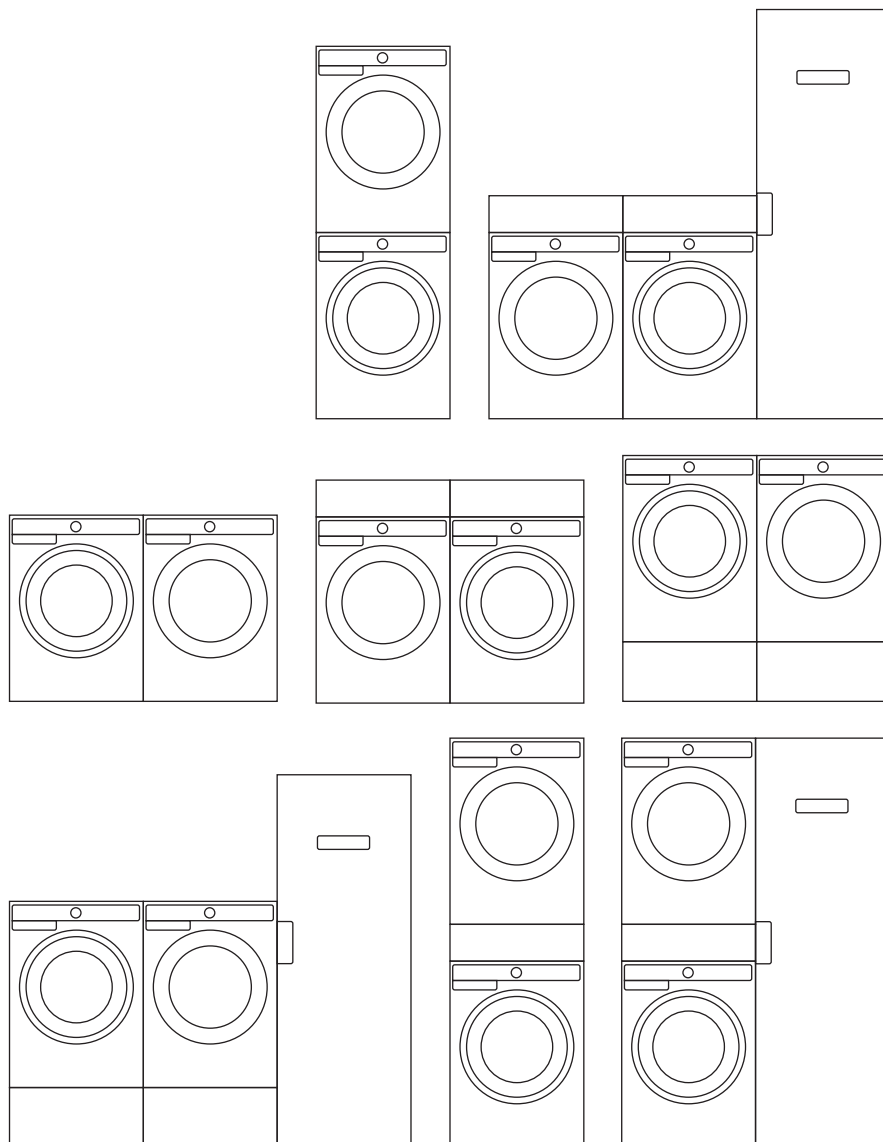

ASKO 7-series washing machine and tumble dryer in a full laundry care solution with Hidden Helper™ and drying cabinet in white.

8 square feet solution

When considering a complete laundry system, one of your main concerns will undoubtedly be how much space you will have to sacrifice. Well, with ASKO home laundry systems, the exact answer is 8 square feet. This means everyone has space for a complete ASKO laundry care system, whether you live in a modern city apartment or a traditional house.

And now you know how much space you need, all you have to do is decide which ASKO appliances you want to fill your space with. With ASKO laundry care, you can combine an ASKO washing machine, tumble dryer, drying cabinet and ASKO Hidden Helpers to create your very own unique laundry system that comfortably and conveniently fits into a space of less than one square meter. So whether it is washing, drying, ironing or folding, you can create your own compact laundry experience that makes the most of your living space while making your life easier.

SHAPING A HOME: AESTHETICS AND FUNCTIONALITY IN A PERFECT BLEND

Lotta Agaton, a renowned interior designer, shares her insights on balancing aesthetics and functionality, the importance of understanding client needs, and her approach to sustainability.

What are the most important things to consider when choosing products for your home or a project?

I always try to satisfy both aesthetics, quality, and functionality and would never choose a product that only has one of these aspects. It is equally important that it is a good product and that it helps create a beautiful environment. When you have worked a lot with all the details in, for example, a kitchen, the products become extremely important and the finishing touch. I always want them to blend in and become one with the interior.

I have recently discovered ASKO and have used the products in one of our latest kitchen projects, and both we and the customer are very satisfied, so I will continue with that. I like the minimalist expression, and you can feel that it is of very good quality.

How do you balance aesthetics with functionality?

I try not to have to balance but simply use products that have both and everything I am looking for in that particular project.

Are there specific design trends that have inspired you?

I am a fan of the understated and minimalist, quality and luxury that does not need to shout it out but that feels and lasts over time.

How is the design adapted to different environments and customer needs?

It is very important to listen to the customer's needs. For example, if it is a family that does not cook much, you do not need to choose the most advanced steam oven. But when it is customers who love to cook, it is fun to be able to design really good products with functions that can enhance the cooking experience. Or if it is mostly washing children's clothes in a large family, you might choose two simpler washing machines with good quick programs, while a person who has a lot of fine materials that they want to be able to wash needs a completely different and more advanced washing machine. I do not just want to choose the most expensive because the customer might afford it but really listen to what their needs are so that they get the product that suits them best. Then I always try to synchronize and not have too many different materials, and then you want to match the kitchen products as well.

How do you work with sustainability in the choice of materials and production?

For me, sustainability and environmental thinking mean choosing good quality and an appearance that lasts over time. If we are honest, it is not good for the environment to buy something new, but if you have to, it is important to choose something you will not want or need to replace soon again.

What trends do you see in design and functionality for the future?

I believe and hope that we will continue to see more durable and sustainable materials and appearances. That there will be less "funny" design. For me, it is not sustainable to design, for example, an orange kitchen that you will most likely get tired of within a few years.

ASKO 5-series washing machine and
tumble dryer in graphite black.

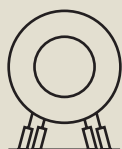

STEEL SEAL™ WASHING MACHINE

Hygienic Steel Seal™

95% less bacterial growth* with our unique door seal

Quattro Construction™ 2.0

Built like a professional for long-lasting performance

THE MOST HYGIENIC WASHING MACHINE

At ASKO we have always focused on creating products that care, and which make life better for those who use them. Part of this focus has been designing products that are asthma- and allergy-friendly.

ASKO motorized door lock.

ASKO Active Drum™.

QUATTRO CONSTRUCTION™ 2.0

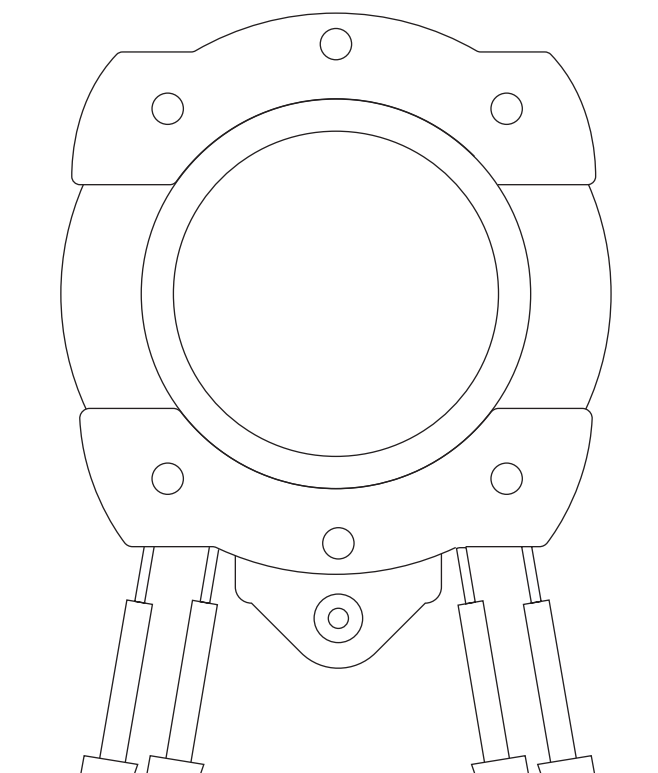

Stable, long-lasting performance with reduced noise and vibrations

When we build our washing machines, we optimize every single component in terms of performance, hygiene, and sustainability. This attention to detail is exemplified by Quattro Construction™ 2.0 – our exclusive washing machine suspension system that virtually eliminates noise and vibrations to create an altogether more pleasant environment. Reinforced feet and a reinforced steel bottom plate ensure consistently solid contact with the floor while the reinforced top cover reduces noise and vibration more effectively than ever before. The drum, door and damper system combine to ensure unbeatable stability, including minimizing any large movements

of the drum which are often caused by heavy loads. There is also a motorized door lock which centers and closes the door tightly while reducing any noise from the lock itself. With Quattro Construction™ 2.0, an innovation from the professional/commercial laundry world has found its perfect place in the home.

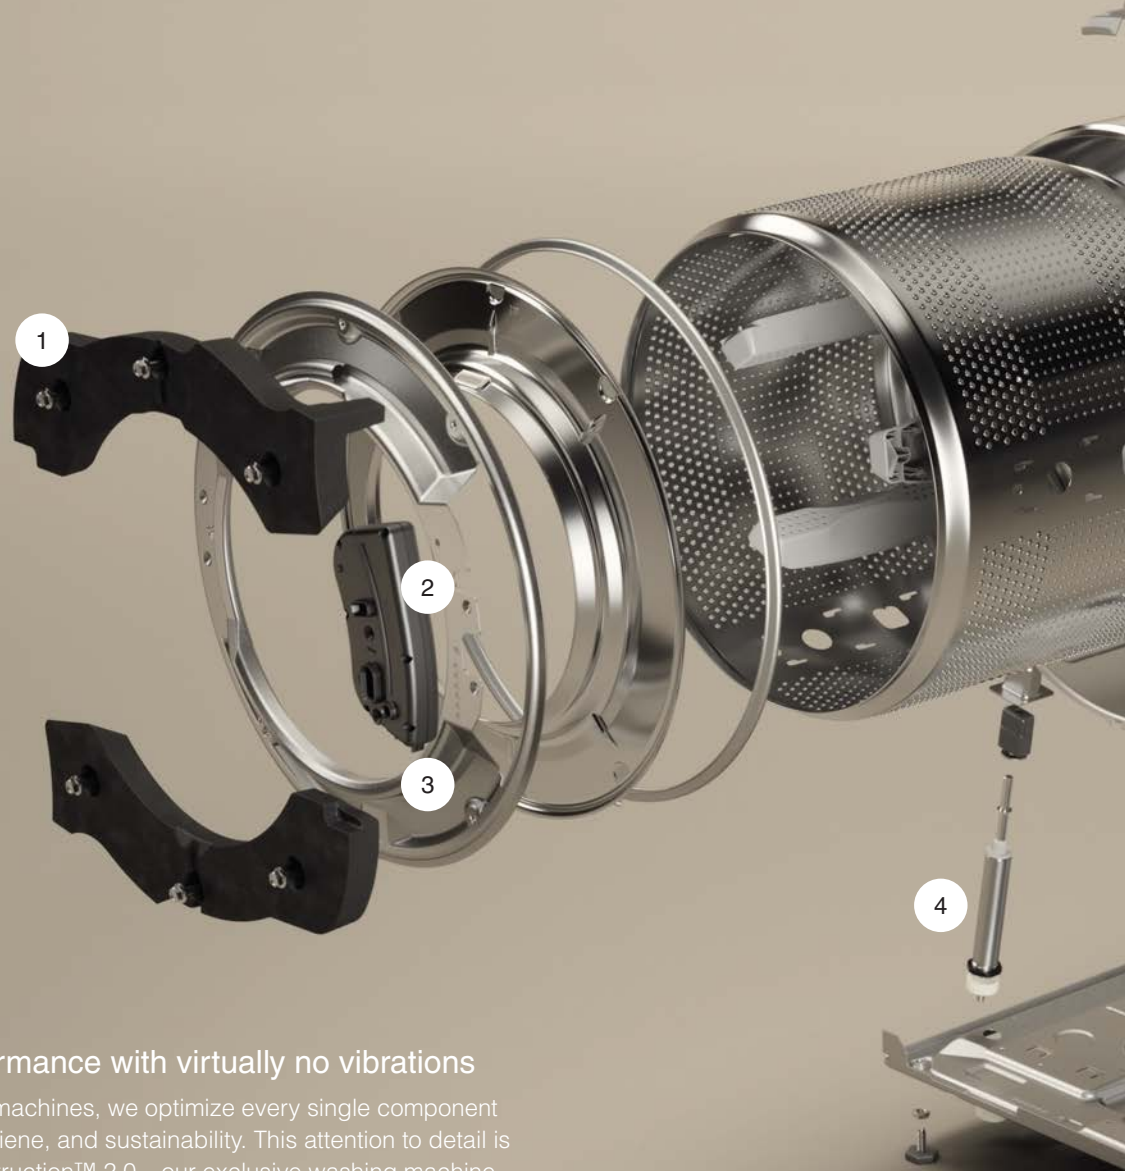

The new Quattro construction 2.0 have enabled us to decrease the sound level during spinning with up to 5dB(A).

Available on W3L, W5XL, W7XL

QUATTRO CONSTRUCTION™ 2.0

Stable, superior performance with virtually no vibrations

When we build our washing machines, we optimize every single component in terms of performance, hygiene, and sustainability. Available on W3L, W5XL, W7XL

8. Improved sound insulation
The housing has been improved with better sound insulation keeping the noise at a minimum.

Available on W3L, W5XL, W7XL

STEEL SEAL™

For an extremely hygienic wash and a germ-free drum

Over time, the rubber bellows in washing machines trap dirt, grime, and mold to become a breeding ground for bacteria. ASKO Steel Seal™ washing machines don't have that problem as they are the only residential washing machines in the world without a conventional rubber bellow. Steel Seal™ ensures an extremely hygienic wash cycle and a clean, germ-free drum that will stand the test of time. As well as improving hygiene, Steel Seal™ makes loading and unloading clothes easier. It is

features like Steel Seal™ that have resulted in ASKO washing machines being awarded the prestigious Sensitive Choice award by the National Asthma Council Australia for their asthma- and allergy-free design. This means ASKO washing machines are as kind to your allergies as they are to your clothes.

Available on all models

95 percent less
bacterial
growth*

Our ASKO Steel Seal™ washing machines are clinically proven to show up to 95% less microbiological growth inside the drum and on the door when compared to traditional washing machines with rubber-bellows.

*Independent testing by Mikrobiologija Avberšek (Slovenia)

Awarded by Sensitive Choice
We have been recognized for our work
in designing asthma- and allergy-free
products by the National Asthma Council
Australia who recently presented ASKO
washing machines with their prestigious
Sensitive Choice award.

**SENSITIVE
CHOICE**

STAINLESS STEEL INNER AND OUTER DRUM

WITHSTANDS HIGHER SPEEDS AND TEMPERATURES FOR LONG-LASTING PERFORMANCE

MORE STEEL - LESS PLASTIC

High levels of performance, hygiene and durability are essential for a world-class wash. And this can all be achieved with the right choice of material. In all ASKO washing machines, both the inner and outer drums are made from high-quality stainless steel instead of plastic – as plastic attracts dirt and ages faster at high temperatures. By using high-quality stainless steel, ASKO machines can spin at higher speeds and withstand higher temperatures without aging – higher temperatures also help disinfect the machine. The result is higher levels of performance, hygiene and durability, so you can enjoy a fresh machine for years to come.

Available on all models

HIGH TEMPERATURE

High temperature is very important to get dirty clothes clean – especially valid for bed clothes and underwear. ASKO has a high heater power of 2.2kW in order to heat the water fast and the Extra hot temperature option takes the temperature up to 194°F.

Available on all models

HIGH SPIN SPEED

Set the spin speed according to your needs! ASKO washing machines have a max spin speed of up to 1600 rpm (W3L). A high spin speed is the cheapest and fastest way of drying laundry! A spin speed of 1600 rpm halves the drying time and energy consumption in the dryer compared to a spin speed of 800 rpm.

Available on all models

Stainless steel inner and outer drum.

AQUA SAFE PLUS**Guards against leaks for a worry-free wash**

Aqua Safe Plus detects if the water level is too high, too low or if there is a leak and automatically activates the anti-block drain pump. It also features foam detection and a fully sealed bottom plate to avoid leaks. This, combined with the Quattro Construction™ 2.0 motorized door lock, means you can make your ASKO washing machine an integral part of your home without worrying about water damage.

Available on W3L, W5XL, W7XL

SENSI SAVE 2.0**Enjoy a superior wash that saves time, water and energy**

Sensi Save 2.0 is an eco-friendly innovation from ASKO that adapts the wash cycle based on the size of the load and the fabrics being washed. This innovation enables ASKO washing machines to deliver beautifully clean clothes while using the lowest amount of water and energy possible. It also saves time as the wash will only ever last as long as necessary. Clean clothes, clean conscience and no compromise.

Available on all models

ACTIVE DRUM™**Beautifully balanced performance that's better for your clothes**

ASKO washing machines are packed with innovative design features that better clean and care for your clothes. Our unique Active Drum™ design gently guide your garments to the center of the drum. This ensures better balance, improved performance and a better rinse with minimal wear on fabrics. The lifters also guide any gravel and dirt to the larger holes at the edge of the drum.

Available on all models

PRO WASH SYSTEM**Treat your clothes to a professional wash at home**

Inspired by professional/commercial laundry appliances, the ASKO Pro Wash™ system, circulates water and detergent from the bottom of the drum to the top. Dual nozzles ensures the load is soaked faster and the detergent dissolves quickly and effectively. With the Pro Wash™ system, short cycles can deliver superb results while even very large loads are guaranteed to be washed and rinsed thoroughly.

Available on W7XL

ASKO 7-series washing machine in white with full touch TFT display.

FLEXIBLE IN-DRAWER AUTO DOSE™

A perfect wash with no waste – every time!

ASKO's new auto dosing system includes two detachable tanks, which can be used for detergent and/or fabric softener. Each tank has a sensor that lets you know when your detergent or fabric softener is running low and approximately how many wash cycles you have left. With our flexible new in-drawer Auto Dose™, you can enjoy superior cleaning results without overdosing, which reduces consumption and environmental impact.

Available on W3L, W5XL, W7XL

SUPER RINSE

Rinses off all detergent!

The machine adds two more rinses to default number of rinses (up to seven rinses).

Important for people with sensitive skin. This is especially important if you have soft water.

Available on all models

ECO CONNECTION

For a more sustainable use of your water and energy water supply

The ECO connection allows you to utilize both the hot and cold water supply in your home. ASKO washing machines automatically adjust the amount of hot or cold water needed and lets you save almost 60% of the washer's electrical energy consumption. ECO connection is ideal for households with an environmentally friendly and economic source of hot water such as district heating, solar panels or a heat pump.

Available on W7XL

AUTO RINSE

With the Auto Rinse option, you will always have your clothes rinsed well. At the same time, it saves water when extra rinses are not needed

A turbidity sensor is measuring the degree of particles in the process water and automatically adapt the program accordingly by adding an additional rinse step if necessary. It will add maximum two additional rinse cycles – meaning approximately 30 min program time. But it will never exceed the total number of seven rinse steps.

This function can be turned on/off as you please.

Available on W7XL

ASKO Auto Dose™

DISCOVER A RANGE PROGRAMS DESIGNED TO SUIT YOUR LIFE

Today, everything is becoming more personalized, and our experiences increasingly tailored to suit our needs and lifestyles. So why should we expect anything less from our laundry experience. Whether you need a short but effective wash when your schedule is busy; an anti-allergy wash that is kind to sensitive skin; or you want a program that cares for your machine as well as it cares for your clothes, ASKO washing machines have a wide range of programs to take care of any stain, color or fabric.

ANTI-ALLERGY PROGRAMS

Pure performance and peace of mind for allergy sufferers

When people with sensitive skin use ASKO washing machines, we want them to be able to enjoy peace of mind as well as spotlessly clean clothes. To help them do this, we have created a range of programs for those suffering from allergies or asthma. Our Anti-Allergy programs for cotton and synthetics are highly effective and are guaranteed to kill dust mites at 140°F. They also rinse the machine four times to ensure that all traces of mites are removed with the water. ASKO anti-allergy programs are guaranteed to kill 99.99999% of bacteria. This is bad news for bacteria, but good news for allergy sufferers and good news for your clothes.

Available on W5XL, W7XL

STAIN PROGRAM

Adapts your wash so no stains remain

Stains come in all shapes and sizes. And too often, they happen beyond our control. But that doesn't mean we have to stand helpless as a new stain makes itself known on our favorite garment. Our highly effective ASKO Stain program is the smart and fast way of taking care of stains. It matches the type of stain to the fabric for the best results. For example: to successfully remove blood stains, you need a cold wash first. The program then rinses three times. With the ASKO Stain program, you can take care of red wine, blood, grass, blueberries, butter, grease, chocolate, coffee, tea, eggs and other dairy products and much more.

Available on W7XL

SMALL LOAD OPTION PROGRAM

A solution that takes great care of small bundles

When people picture laundry day, they often envisage a mountain of clothes on the kitchen floor. Of course, that's not always the case. Sometimes, we find ourselves with only an armful of clothes – but which still need to be washed. This is where the ASKO small load option is the perfect solution. Specially designed for loads lighter than 5.5 lbs, the small load option adapts all machine settings to suit the size of the wash. The result is beautifully clean clothes without using too much water, energy or time.

Available on W3L, W5XL, W7XL

QUICK PRO COTTON PROGRAM

Takes care of clothes without taking up precious time

No matter how well you plan, sometimes, there are just not enough hours in the day. Thankfully, when it comes to ASKO's Quick Pro Cotton program, you only need an hour – or less. As the name suggests, our Quick Pro Cotton program is a fast program that effectively takes care of clothes without taking up precious time – or energy. The program washes with a gentle tumbling and a lower spinning rate before rinsing the load three times. A 8.8 lbs load at 104°F only takes 50 minutes while a 140°F load only takes 59 minutes. With our Quick Pro Cotton program, you can take care of clothes and make the best use of your time.

Available on W3L, W5XL, W7XL

DRUM CLEANING PROGRAM

Designed to do all the hard work for you

To ensure that your washing machine delivers the kind of results you expect from an ASKO appliance, you must keep the machine clean. But don't worry, we designed a program for that. Our ASKO washing machine cleaning program effectively removes bacteria and detergent residue from the drum, hoses, detergent compartment and drain pump – all you have to do is add a little detergent – possibly vinegar – and press start. The program is run without laundry, runs on high temperature and uses extra rinses. The program runs for 107 minutes, and the washing machine even sends a reminder to run the program after every 40 cycles. The result is a clean machine, clean clothes, more hygiene and an appliance that lasts a lifetime.

Available on all models

STEAM DISINFECTION PROGRAM

Superior levels of hygiene and care for sensitive fabrics

When we develop ASKO washing machines, we want to ensure that all clothes and fabrics can enjoy the same levels of hygiene and cleanliness – even fabrics that can't withstand high temperatures. For those fabrics, we created the disinfection option. The disinfection option runs at 104°F but adds a steam cycle to successfully remove germs and bacteria. So, no matter what garment or fabric you want to wash, it can enjoy ASKO levels of hygiene and care.

Available on all models

ASKO 5-series washing machine in graphite black.

Available on 7-series

BUTTERFLY DRYING™ WITH BUNDLE GUARD™

A GENTLE, EVEN DRYING EXPERIENCE THAT ELIMINATES BUNDLING

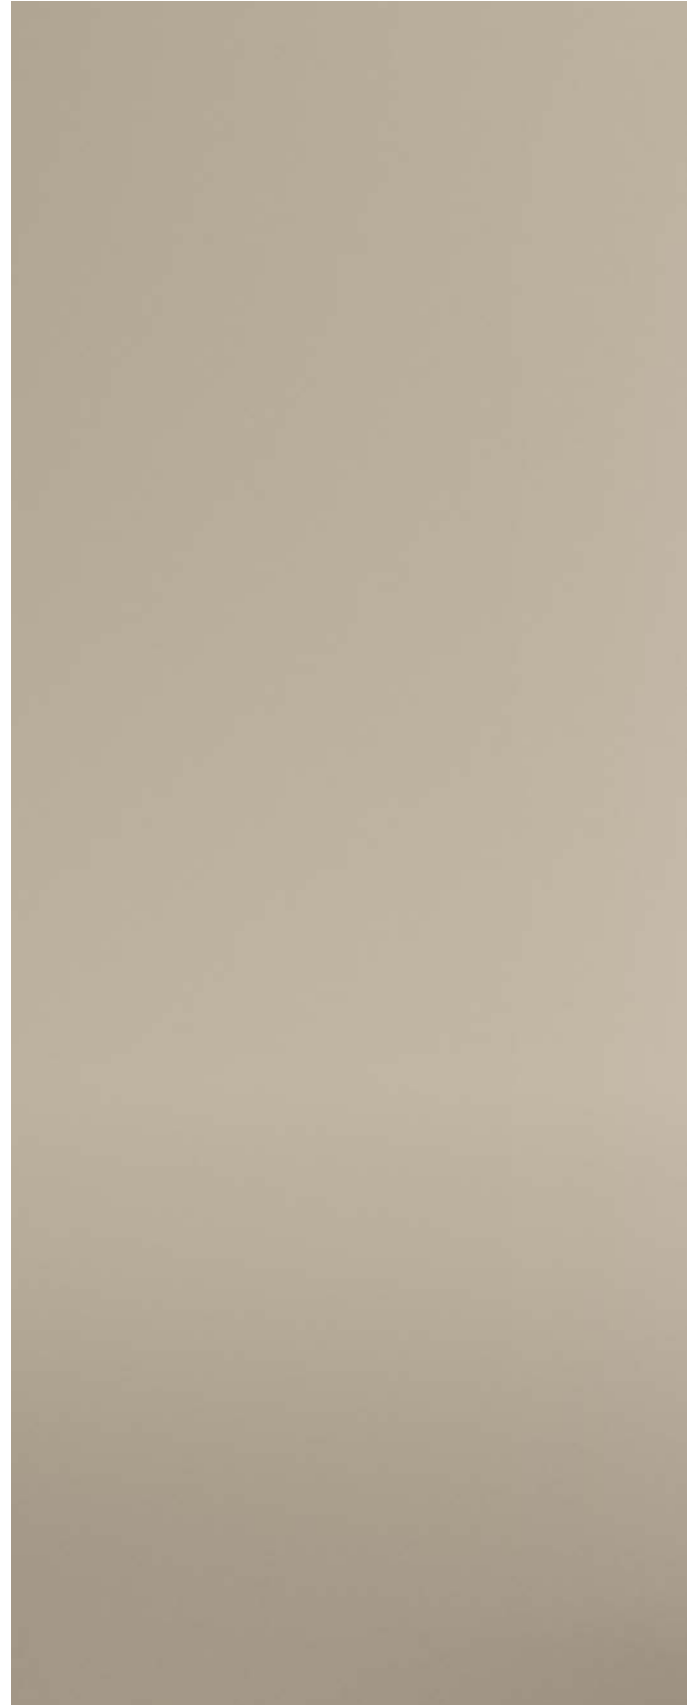

Clothes bundling in the tumble dryer is a huge inconvenience. First, you have to waste time untangling the wet clothes from the bundle and then waste energy running the program again. To eliminate bundling, ASKO tumble dryers feature Butterfly Drying™ with Bundle Guard™. With Butterfly Drying™, the paddles in the drum gently tumble the clothes in a figure 8 to create space between the garments, which lowers the chance of bundling. However, if bundling does occur, the Bundle Guard™ detects it through low humidity levels and changes the direction of the drum for 30 seconds to resolve the bundle before returning to the normal direction. If low humidity levels remain, this process is repeated. By reducing or resolving bundling, Butterfly Drying™ with Bundle Guard™ also reduces drying time, wear and tear on fabrics and energy consumption. It also ensures that your clothes dry more evenly and that you don't waste any more time trying to 'unbundle the bundle.'

Available on all heat pump models

ENVIRONMENTALLY FRIENDLY REFRIGERANT

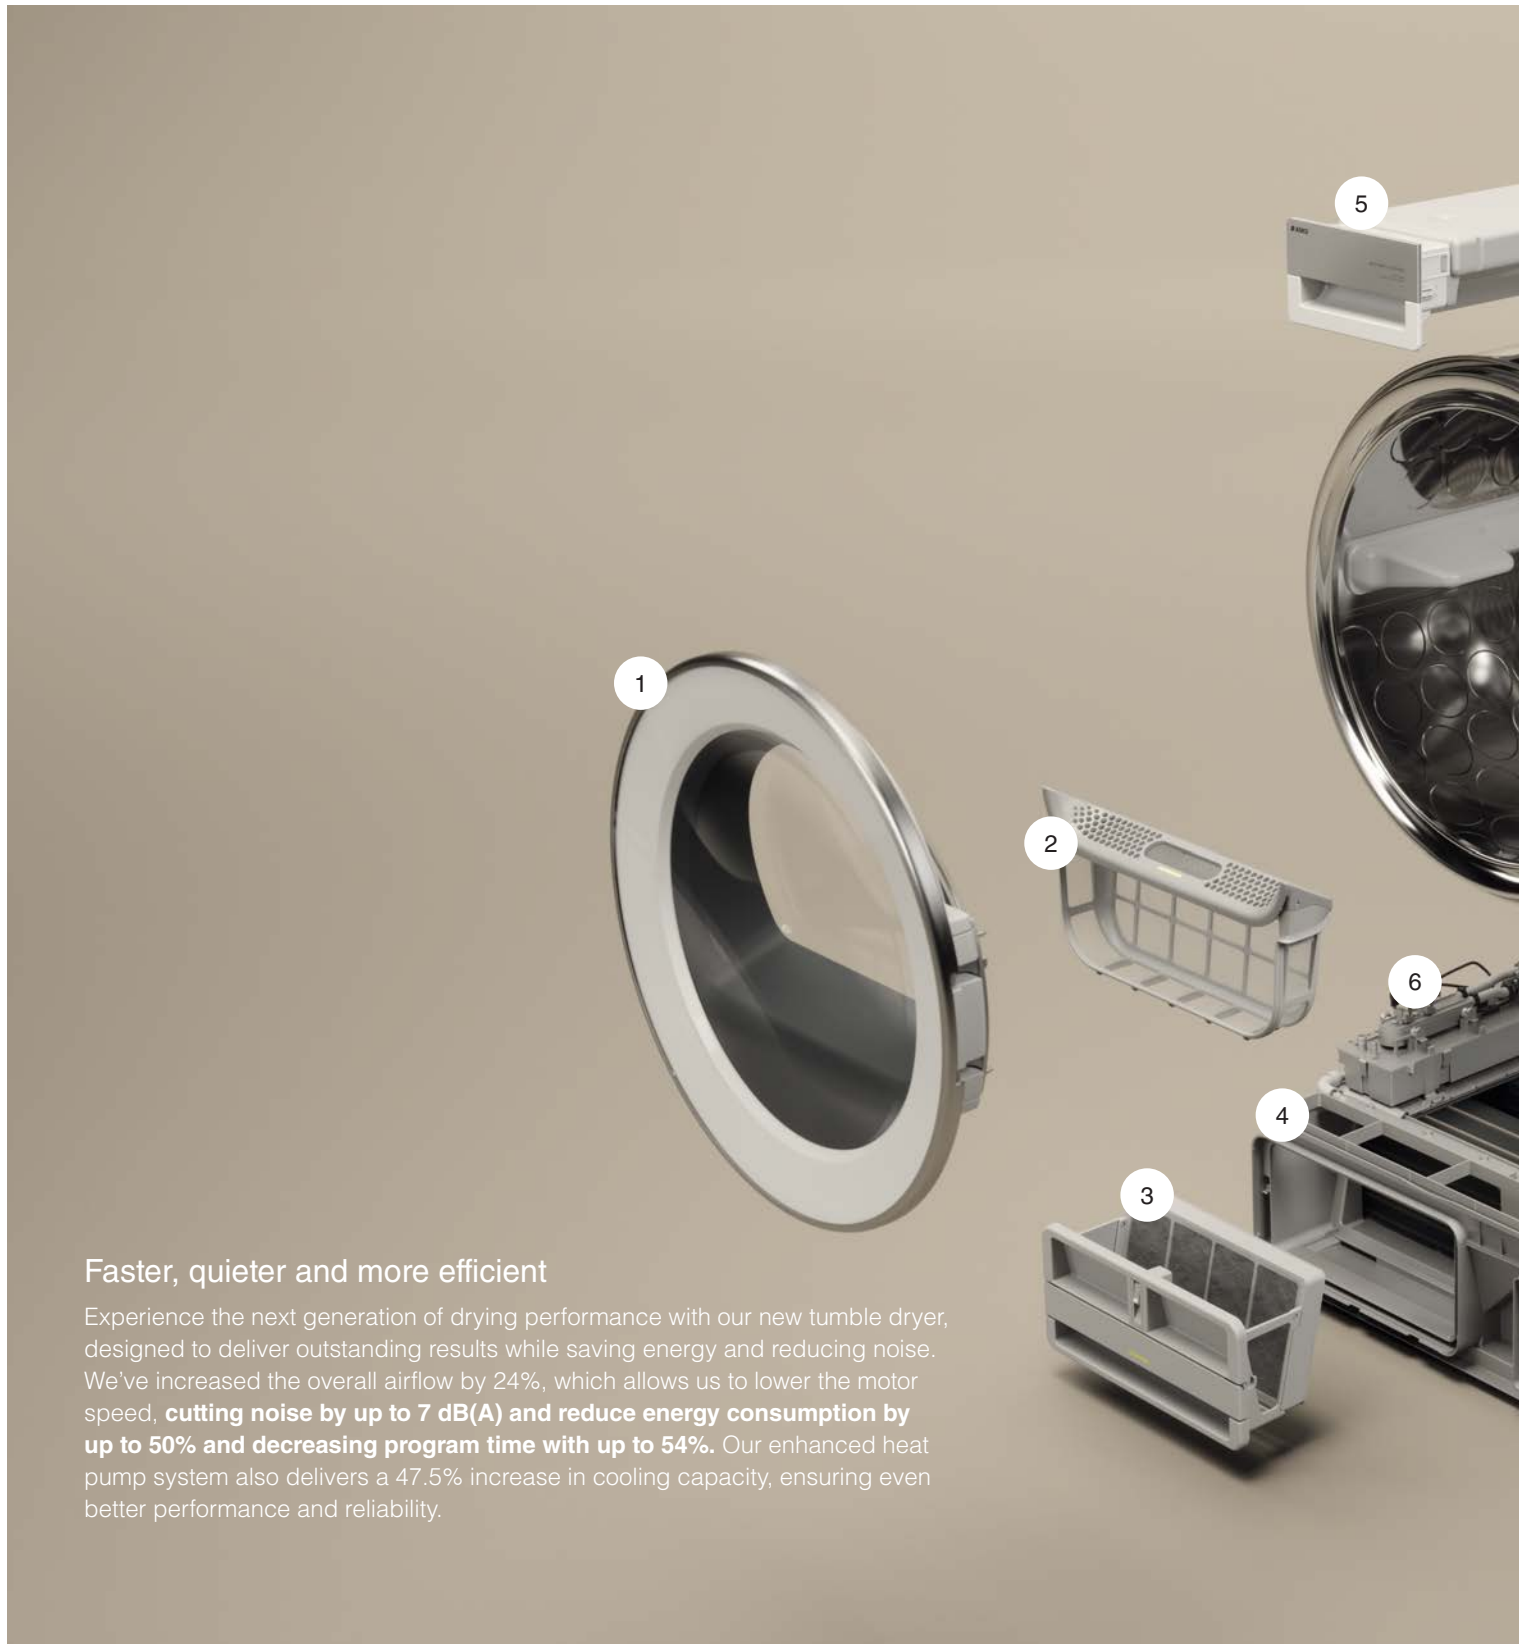

ASKO uses a very environmentally friendly refrigerant called R290. R290 is a high purity propane that is extremely useful as a refrigerant. It is used in medium and low temperature refrigeration and air conditioning systems as an alternative to HCFC refrigerants. The use of the R290 has a low environmental impact and excellent thermodynamic performance. R290 is non-toxic and has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. R290 contains neither fluorine nor chlorine, R290 is an environmentally friendly and future-proof solution.

Available on all heat pump models

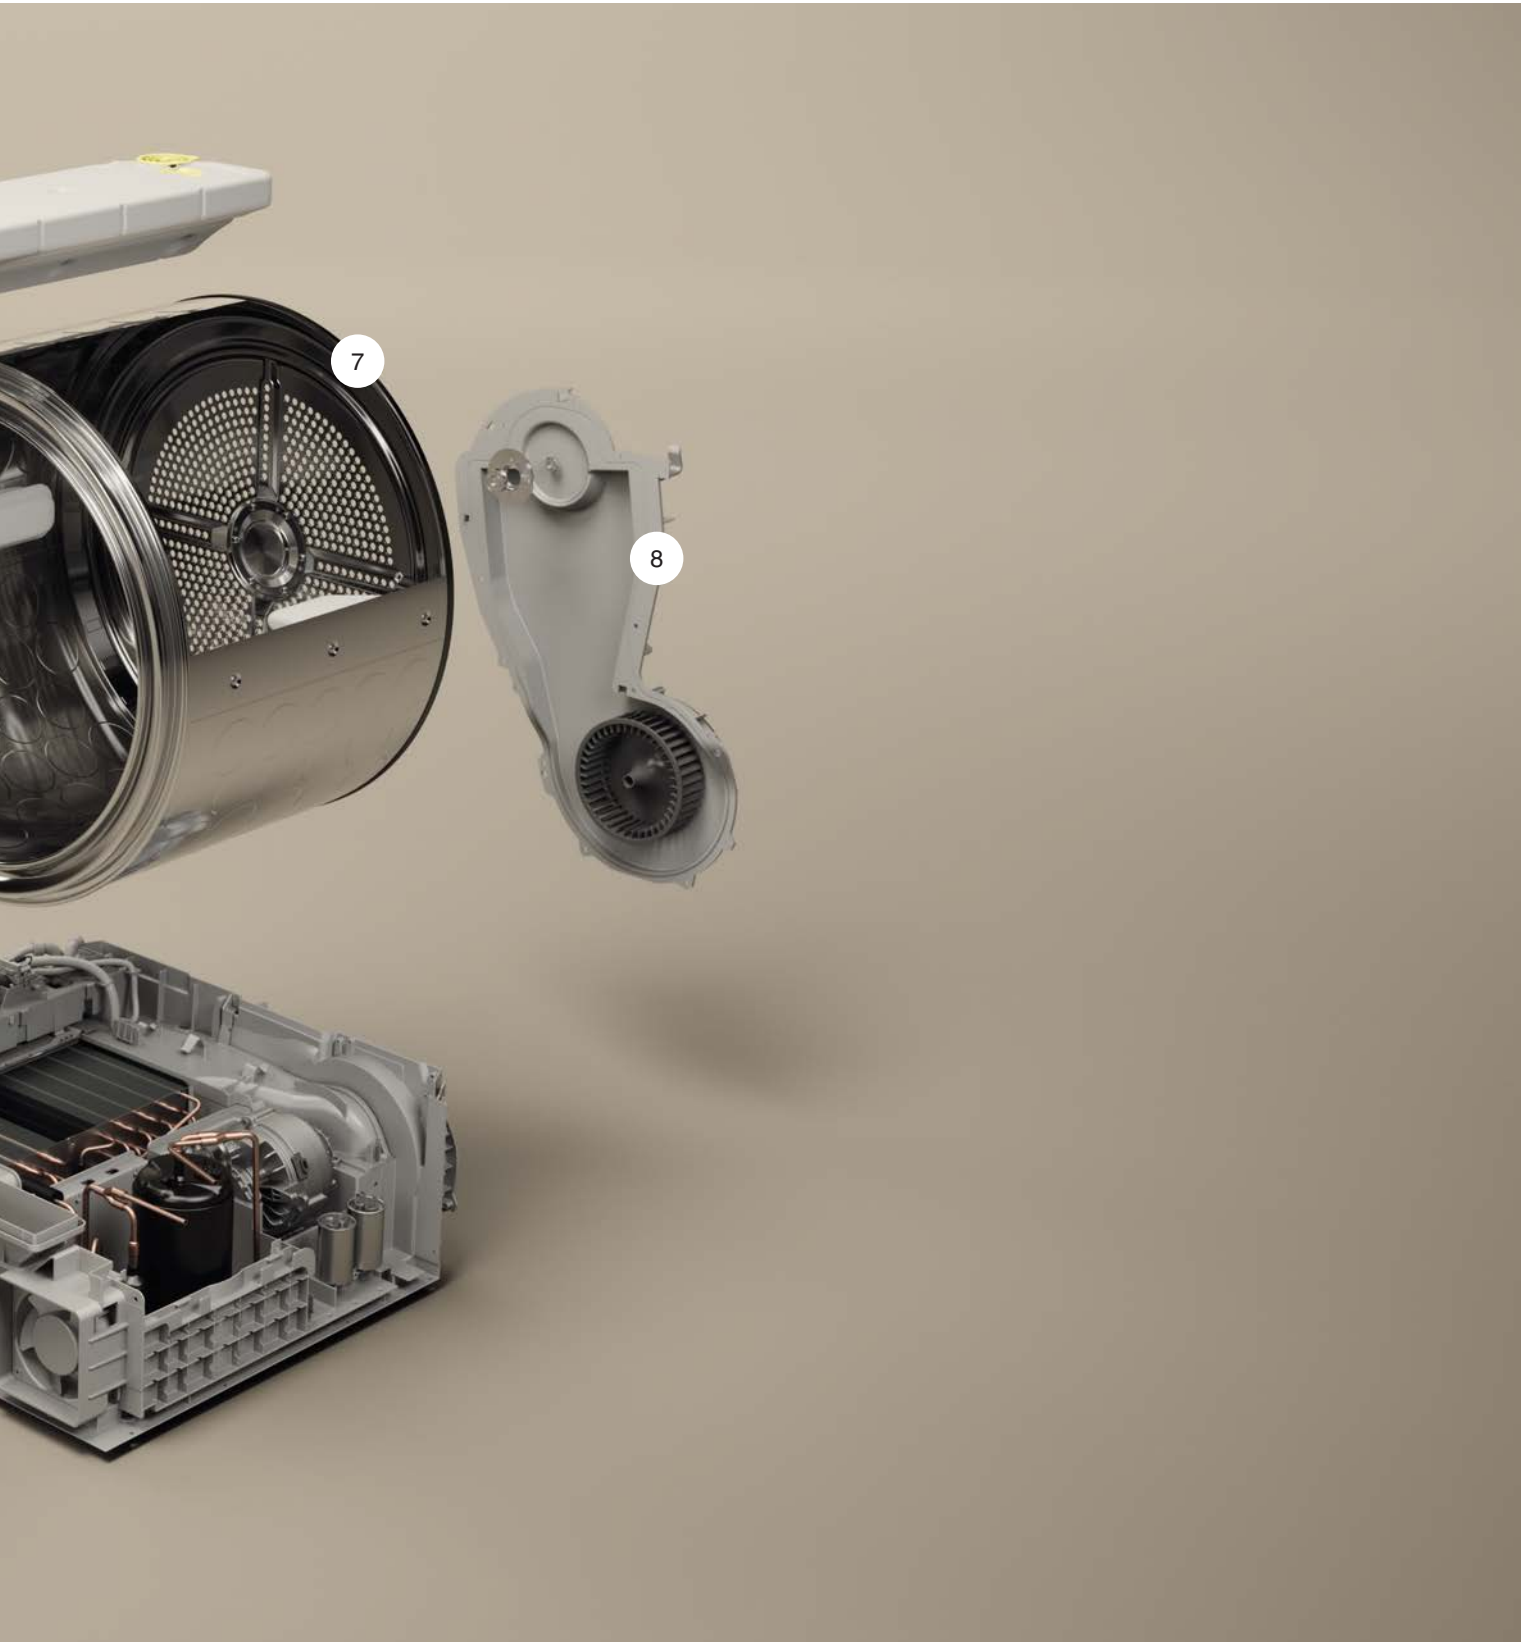

ASKO 7-series heat pump tumble dryer in white.

Faster, quieter and more efficient

Experience the next generation of drying performance with our new tumble dryer, designed to deliver outstanding results while saving energy and reducing noise. We've increased the overall airflow by 24%, which allows us to lower the motor speed, **cutting noise by up to 7 dB(A) and reduce energy consumption by up to 50% and decreasing program time with up to 54%**. Our enhanced heat pump system also delivers a 47.5% increase in cooling capacity, ensuring even better performance and reliability.

6. **Steam generator**
The excess water is collected, filtered and re-used for our steam programs.
- Available on 7-series heat pump models

7. **Improved hole pattern for increased airflow**
We have improved and enlarged the hole pattern in the back of the drum by more than 30 percent to increase air flow.
- Available on all heat pump models

8. **Improved back panel**
The improved back panel have been designed to reduce turbulence and vibrations, for quieter operations.
- Available on all heat pump models

MULTI FILTER SYSTEM

Your three lines of defense against lint

It may not look like a big problem, but lint is actually a tumble dryer's worst enemy. If lint gets trapped inside sensitive parts of the dryer, it will lead to longer drying times, higher energy consumption, and unnecessary wear and tear. ASKO tumble dryers offer three lines of defense against lint in the form of the ASKO multi filter system. The ASKO multi filter system features a door filter with a mesh filter and lower lint filter that features one foam filter and one mesh filter.

Combined, these three filters effectively trap lint and stop it reaching and clogging up the condenser or heat exchanger. Thanks to the multi filter system, ASKO tumble dryers deliver consistent drying performance for years to come and improved safety. It is also beneficial for allergy and asthma sufferers.

Available on all heat pump models

SELF-CLEANING LOWER LINT FILTER

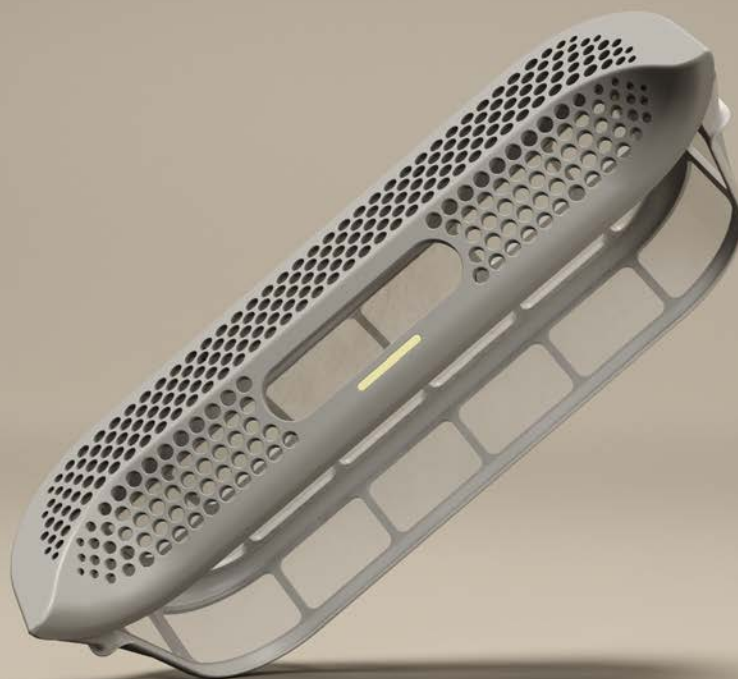

Automatically keeps your filters lint-free

The ASKO lower lint filter effectively keeps harmful lint away from the inner workings of ASKO tumble dryers. But for the filter to do its job, it also must be kept clean. To ensure this, ASKO tumble dryers feature a self-cleaning function that keeps the lower lint filter lint-free. The self-cleaning function uses water collected in the condenser water tank during the drying cycle. This water is automatically sprayed onto the mesh filter. The lint and dust then collect at the bottom of the filter where it can be easily removed by hand.

To ensure the water used is as clean as possible, the condenser water tank features a fine mesh lint filter which is easy to remove and easy to clean. This filter also ensures clean water is used during the steam cleaning function.

Available on 5- and 7-series heat pump dryers

One motion lint filter.

LOW NOISE BLDC MOTOR

Quieter, more hygienic and more reliable drying

Every detail in ASKO tumble dryers is designed to improve the entire laundry experience – from greater hygiene to quieter, more efficient and reliable performance. Brushless DC motors are a major factor in ASKO tumble dryers being able to deliver the levels of performance our experts aim for. BLDC motors are extra durable, quieter than ordinary motors and more energy efficient. And unlike standard motors, there are no brushes that can be damaged and need replacing. The new ASKO dryers are up 7dB(A) (depending on model) more quiet than our previous generation.

Available on all models

VENTED OR HEAT PUMP

The choice is yours

The ASKO heat pump dryers work with a low temperature giving you less risk for shrinkage, gentler drying, less wear and tear and thereby longer lifetime for your clothes. The lower temperature does also give the possibility to dry more sensitive fabrics and it makes the heat pump dryer consume about 75% less energy than a vented dryer.

The heat pump dryers are also possible to install in confined spaces since it doesn't need a vent.

The vented dryers are on the other hand cheaper to buy, they have a shorter program time and the higher temperature gives crispier dry and warmer clothes.

SENSI DRYING BASKET

Gentle drying for unconventional loads

Sometimes you need to dry odd items, like shoes. And some are more delicate than others. That's why we've designed a handy drying basket that's designed for those items that need a little extra care during drying. It's placed inside the drum and then used to hold special or delicate items like soft toys, woolen textiles, cushions, or shoes in place during the drying cycle. It's easy to fit and comes with a height guide, so you know when an item, like boots, is too big.

Available on T7XL

SOFT DRUM™

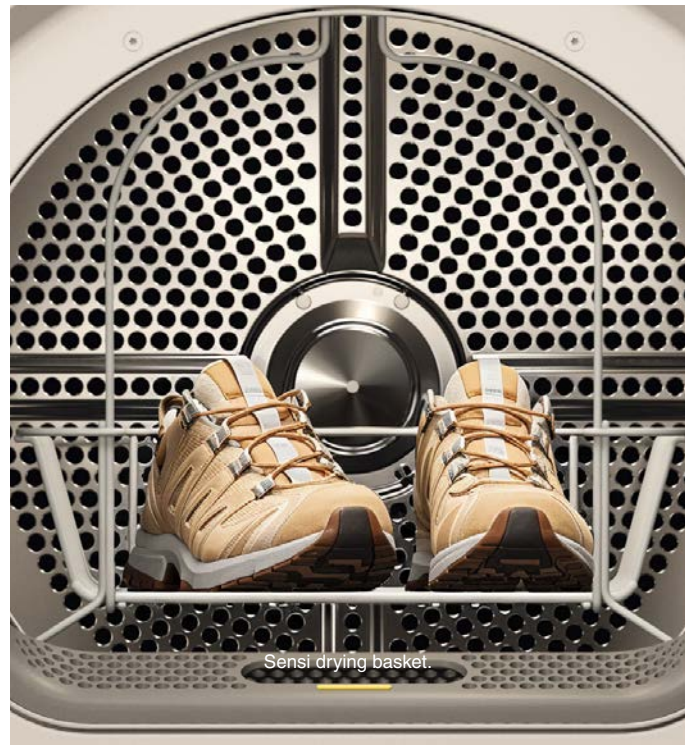

The drum has a design with circular pressings with beveled edges

The Soft Drum™ enhances the air flow around the fabric. The new drum design allows for an even and gentle drying for both small and large loads.

Available on all models

Low noise BLDC motor.

Sensi drying basket.

TAILORED DRYING FOR EVERY LIFESTYLE

ASKO tumble dryers offer specialized programs for every need—quick cycles for busy days, anti-allergy care for sensitive skin, and self-maintenance programs for lasting performance. Whatever the fabric, enjoy even, gentle drying with precision and care.

ASKO 7-series washing machine and
tumble dryer in white.

ANTI-ALLERGY PROGRAMS

Pure performance and peace of mind for allergy sufferers

When people with sensitive skin, allergies or asthma use ASKO tumble dryers, we want them to be able to enjoy peace of mind as well dry, beautifully cared for clothes. To help them do this, we have created a highly effective anti-allergy program. Our Anti-Allergy program uses higher temperatures for longer to kill dust mites and up to 99.99999% of bacteria. This is bad news for bacteria, but good news for allergy sufferers and good news for your clothes.

Available on T5XL and W7XL

QUICK PRO COTTON PROGRAM

Takes care of clothes without taking up precious time

When it comes to taking care of domestic tasks, it can often feel like there are not enough hours in the day. Thankfully, with ASKO's Quick Pro Cotton tumble dryer program, you only need an hour – or less. As the name suggests, our Quick Pro Cotton program is a fast program that dries clothes quickly and carefully without taking up precious time or energy. In fact, an 8.8 lbs load only takes 45 minutes to dry. The ASKO Quick pro cotton program is the perfect solution for a busy schedule.

Available on all models

BEDDING AND TOWELS PROGRAM

For a beautifully gentle dry without bundling

There is nothing like the feeling of fresh, clean bedsheets or warm fluffy towels plucked straight from the dryer. Our ASKO program for bedding and towels is designed to gently and evenly dry bedsheets, blankets, towels, tablecloths and more. ASKO tumble dryers also include Bundle Guard™ – an innovative ASKO feature with a sensor that monitors the humidity in the load and changes the drum rotation when necessary to prevent bundling. This delivers better drying performance with lower wear and tear on fabrics.

Available on all models

DRUM STEAM SANITATION PROGRAM

Keeps the drum clean and your clothes refreshed

To ensure that your ASKO tumble dryer delivers consistently great drying performance, you must keep the machine clean. So, we designed a steam program that takes care of that for you. With our ASKO drum steam sanitation program, the drum of your ASKO tumble dryer will be kept clean and fresh, which means your clothes will also stay clean and fresh, while enjoying a gentle drying experience. For a clean tumble dryer, dry, clean clothes and an appliance that lasts a lifetime, run the ASKO Drum sanitation program regularly.

Available on 7- and 5-series heat pump models

WOOL AND SILK PROGRAM

A luxurious drying experience for luxury garments

There's no denying it. Wool and silk garments simply look and feel luxurious. And even though they shouldn't be washed and dried too often, when they do, they should be treated with the care and attention they deserve. Our wool and silk program in ASKO tumble dryers gently refreshes the garment and helps it keep – or even regain – its shape, so you can enjoy the luxurious experience of wearing it for longer.

tumbler dryer in graphite black.

ASKO 7-series washing machine and tumble dryer in a full laundry care solution with Hidden Helper™ and drying cabinet in white.

DRYING CABINETS

NO HANG DRY CLUTTER EVER AGAIN

The ASKO drying cabinet can dry any type of clothes - also all clothes that can't be dried in a tumble dryer. Meaning that you never have to hang dry anything ever again!

In Scandinavia, innovations have always been shaped by the unique climate and how people adapt to it. It is still the same today. When you live in a land with harsh weather, you need to be able to dry all types of clothing quickly and effectively. ASKO freestanding drying cabinets are the ideal solution. Our drying cabinets are powerful enough to dry heavy outerwear, boots and shoes and gentle enough to take care of more sensitive garments – they even reduce creasing. The compact design means they easily fit into modern urban living while the versatile interior means that the shelving can always be adapted to suit whatever you're wearing that day.

DRYING WITH CARE

Innovative features designed and inspired by real life

ASKO drying cabinets are designed to effectively dry and gently care for your clothes. They combine high performance with low energy use and offer a flexible interior that always suits your needs. This is all made possible by a range of features, which effortlessly combine to create the unique ASKO laundry experience.

CAPACITY AND FLEXIBILITY

Flexible pull-out racks, shelves and 52 feet of hanging space

ASKO drying cabinets feature flexible pull-out racks, shelves and an impressive 52 feet of hanging space. It's like a compact clothesline inside your home that you can use whatever the weather. This also enables you to dry your family's garments in a more organized way, so that you avoid wet clothes drying all over the house. Capacity, flexibility and an effective way of keeping your home tidy.

ASKO 7-series washing machine and tumble dryer in a full laundry care solution with Hidden Helper™ and drying cabinet in white.

SENSITIVE GARMENTS

Treat sensitive garments with the gentle care they deserve

ASKO drying cabinets are not just there for the heavy jobs like drying heavy raincoats and wet boots. They are also ideal for gently drying sensitive garments and fabrics such as silk, velvet and satin. ASKO drying cabinets also help avoid creasing. Unlike tumble dryers, there is no mechanical movement, so sensitive garments will emerge dry, wrinkle-free and ready to wear. clothes from the basket. The shelf is also ideal for folding.

SHOE CARE

Dries and cares for shoes, so they are ready to wear again in an hour

Whether you've been for a long hike or been caught in a downpour on your way home from work, footwear can take forever to dry properly. ASKO drying cabinets are ideal for drying shoes, trainers or boots in a way that is effective without damaging the fabric or ruining the shape. In fact, if you put them in the drying cabinet when you get home, they will dry and ready to wear again in an hour.

HIDDEN HELPERSTM

A DISCREET AND WELCOME HELPING HAND

When it comes to doing laundry, space is not always at a premium – especially if you live in an apartment. If this is the case in your home, our hidden helpers can make life a lot easier. Hidden helpers are laundry accessories that, instead of taking up a lot of flooring space, are designed to fit conveniently between your washer and dryer, or even under them. They include everything from a pull-out ironing board and pull-out shelves for folding to storage baskets and drawers – all designed to help you make the most of your laundry space.

PULL-OUT SHELF FOR FOLDING

Takes a load off and makes folding and loading easier

Laundry time is full of minor inconveniences that can be eased with the simplest of solutions. One of our ASKO Hidden Helpers is a pull-out shelf designed to fit between the washing machine and dryer. This pull-out shelf provides you with somewhere to place the washing basket when loading an appliance at head-height. This makes loading easier and helps you avoid having to bend down to take clothes from the basket. The shelf is also ideal for folding.

PULL-OUT IRONING BOARD

Smartly stores chores out of sight

Let's face it, no one really enjoys ironing. But we can make it easier and feel less of a chore. ASKO Hidden Helpers include a pull-out ironing board that is conveniently and discreetly stored out of sight between the washing machine and the tumble dryer. This convenient solution not only saves space in your home, it eliminates the need for fetching and setting up the ironing board if you only have a few garments to iron.

PEDESTAL STORAGE DRAWER

Smart, compact storage that won't cost you space

A laundry space doesn't only need room for appliances and clothes. You also need to find space for all the extra like detergent and softener. This can all mount up – especially if you have a family. To solve this problem, our ASKO Hidden Helper range of accessories includes a handy storage drawer that is ideal for storing detergent, softener, coat hangers, pegs, user manuals and more. The drawer is 11.8" high, so it is large enough to store lots of items, but it is also compact enough to be fitted underneath the washing machine. The drawer also comes with a shelf that makes loading and unloading your laundry easier.

HANDY BASKET

For sorting, carrying – and then storing out of sight

To help make even more efficient use of your time and space, ASKO Hidden Helpers include a handy pull-out wire storage basket that slots smoothly and conveniently between your washing machine and your tumble dryer. The wire basket can be used for storage or as an additional surface for sorting clothes for the wash or folding them when they come out the tumble dryer. For extra convenience, the basket is also detachable and can be used to carry your clothes to the storage cupboard or wardrobe.

DETERGENT

Vegan

The Vegan label is administered by The Vegan Society, which is the oldest and most recognized vegan community in the world, founded in England in 1944. The brand is registered in many parts of the world and is used on more than 22,000 products. The Vegan Society defines veganism as "a way of life that seeks to exclude as far as possible and practically possible all forms of exploitation and cruelty to animals for food, clothing and any other purpose". The label is found on many different products such as food, clothing, cosmetics and detergents.

Nordic Swan Ecolabel

The Nordic Swan Ecolabel is the official Nordic Ecolabel, founded by the Nordic Council of Ministers in 1989. The purpose of the Nordic Swan Ecolabel is to contribute to less environmentally damaging production and consumption. That is why the Nordic Swan Ecolabel looks at the entire product's journey and the environmental problems that arise along the way – for the benefit of people, the environment and the earth's resources.

SCANDINAVIAN INSPIRED LAUNDRY ESSENTIALS

ASKO Laundry Essentials have been created with care in mind: made to look after clothes, and the people wearing them. Six enzymes provide extra washing power, breaking down any tough stains and keeping garments fresh. The detergents are also specially formulated for a reduced environmental impact – with a 99% natural formula, free from dyes, animal-based ingredients, phosphates and parabens. They're enhanced with scents inspired by Scandinavian nature, and are perfect for ASKO washing machines. With bottles made from 100% recycled plastic.

LIQUID FABRIC CARE

Extend the life of your favorite garments with this caring formula

This fabric care product works in the wash to remove the build-up of fuzz and pills on natural fibers – leaving you with smooth, soft and silky garments. Not only are they pleasure to wear, they also look their absolute best for longer.

ELIMINAZE™ ODOR NEUTRALIZER TECHNOLOGY

Eliminates bad smells by neutralizing them

The detergent's fragrance also contains a specialized odor-neutralizing technology which actively binds the compounds that cause bad smells. As a result, using the detergent helps to control these odors. Proven to be effective.

LIQUID DETERGENT

Designed to take really good care of your favorite garments

Be gentle on nature and the environment and wash your clothes with this sustainable, effective laundry wash. Liquid detergent preserves the quality of the fabric, reduce bobbling or pilling, and looking like new; liquid white keeps whites bright, liquid color keeps colors bright

- Quality test: 10,000 h, 225 cycles per year (20 years of domestic use).
- ECO feedback: In the ConnectLife app you can check energy, water and detergent consumptions.

Health, wellbeing and convenience

- Quick Pro program: Dry up to 3 lbs in just 25 min. in accordance with the CAN/CSA – C361 – 16 standard and Appendix D2 to Subpart B of part 430.
- Drum light for easier loading and unloading
- 4" FFSTN display and rotary knob with Line Concept™, memory function and 27 languages.
- Connectivity with associated ConnectLife app: Remote monitoring, control and washing guide.

Programs

- 12 programs: ECO cotton, Storage dry cotton, Iron dry cotton, Synthetic, Delicates, Mixed laundry, Beddings/Towels, Down/Bulky items, Airing, Time Program, Quick Pro Cotton, Wool
- Up to 54 % shorter program time compared to previous models.

Modes

- 2 modes: Standard, Delicate

Options

- 5 options: Dry level, Delayed start, Anti-crease, Child lock, Load level

Safety

- Overheating protection / Overfill protection in water tank / Child safe door

Technical data

- Electrical connection: 3 kW / 208–240V / 60 Hz / 15 A (switchable to 1,95 kW / 10 A)
- Drum volume: 4.2 Cubic ft / Loading capacity: 19.8 lbs
- Noise level (dB): 58
- ADA compliant when installed on top of an ASKO pedestal

T3HW.U

3-series / Heat pump tumble dryer / 19.8 lbs

White

Bundle Guard™ / Tested for 20 years of use / Fast drying

Bundle Guard™: Detects and resolves bundles **Butterfly Drying™:** Uniform and effective drying **Heat pump system:** Low energy consumption **BLDC motor:** Low noise, low energy and long life-time **Multi-filter system:** Effective lint protection for the heat pump system **One Motion Filter™:** Easy to use lint filter, **WIFI connection** with associated ConnectLife app

Laundry perfection and fabric care

- Bundle Guard™: Detects and resolves clothes bundles.
- Butterfly drying™: Move the fabrics in a figure eight for effective and even drying.
- Soft Drum™: Drum design for gentle and effective drying.
- Delicates program: Careful drying of sensitive garments at lower temperatures.
- Dryer link: The dryer propose an appropriate drying program to the program carried out in the washer.
- Sensi Basket™: The basket is available as accessory and is perfect when drying shoes for instance.

Scandinavian design and sustainability

- Quality test: 10,000 h, 225 cycles per year (20 years of domestic use).
- Low energy consumption: Highly efficient heat pump enables low energy consumption.
- ECO feedback: In the ConnectLife app you can check energy, water and detergent consumptions.
- R290 heat pump refrigerant: Environmentally friendly and low global warming impact.

Health, wellbeing and convenience

- Quick Pro program: Dry up to 8.8 lbs in just 40 min. (8.8 lbs synthetic with 30% moisture)
- Drum light for easier loading and unloading
- Multi-filter system: Protects the heat pump from lint and dust for perfect drying results over time.
- 4" FFSTN display and rotary knob with Line Concept™, memory function and 27 languages.
- Connectivity with associated ConnectLife app: Remote monitoring, control and washing guide.
- Water tank is possible to connect to drain: No need to empty the water tank.

Programs

- 12 programs: ECO cotton, Storage dry cotton, Iron dry cotton, Synthetic, Delicates, Wool, Mixed laundry, Beddings/Towels, Down/Bulky items, Airing, Time Program, Quick Pro Cotton

Modes

- 2 modes: Standard, Delicate

Options

- 5 options: Dry level, Delayed start, Anti-crease, Child lock, Load level

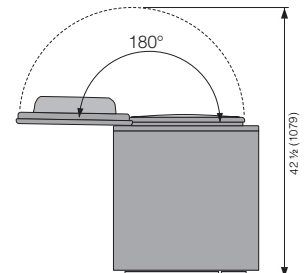

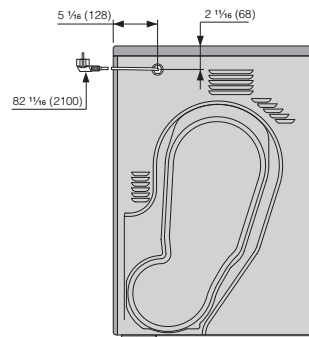

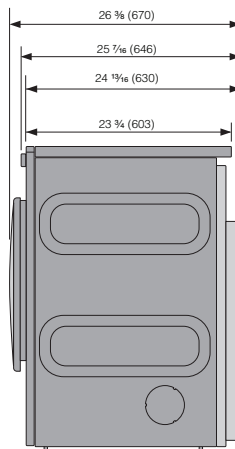

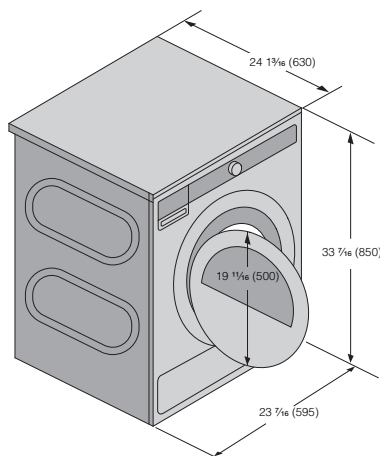

Safety

- Overheating protection / Overfill protection in water tank / Child safe door

Technical data

- Electrical connection: 0,7 kW / 208–240V / 60 Hz / 15 A
- Drum volume: 4.2 Cubic ft / Loading capacity: 19.8 lbs
- Noise level (dB): 61
- Refrigerant: R290 (GWP index: 3,3)
- ADA compliant when installed on top of an ASKO pedestal

Drying Cabinet
White / Titanium / Graphite Black

Construction: Vented, **Door hinge placement:** Right/Reversible, **Possible to install in cabinet:** Yes, **Possible to wall mount:** Yes,

General description

- Freestanding

Use and flexibility

- Possible to integrate with all sizes of washing machines and tumble dryers

Technical data

- Heater power: 1500 W
- Voltage (V): 120
- Frequency: 60 Hz
- Number of phases: 1
- Length of electrical cord: 90 ³/₁₆"
- Depth with door open: 46 ⁵/₁₆"
- Ventilation hose length: 39 ³/₈"
- Venting position / diameter: Top / 4.3" (110 mm)
- Noise level drying dB(A): 60

Safety

- Safety door switch: Yes

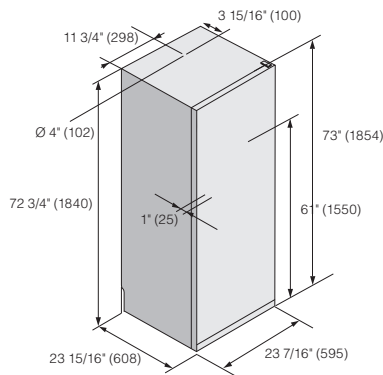

Performance

- Time drying: Yes
- Temperature selection: Yes
- Total drying length: 52.5 feet
- Shortest program time: 75 min
- Remaining time indication: Yes

Programs

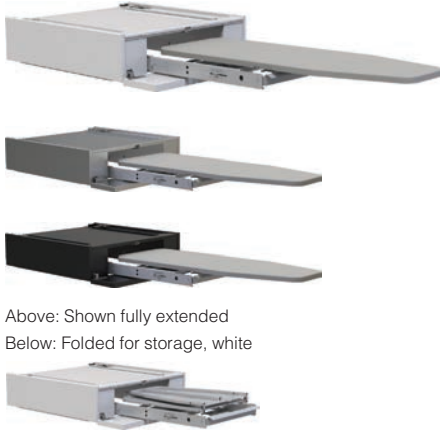

- Drying programs: Auto 104°F Normal Dry, Auto 104°F Extra Dry, Auto 140°F Normal Dry, Auto 140°F Extra Dry, Manual 86°F, Manual 104°F, Manual 140°F, Manual

Installation

HI150W / HI150T / HI150G

Integrated pull-out ironing board
White / Titanium / Graphite Black

Above: Shown fully extended
Below: Folded for storage, white

Push-to-open: Just push the door open and pull out the board, **Ergonomic height:** Perfect working height for ironing and accessing clean laundry from the tumble dryer

General description

- Ironing board cover with heat-reflecting metallised surface

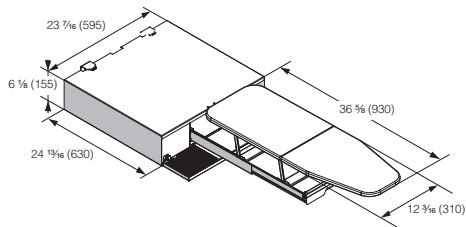

Use and flexibility

- Push / pull opening
- Maximum load: 22 lbs
- Possible to integrate with all sizes of washing machines and tumble dryers

Dimensions

- Product (H x W x D): 6 1/8" (155 mm) x 23 7/16" (595 mm) x 24 13/16" (630 mm)

Installation

HB150W / HB150T / HB150G

Integrated pull-out basket
White / Titanium / Graphite Black

Above: Shown open
Below: Shown closed, white

Push-to-open: Just push the door open and pull out the basket, **Ergonomic height:** Perfect working height for accessing clean laundry from the tumble dryer, **Removable basket:** Makes it easy to move the clean laundry to cupboards and drawers

General description

- Surface: Steel wire

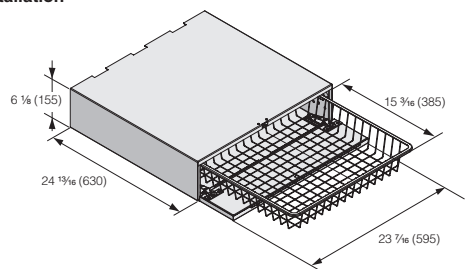

Use and flexibility

- Push / pull basket
- Removable wire basket
- Maximum load: 22 lbs
- Possible to integrate with all sizes of washing machines and tumble dryers

Dimensions

- Product (H x W x D): 6 1/8" (155 mm) x 23 7/16" (595 mm) x 24 13/16" (630 mm)

Installation

HS60W / HS60T / HS60G

Integrated pull-out shelf
White / Titanium / Graphite Black

Above: Shown open
Below: Shown closed, white

Push-to-open: Just push the door open and pull out the shelf, **Ergonomic height:** Perfect working height for sorting and folding laundry and for accessing clean laundry from the tumble dryer

General description

- Shell surface: Laminate

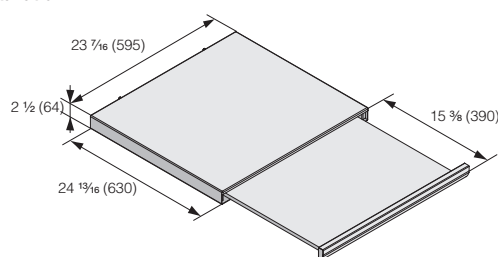

Use and flexibility

- Push / pull opening
- Maximum load: 22 lbs
- Possible to integrate with all sizes of washing machines and tumble dryers

Dimensions

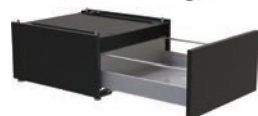

- Product (H x W x D): 2 1/2" (64 mm) x 23 7/16" (595 mm) x 24 13/16" (630 mm)

Installation

HP320W / HP320T / HP320G

Integrated pedestal drawer
White / Titanium / Graphite Black

Above: Shown open
Below: Shown closed, white

Washer/Dryer in ergonomic height: Makes it easier to load and unload the washing machine or tumble dryer, **Push-to-open:** Just push the door open and pull out drawer and the shelf

General description

- Shell surface: Laminate / Steel

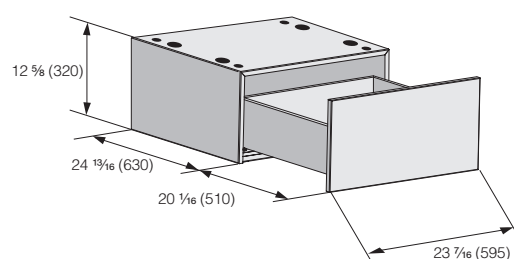

Use and flexibility

- Push / pull opening
- Possible to integrate with all sizes of washing machines and tumble dryers

Dimensions

- Product (H x W x D): 12 5/8" (320 mm) x 23 7/16" (595 mm) x 24 13/16" (630 mm)

Installation

Dryer Basket

Insert dryer basket

Basket for drying shoes and other items that should not normally be tumble dried

General description

- Dryer basket

Use and flexibility

- Possible to integrate with all sizes of tumble dryers

Dimensions

- Fits in all tumble dryers

LF11

Liquid Fabric Care

With odor neutralizing technology; Ocean Breeze or Pine fragrance

Detergent Properties

- Detergent properties: Nordic Swan Ecolabel, Vegan, With 6 enzymes for extra washing power, With odor neutralizing technology, Free from colorants, paraben and animal-derived ingredients, Antipilling effect on cotton and polyester, Color safe formula, Removes fuzz & pills, Anti-greying, Clothes protection, Keeps colors & shapes, Removes static electricity, Suitable for Auto dosage system (ADS), Fragrance Ocean breeze & pine

Use and flexibility

- Free from colorants, paraben and animal-derived ingredients
- Number of washers per bottle: 30

Bottle Material

- Bottle is made of 100% recycled plastic
