

ASKO
Inspired by Scandinavia

3-Series

T3VW	Vented
T3HW	Heat Pump

Available in white Capacity

- Drum volume: 4.2 cu. ft.
- Load weight: 19.8 lbs

Features

- Freestanding
- Soft Drum™
- Butterfly Drying™
- BLDC motor
- 12 programs, 2 modes, 5 options
- Environmentally friendly R290 refrigerant (HP)
- 4" FSTN fully graphic display, line concept, memory function, 27 languages
- SensiDry
- Drum light
- Bundle guard (HP)

5-Series

T5VXLW	Vented	T5HXLW	Heat Pump
T5VXLT	Vented	T5HXLT	Heat Pump
T5XLG	Vented	T5HXLG	Heat Pump

Available in white, titanium, and graphite black Capacity

- **Drum volume: 5.2 cu. ft.**
- **Load weight: 24.3 lbs**

Features

- Freestanding
- Soft Drum™
- Butterfly Drying™
- BLDC motor
- **18 programs, 3 modes**, 5 options (HP). Vented has 17 programs, 2 modes and 5 options
- Environmentally friendly R290 refrigerant (HP)
- **7" full touch TFT display**, line concept, memory function, **Easy view**, 27 languages
- SensiDry
- Drum light
- Bundle guard (HP)

7-Series

T7VXLW	Vented
THXLW	Heat Pump

Available in white Capacity

- Drum volume: 5.2 cu. ft.
- Load weight: 24.3 lbs

Features

- Freestanding
- Soft Drum™
- Butterfly Drying™
- BLDC motor
- **20 programs, 3 modes, 6 options** (HP). Vented has 17 programs, 2 modes and 5 options
- Environmentally friendly R290 refrigerant (HP)
- 7" full touch TFT display, line concept, memory function, Easy view, 27 languages
- SensiDry
- Drum light
- **Steam**
- **Shoe rack**
- Bundle guard (HP)

reddot winner 2025

WARRANTY - Two (2) Years parts and labor.

DESIGNED IN SWEDEN.
PRODUCED IN EUROPE.

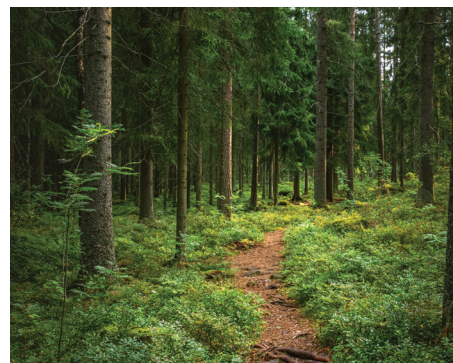

Tested for 20 Years of Use

- Our ASKO tumble dryers are built with high-quality steel for long-lasting performance
- All products are tested before they leave our factory

Soft Drum/Butterfly Drying™

- Butterfly Drying™ prevents bundling and minimizes creasing in your clothes
- Soft Drum™ is a solution developed to enhance air flow around the load, thereby increasing the drying effect and more gentle action that increases the life time of your clothes

R290 Refrigerant

- R290 heat pump refrigerant: Environmentally friendly and low global warming impact

Fast Drying

- Heat Pump: Quick Pro program: Dry up to 8.8 lbs in just 40 min. (8.8 lbs synthetic with 30 % moisture)
- Vented: Fast programs, up to -54% shorter program time vs previous models thanks to increased airflow and high heater effect of 3kW

Bundle Guard™

- A humidity sensor measures the humidity in the clothes. When the clothes are dry - the dryer changes direction and untangles any possible bundles. The humidity is measured again and continues the drying process if there is still humidity in the clothes.

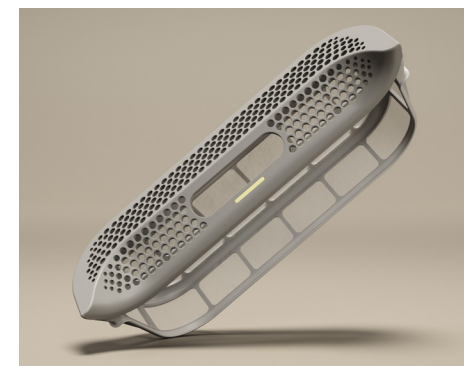

Large Capacity

- An XL drum that can load up to 24.3 lbs, accommodating up to two king comforters with ease and efficiency

Vented and Heat Pump Dryers

- The vented dryer is faster and more affordable to purchase than a heat pump dryer
- The heat pump dryer has a very low energy consumption which thereby saves you energy costs
- Heat Pump uses a lower temp and are more sensitive to your clothes with less risk for shrinking

Multi Filter System

- The three filters effectively trap lint and stop it reaching and clogging up the condenser or heat exchanger
- Consistent drying performance and low energy consumption for years to come and improved safety
- It is also beneficial for allergy and asthma sufferers
