kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size clothes washers are used in this scale.

**Clothes washers using more energy cost more to operate.
This model's estimated yearly operating cost is:**

\$19

when used with an electric water heater

\$12

when used with a natural gas water heater

Based on eight loads of clothes a week and a 2007 U.S. Government national average cost of 10.65¢ per kWh for electricity and \$1.218 per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.
