* For Propane Gas Water Heaters, change "Y" to "H" in model number (example: 8 40 HAVIT).

** Some Propane Gas models have slightly lower inputs than Natural Gas models, which may reduce First Hour Rating and recovery by up to 3 gallons on Propane models.

*** Height dimension is to the top of the power-vent assembly.

DIRECT-VENT SERIES

- Direct-vent design draws combustion air from outside the home ensuring a sufficient air supply for proper heater operation.
- "Coaxial" direct-vent system combines venting and air intake channels in a single pipe, requiring only one opening in the outside wall.
- Horizontal venting and air intake up to 4 feet from outside wall, with no electrical power required.
