Thrilling HDTV images, with a splash of style

2008 Plasma 650 HDTV

SERIES 6 PLASMA TV

ToC™
Touch of Color

SAMSUNG

ToC

Pushing the **borders** of HDTV design

Technology to complement the unique look

Touch of Color™: Compelling, elegant, and exclusively from Samsung.

In addition to its outstanding HD image quality and advanced features, an HDTV can also provide an aesthetically pleasing touch to any room in the house. Samsung is leading the way when it comes to television design – with our exclusive Touch of Color (ToC™ design).

An advanced process involves injecting a color into the black bezel during construction. We specifically chose this color based on visual appeal and consumer feedback, taking cues from other industries like mobile phone and automotive. The result: a sublime red accent that lines the bezel's top and bottom edges. This attractive new bezel element is a perfect example of Samsung's innovative approach to consumer electronics design – and a perfectly stylish fit in any modern household.

Ultra FilterBright®

Colors are more vivid, and even light images are bolder. Ultra FilterBright technology greatly reduces glare from exterior light, ensuring a crisper image with maximized contrast.

InfoLink™ RSS Access/Wheel Remote/Wiselink®

InfoLink delivers up-to-date RSS (Really Simple Syndication) information – such as weather, stocks, news and sports* – with just the touch of a button on the user-friendly Wheel Remote. Or use the Wiselink feature for quick and easy access to digital photos and MP3s, right from your TV.

* All content is provided by USA TODAY. Internet access and either Ethernet connection or Wireless LAN required.

Plasma 650 **Features**

- Ultra FilterBright®
- InfoLink™ RSS Access
- ToC™ design
- HDMI® - CEC inputs
- Wiselink® Pro USB 2.0

Digital Connectivity

Advanced digital connectivity lets you hook up all your other electronics and devices, quickly and simply. Samsung provides HDMI® inputs for your cable box, DVD or Blu-ray Disc® player, computer, and more.

Contour Editor

See the world's best noise-free and most natural black shades for yourself. Contour editor reduces dither noise and improves worm artifacts, so that you can enjoy pristine, realistic dark tones and images.
