

New model information

DHT-FS5

Home Theater System

DENON

Surround sound with dynamic ambiance is reproduced with just a single unit

Features

- **Home Theater Surround Sound with a single unit**

The DHT-FS5 is a home theater system that lets you enjoy exciting 5.1-channel surround sound with just a compact, single unit.

- **Easy Set-up and Operation**

No confusing sound space settings required!

The acoustic characteristics suitable for the size of your room are already stored in the DHT-FS5. Just connect it to your DVD player and TV and the home theater experience is yours to enjoy right away.

- **Compact Design**

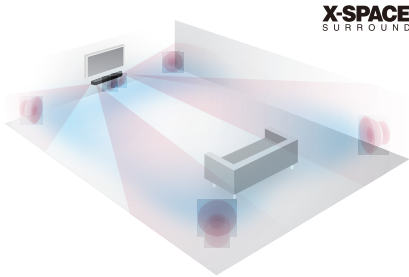

Home Theater Surround Sound

- Spacious 5.1-channel surround ambiance is reproduced with just a single-box speaker unit

- X-SPACE SURROUND masterfully reproduces the surround sound and expands the listening area

The cabinet of the front unit contains 6 speakers.

X-SPACE SURROUND is technology that uses those speakers to generate surround algorithms. The sound waves released from the speakers irradiate throughout the room, so that listeners hear the sound from the front left and right, the centre, and the rear left and right. Since X-SPACE SURROUND sends the sound waves out over a wide area, listeners can enjoy surround sound at any location in the room.

X-SPACE
SURROUND

- Night Mode, to enjoy surround sound even at low volume levels

- Supports all audio formats (Dolby Digital, DTS, Dolby Pro Logic II)

The DHT-FS5 is equipped with Dolby Pro Logic II, Dolby Digital, and DTS, decoders to reproduce not only digital sound from DVD or STB but also analog video sound with the surround ambiance that you might experience in a real cinema.

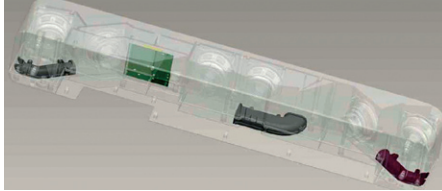

- Useful audio modes

The DHT-FS5 comes with 4 handy audio modes (MOVIE / MUSIC / STEREO / NEWS) to suit the type of audio you are listening to. If you are listening to a news program or documentary, you might choose NEWS mode to make the spoken words easier to hear. If you are listening to music, you might switch to MUSIC mode as it is better suited for music programs.

- Full-range speakers, for greater clarity in spoken words

Since the sonic waves reach listeners' ears after being radiated from the speakers throughout the room, the use of full-range speakers in the DHT-FS5 makes it much easier to hear scripts, narrations, and other types of spoken words.

- Bass reflex, to produce a deep, robust bass sound from a compact unit

- Super Dynamic Bass (S.D.B.), for an even stronger deep bass sound

Easy Set-up, Easy Connection, Easy Operation

- Easy set-up with no difficult settings required

Just choose one of three room sizes and you'll get the optimum acoustic effects for your room.

- Place the DHT-FS5 where you like
Compact design fits easily into a TV rack^(*)

^(*) Please first check the dimensions of your TV stand.
