

BlueAnt®

SUPERTOOTH BLUETOOTH HANDSFREE LIGHT

Stylish in design, easy to use and with no installation requirements, the new BlueAnt Supertooth Light offers the latest in sun-visor mounted handsfree speakerphone technology.

The BlueAnt Supertooth Light delivers all the latest technology employing the brand new Clear Voice Capture (CVC) Digital Signal Processor (DSP) from Cambridge Silicon Radio (CSR) to help achieve its outstanding audio qualities.

The BlueAnt Supertooth Light uses real-time audio to process any echo or background noise resulting in the improvement of the sound quality of the user's voice regardless of whether the car is stationary or travelling at high speed. It also adjusts sound levels to compensate for loud engine noise or external noise created when the windows are wound down.

Easily mounted on the car's sun-visor, the BlueAnt Supertooth Light can be paired with up to five devices, supports voice dial activation, redial and call reject and also has a retractable sliding microphone.

- > Stylish, new design
- > Full duplex, DSP & high performance speaker
- > 2 Year Replacement Warranty
- > Mounts on your car's sun-visor using a magnetic clip
- > Zero installation costs
