

PRO SE SPEAKERS

REFERENCE STANDARD SPEAKERS

Ever since they were first introduced in 1989, Boston Pro speakers have been creating a sensation. And today, to commemorate our 25th year in mobile audio, we introduce the Pro SE (Special Edition). With voicing cues taken directly from our acclaimed Boston SPZ line, they take sound quality a step further and bridge the gap between exceptional and absolute top-level performance. The newest Pro speakers deliver huge output without even a hint of distortion, pound out more bass than ever before, and possess a look that's as gutsy as it is gorgeous. It's sound and style that's sure to redefine car audio for decades to come.

PERFORMANCE

- *Type-M1 alloy dome tweeter with AMD™ (same as found on SPZ)*
- *RadialVent® cooling, patented*
- *TwinStage™ aluminum heat sink*
- *Compact neodymium magnets*
- *Designed specifically for superb on- and off-axis response*
- *125 watts RMS power handling*

EASY INSTALLATION

- *Separable and dockable crossovers*
- *Quick-fit tweeter mounting systems*
- *Compact neodymium magnets*
- *A unique axis-mount design enables the tweeter and woofer to be installed as one piece or separately*
- *VariMount™ adapter rings included*

Pro60 SE 6 1/2-inch
Pro50 SE 5 1/4-inch

gear TALK

TwinStage™ heat sink: Effectively pulling heat away from the voice coil, two separate aluminum heat sinks, working together as one, improve power handling and reliability. The first heat sink is located inside the voice coil; the second surrounds the woofer magnet assembly.
