

VCR 2 PC USB VIDEOTAPE CONVERSION PLAYER

Rediscover your
movies on your
computer and take
them anywhere.

FEATURES

- VHS tape player with computer output
- Plug and play USB computer connection
- Standard RCA and composite outputs for connection to any TV or home theater system
- Standard RCA inputs for connecting video cameras
- Auto-tracking, variable speed slow motion, playback, and rewind
- Soft-touch, backlit buttons
- Also available: PAL version with SCART output (not included)

Turn your home movies into convenient, portable video files with VCR 2 PC. VCR 2 PC is a VHS tape player, just like a VCR, and it features a simple, easy USB connection so you can connect your computer and take your videos wherever you want them. Because it uses standard, plug-and-play USB, you only need the single, included cable to send both audio and video straight into your computer. And the included EZ VHS Converter software was designed specifically to make it easy to enjoy your videos on DVD, iPod, PSP, or computer. You can even watch videos on your compatible mobile phones!

Remember all those other types of camcorders, such as VHS-C or 8mm? VCR 2 PC can save their videos too. Just connect the camera to the front panel jacks on VCR 2 PC and you're ready to roll. VCR 2 PC makes rediscovering your memories convenient, easy, and fun.
