INSTRUCTIONS

Connecting to iPod or iPhone and Car

1. Plug the iCarPlay Wireless 800 power adapter into your car's 12V accessory outlet (cigarette lighter socket) and turn your iPod or iPhone on.

Note: Illustrations may vary in appearance from actual product.

2. Plug the iCarPlay Wireless 800 dock connector into your iPod or iPhone.

3. The iCarPlay Wireless 800's LCD screen will light up to confirm power reception and display the most recently used station preset.

Manual Tuning

1. Twist the master control dial right to tune up the frequency range. Twist to the left to tune down.

Note: While in "Manual Tuning Mode" the LCD display will flash the current frequency.

2. Tune your FM radio to the same channel.

3. To avoid unwanted sudden loud playback, set car audio system volume to low before pressing play.
4. Press the "Play" button on your iPod or iPhone.
5. Use your car radio's volume knob to adjust sound level.

Setting Memory Presets

The iCarPlay Wireless 800 can store and instantly recall 3 preset channels.

First, manually tune to the channel you want to store to memory as described in the Manual Tuning section. While the LCD display is still flashing the current frequency, press and hold down the section of the master control dial that corresponds to the preset that you wish to program (P1, P2, or P3) for several seconds. Once the preset is locked in, the corresponding preset number will be shown on the LCD display.

Selecting Memory Presets

Simply press any of the three preset areas of the master control dial (P1, P2, or P3) to select the pre-programmed frequency. The iCarPlay Wireless 800 will automatically tune to the channel that you have stored in memory.

Note: After using AutoScan 3D™, the selected frequency will automatically be stored to the "P3" button's memory for instant recall.

Using AutoScan 3D™ Automatic FM Frequency Selection

The iCarPlay Wireless 800 features AutoScan 3D to automatically find the clearest FM channel in your local area. Remember that as you drive through different areas the FM signal conditions change, so when driving long distances, you should repeat the AutoScan 3D selection whenever FM interference occurs.

1. Be sure that the iCarPlay Wireless 800 is not in "Manual Tuning Mode" and that the LCD display is not flashing.

2. Press and hold the P3/Scan section of the master control dial until the LCD display flashes "SCAN." The iCarPlay Wireless 800 will rapidly scan the entire FM spectrum three times to ensure the best possible signal.* Please note that it can take approximately 20 seconds to complete the scan. The LCD will then display the frequency that AutoScan 3D has selected. Tune your car radio to that frequency.

* Depending on variable environmental factors

Note: After using AutoScan 3D, the selected frequency will automatically be stored to the "P3" button's memory for instant recall.

Performance & Safety Tips:

- Connecting and/or setting iCarPlay® Wireless 800 while driving may cause serious injury and/or death. Drive responsibly—connect and set iCarPlay Wireless 800 BEFORE operating your vehicle and pay attention to the road while driving.
- For best performance, select an iCarPlay Wireless 800 channel that is not occupied by a strong local FM radio station.
- AutoScan 3D™ can find the channel that offers clearest sound with the least interference automatically. Remember that signal conditions change as your car moves, and re-scanning may be necessary.
- Certain car radios may experience more difficulty receiving clear signals than others. Location of the antenna can affect signal strength. Some vehicles have a metallic film in the windows that can also make it harder to receive clear signals from the iCarPlay Wireless 800.

- In dense metropolitan areas, there are cases where all iCarPlay Wireless 800 pre-set stations are occupied by local radio stations. Sometimes a station setting next to a local station may be strong enough to 'bleed' over to the adjacent frequencies. Use manual tuning to eliminate interference.
- Radio frequencies from local stations can 'bounce' from hills and buildings and may cause momentary interference.
- A steel bridge or parking garage may act like an antenna, strengthening local and distant radio station signals. You may need to wait until you are "over the bridge" or "out of the structure" for clearest reception.
- The iCarPlay Wireless 800 transmitter strength is regulated and limited by the FCC. iCarPlay Wireless 800 transmits at the power allowable by law.
- iCarPlay Wireless 800 is designed to transmit within your car's perimeter while not interfering with the surrounding public airwaves.

FCC Notice: This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by Monster Cable Products, Inc. may void the users authority to operate this device.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to correct

the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help
