Other factors besides clock speed may impact system and application performance.^(4b)This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of AMD technology. Dual/quad/triple-core processing available with AMD technology is designed to improve performance of this system. Given the wide range of software applications available, performance of a system including a 64-bit operating system and a dual-core processor will vary. ⁽⁶⁾Shared video memory (UMA) uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by other programs. Note: this disclaimer affects system memory and graphics.^(6d)Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided - Version 1.0 media ⁽⁷⁾1 GB = 1 billion bytes. This may affect the ability of the PC to communicate with other 802.11n WLAN devices.⁽¹¹⁾Maximum achievable download speeds are currently unknown, may not reach 56Kbps and will vary with line conditions. Upload speeds are less and also will vary.⁽¹²⁾Weight will vary by configuration.⁽¹⁵⁾Internet access required and sold separately.^(16a)Actual speeds may vary.
