Prestige Counter Top/Built-in Convection Microwave Oven

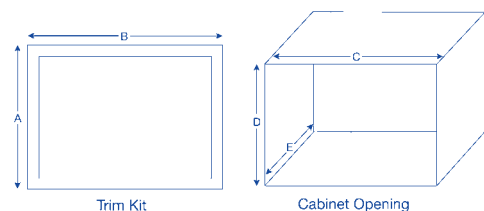

Built-In Installation Trim Kits

Find the trim kit to match your Panasonic Microwave Oven

The Prestige Counter Top/Convection Microwave can be installed in the wall using an optional matching trim kit accessory.

Microwave Oven	1.5 Cu. Ft.	
	NN-C994S	
Trim Kit	27"	30"
	NN-TK903S	NN-TK913S
Trim Kit Size	A	19-1/2"
	B	27" 30"
Cabinet Opening	C	24 7/8"
	D	17-3/8"
	E	21" minimum

(Please consult instructions included with each kit for detailed directions and specifications)

Menu Action Screen (multi-lingual)

The Menu Action Screen is like having a chef to assist you in the kitchen. It scrolls step-by-step cooking instructions across the display in a choice of English, Spanish or French.

One-Touch Genius Sensor Cook and Reheat

The Genius Prestige Sensor adjusts power levels and calculates cooking and reheating times **automatically** for various food types.

Keep Warm Feature

A pulsing delivery of very low microwave power keeps food temperatures at a constant level – without overcooking. So, foods like stew, gravy and desserts remain warm in the oven until ready to serve.

Fingerprint-Resistant Elegant Design and Control Panel with Push-Button Door Release

With a touch of a button or a spin of the dial, the easy-to-use control panel is a departure from the standard keypad found on most microwave ovens.

Elegant, attractive and easy-to-open, the fingerprint-resistant stainless steel finish on the front of our Prestige Microwave Oven will look its best - even when preparing some of your messiest recipes.

Inverter Technology

Panasonic **Inverter Technology** perfects the art of cooking with microwave ovens, delivering delicious flavor, excellent color, superb shape and texture in the foods you cook. The consistent delivery of microwave energy means delicate foods can simmer without the edges and surfaces overcooking. Foods have the look and taste of conventional-oven cooking – without the wait!

Inverter Turbo Defrost™

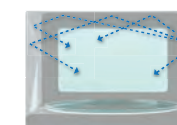

Panasonic has succeeded in evolving the Turbo Defrost™, which allows you to defrost foods even faster than previous Panasonic Auto Defrost. Panasonic Inverter Turbo Defrost technology is an advanced microwave sequencing system using the inverter continuous-power delivery feature.

4-in-1 cooking with the Convection/Microwave Combination

Broil food to perfection with the convection setting, which seals in juices and flavors. Bake and brown cakes, pies and pizzas, courtesy of the circulating, heated air, or get the best of both worlds using the combination option to benefit from the speed of the microwave and the evenness of convection cooking.

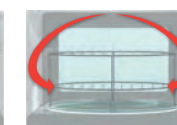

Microwave

Defrost, cook or reheat food in minutes.

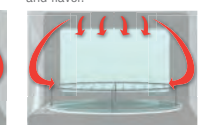

Bake

Bake and brown with circulating heated air.

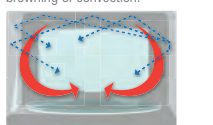

Broiling

Heat is quickly forced inside the food, sealing in juices and flavor.

Combination

The speed of microwaving combines with the baking and browning of convection.
