emergencylight

Be prepared.

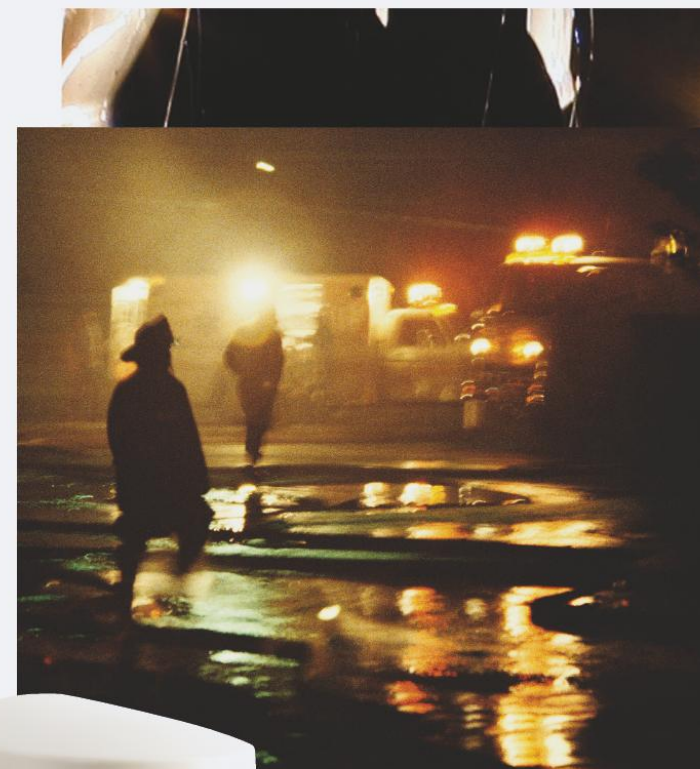

You know the drill. The power goes out and you stumble around in the dark trying to remember where you put the flashlight. And when you do find it, you discover the batteries are dead. **Now what?**

With the **Panasonic Emergency Light**, a reliable light source will always be just a few steps away. Mount the unit on a wall or in any convenient location, so it's easy to find when you need it. An illuminated locator makes it easy to find in the dark.

The **Emergency Light** gives you bright, continuous lighting for up to 18 hours*. Best of all, you won't have to change the batteries for up to 7 years.

How can batteries possibly last so long? Simple. Returning the **Emergency Light** back to the cradle automatically disengages the batteries - so you don't have to worry about accidentally leaving it on or batteries draining while idle.

Perfect for any home or facility that values Emergency Preparedness.

Panasonic
ideas for life

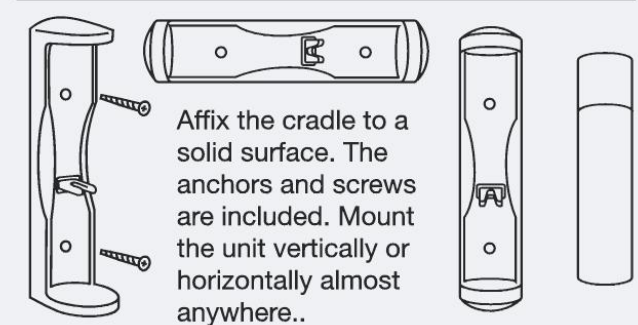

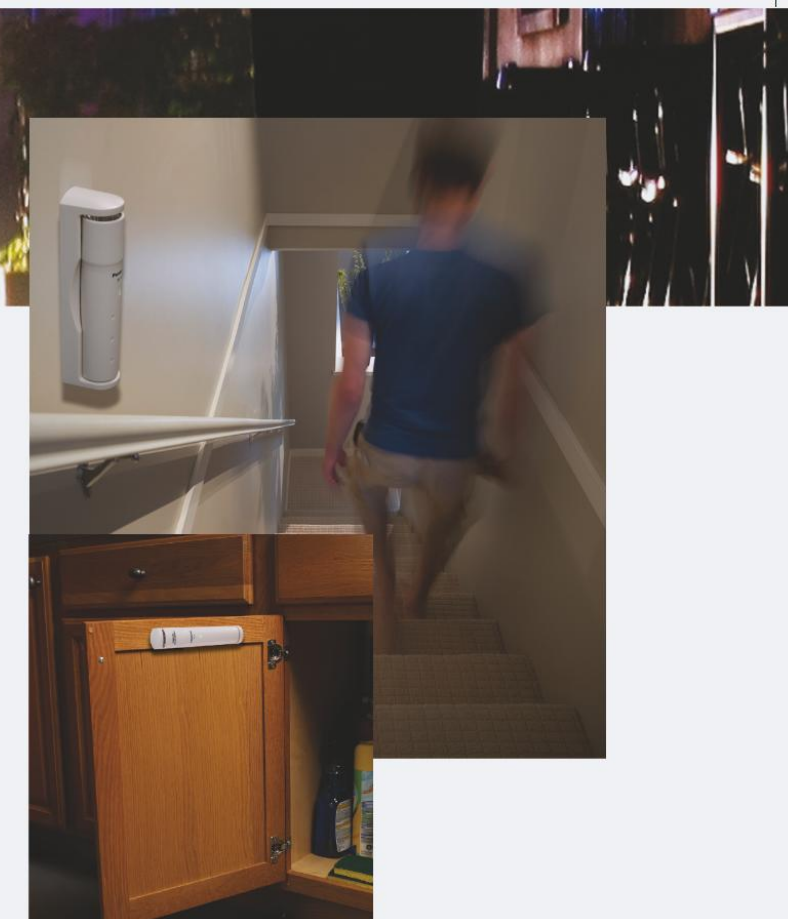

*With 2 standard size D Alkaline Batteries.

Ready when you are... Ready where you are!

- New! Battery Powered Technology
- Provides up to 18 hours of emergency lighting*
- Bright, long lasting krypton bulb
- Wall-mount design for easy accessibility
- Portable design provides light where you need it
- Easy-to-find with illuminated locator on front of the unit
- The cradle preserves battery life up to seven years
- Perfect for private homes and in commercial applications such as hotels, hospitals, schools, corporate and government offices.

How It Works.

- Goes on automatically when removed from the cradle – always ready when you are!
- Illuminated locator on the front of the unit makes the Emergency Light easy-to-find.
- Return the Emergency Light back to the cradle and the unit will automatically disengage the batteries during storage.
