The more data that's transferred, the greater the need for quality cables – especially when it comes to 3D in Full HD. Trust Samsung High-speed HDMI® cables to transfer every last bit of data, maximizing the quality of Full HDTV video and audio. Unlike competitors' cables, Samsung HDMI® cables deliver finely detailed 4K picture resolution – the emerging standard for resolution in digital film. The Audio Return Channel feature transfers sound from your HDTV directly to your Home Entertainment System without the need for – or signal degradation of – extra cables. Choose from four models, each offering professional operation and sleek style.
