- Boston's Digitally Optimized Virtual Surround processing for pinpoint, theater-like, surround effects
- Exclusive Boston DSP placement and optimization switch
- Mini stereo AUX input to connect your mobile device

* Digital optical cable included

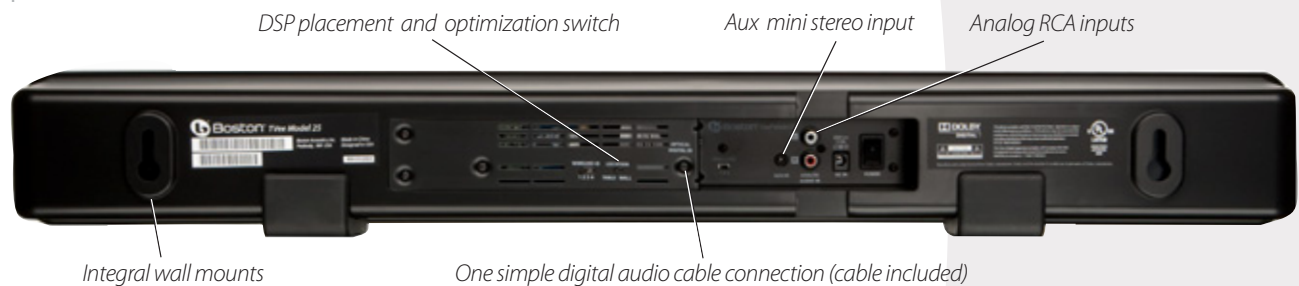

Powerful Performance

With a total system power of 150 watts, the TVee Model 25 virtual surround sound speaker system envelops you in rich, room-filling audio. You'll enjoy an HDTV viewing experience that is fine-tuned to your entertainment. In the Movie Mode, Boston's Digitally Optimized Virtual Surround delivers clear movie dialogue and music along with cinematic surround audio effects, while the Music Mode provides enhanced digital stereo music reproduction. Perfectly sized for HDTVs 32" or larger, the TVee Model 25's soundbar achieves its stunning audio performance through the use of Boston's low-distortion, wide-bandwidth HHRT (Hyperbolic High Rigidity Transducer) driver technology. The system's 6-inch down firing wireless subwoofer delivers deep and powerful bass.

Simple Setup

The TVee Model 25 soundbar uses your television remote control and with just one cable to connect to your HDTV, you'll be up and running in no time. And because the subwoofer is wireless, you can place it just about anywhere in your room.

Specifications
