

PowerLite® 4300 MULTIMEDIA PROJECTOR

Brilliant quality. Easy installation features.

Engineered for easy installation, the PowerLite 4300 offers a flexible solution for any classroom or boardroom. Featuring 5200 lumens of color and white light output¹, plus XGA resolution, this powerful performer ensures amazing presentations and provides convenient maintenance features. With one-touch filter removal and easy side lamp access, the PowerLite 4300 offers added peace of mind. It even includes a closed captioning decoder, so there are no added costs to accommodate those with hearing impairments. The PowerLite 4300 is ideal for both executive boardrooms and educational institutions, with value, power and performance for all your presentation needs.

Bright performance; brilliant detail — 5200 lumens color and white light output¹, XGA resolution

Network-ready — RJ-45 LAN connection with monitor and control capabilities

Easy installation — horizontal/vertical lens shift, centered lens design, 1.8x zoom lens and Quick Corner® allow for flexible room placement and easy image adjustments at setup

PowerLite® Pro 4300

MULTIMEDIA PROJECTOR

The best-selling projectors in the world.

Epson understands business and education and has a solution no matter what your situation. Built with image quality and reliability in mind, Epson projectors enhance communication and inspire collaboration, while offering a low total cost of ownership. From long-throw projectors to ultra-short-throw and all-in-one solutions, Epson has the model made for you.

Brilliant image quality

3LCD technology — for quality and color that's beyond amazing

- 3 chips for full-time, vibrant color
- 25% less electricity required per lumen of brightness when compared to 1-chip DLP projectors²
- Over 20 years of road-tested reliability built into every projector

▲ 3LCD technology

Advanced sharpness

Another feature Epson has transferred over from its industry leading home cinema projectors — advanced sharpness for video. Depending on the content, users can adjust any of the following attributes of the image depending on the content: thin line enhancement, thick line enhancement, vertical line enhancement or horizontal line enhancement.

Amazing color light output

Rich color and detail are critical for presentations — that's why it's important to understand that color light output is an essential ingredient in achieving optimum performance. The PowerLite 4300 delivers 5200 lumens of color light output and 5200 lumens of white light output¹ for bright, vibrant colorful images.

C²Fine technology delivers a higher contrast ratio

C²Fine offers smooth, uniform images with exceptional contrast for better image quality. Based on this new phase-compensation technology, light leakage is eliminated, and, when combined with auto iris, it allows for contrast ratios of up to 1000:1.

▲ With C²Fine

▲ Without C²Fine

Eco Features

- Energy-efficient 3LCD light engine
- Designed to be recycled³
- Epson America, Inc. is a SmartWaySM Transport Partner⁴

Full-featured performance

DICOM simulation mode

DICOM (Digital Imaging and Communication in Medicine) is a standard for handling, storing, printing and transmitting medical imaging information. The projector's DICOM Simulation Mode enables users to reproduce images with an advanced grayscale level that simulates DICOM Part 14. This mode is ideal for viewing grayscale medical images, such as X-rays, for training and educational purposes.⁵

▲ Normal Mode

▲ DICOM Simulation Mode

Test patterns

The PowerLite 4300 also features four test patterns for precise setup, including detecting distortion, checking linearity, color reproduction and bleeding, and DICOM simulation mode.

▲ Standard

▲ Cross-Hatch

▲ Color Bars

▲ Grayscale

Built-in 7 W speaker

- For multimedia applications — convenient built-in speaker

Built-in closed captioning

- Accommodates those with hearing impairments
- Delivers important content when audio broadcasting is not preferred
- Helps save money — no need to pay for an additional decoder and its installation
- Effective and easy to use — easily enabled or disabled through the projector remote or menu

Convenient control, monitoring and communication

Monitor and control

- **Easy Management® software included** — remotely access, monitor and control Epson projectors over the network; includes e-mail notifications
- **Network-ready for monitor and control** — RJ-45 LAN connection

Web-based remote control

This utility allows users to control one projector at a time through the LAN network. Projector control is used in the room in which the projector is located, taking the place of the remote control for some basic commands, including power on and off, volume control, source changes and more.

Low cost of ownership

Protect your investment — long-life electrostatic air filter

This innovative filter was designed to protect the optical engine, lamp and electronics from small dust particles that can enter any projector. It has a recommended 3000-hour filter cleaning schedule⁶ and can capture particles as small as three microns, due in part to its pleated, expanded design. With one air intake and one exhaust path, the PowerLite 4300 offers efficient airflow systems for optimum cooling of key components and a reduction in dust-related problems.

Long-life lamp that's easy to replace

This high-efficiency lamp lasts up to 2000 hours in Normal Mode and up to 3000 hours in ECO Mode.⁷ It can be replaced quickly and easily, without having to uninstall the projector from the ceiling.

Easy and flexible installations

Centered lens design

The PowerLite 4300 makes installation easy to plan with lens-to-screen alignment. Installers can position the ceiling mount, screen and projector independently of one another, knowing that the center of the screen will align with the lens at the center of the projector.

Epson lens shift technology

In addition to added reliability and amazing color performance, Epson's industry-leading 3LCD technology enables this projector to achieve a wide range of lens shift capabilities, allowing you to install around obstacles. This lens shift technology enables an incredible range of ± 50 percent on the vertical axis and ± 10 percent on the horizontal axis.

Quick Corner®

This innovative feature allows you to move any of the four corners of an image independently at setup, using the remote control, for a perfectly rectangular picture.

Off-axis, flexible installation

The PowerLite 4300 also features a ± 30 -degree tilt operation for off-axis positioning flexibility. As a result, it can be used for a wide range of applications, such as projecting on angled surfaces. Epson technology keeps the projector running without compromising performance or causing overheating.

Keystone correction

Adjusts up to ± 40 degrees vertically and ± 20 degrees horizontally to easily achieve a perfect square image.

1 White and color light output will vary depending on mode selected. White light output measured using ISO 21118 standard.

2 Data source: ProjectorCentral.com Jan 2010. Average of 910 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels.

3 See our website for convenient and reasonable recycling options at www.epson.com/recycle

4 SmartWay is an innovative partnership of the U.S. Environmental Protection Agency that reduces greenhouse gases and other air pollutants and improves fuel efficiency.

5 This projector does not meet the DICOM standard Part 14 and should not be used as a medical diagnostic device.

6 Recommended based on normal room conditions. Cleaning requirements may vary depending on use, environment and other conditions. Cleaning intervals may be adjusted to accommodate the environment in which the projector is used.

7 Lamp life will vary depending upon mode selected, environmental conditions and usage. Lamp brightness decreases over time.
