

PRODUCT HIGHLIGHTS

51" Slim Plasma TV

- Immersive 3D picture performance
- Deep color contrast with improved Real Black Panel
- Energy Efficient with ENERGY STAR® V 5.3 compliance

Advanced 3D Plasma technology that commands your attention.

Turn on the Samsung PN51E490 Plasma TV, and step up to an incredible cinema experience. The 490 series is complete with two pairs of Samsung 3D Active Glasses. Our Real Black Panel delivers sharp, crisp detail with deep black levels on a 51-inch screen. Speaking of eye-catching, a slim bezel and slim depth design show off the sleek, modern look.

036725236837

*WiFi LAN adaptor sold separately.

PN51E490 51" Class (50.7" Diagonal) PDP HDTV with 720p Resolution

FEATURES

Samsung Active 3D: Immerse yourself in a high definition 3D viewing experience. With 2D to 3D conversion you can have the best of both dimensions. With a 3D capable TV, you experience a better and higher performing 2D picture when viewing everyday TV. Then, easily convert over to Samsung's active 3D functionality for an immersive cinematic experience! With two pairs of active 3D glasses complimentary with your 3D TV, enjoy all the fun right out of the box!

WiFi-ready*: With optional LinkStick™ sold separately - See Samsung's accessories on Samsung.com.

ConnectShare™ Movie: Have movies and pictures on a USB drive? Now easily view that content right on the TV. Just plug the drive in the USB port and you are ready for a big screen experience.

+1" Design: Samsung's +1 is designed for a larger viewing experience in the same space. By narrowing the bezel of the TV, a sleeker more contemporary look is achieved, as well as a larger screen. The additional inch of TV viewing space can fit into areas where others similar sized TVs cannot.

Eco Sensor: Samsung's Plasma TV's Eco Sensor measures the intensity of the light in the room and automatically adjust the brightness of the image on the TV. By controlling the amount of light used to create images, the TV adjust its use of energy.

Swivel Stand

PICTURE QUALITY

Real Black Panel: An advancement in software technology, which provides deeper and darker black levels to deliver bolder hues, higher contrast, and smoother, clearer picture quality.

Wide Color Enhancer Plus: More vibrant colors for better images. Using an advanced picture quality improvement algorithm, Samsung's Wide Color Enhancer Plus drastically improves the quality of any image and uncovers hidden details. Now see colors as they were meant to be seen with Wide Color Enhancer Plus.

600 Subfield Motion: Using the latest in subfield motion technology, Samsung Plasma TV flashes a single image up to 600 times a second. The result is smoother images with unprecedented picture quality, no matter how fast the images are moving.

Clear Image Panel: The Samsung Plasma TV uses a new filter and panel structure to eliminate layered images and produce clear images from almost every angle. This also eliminates the production of dual images and blurring typically found with glass filters.

AUDIO

10 watts x 2 channel stereo sound

Dolby® Digital Plus/Dolby® Pulse: An advanced surround sound audio processing feature designed to optimize the TV's sound quality when viewing and listening to internet movies, internet music and other content played back from wired or wireless mobile phones, PCs and tablet devices.

SRS TheaterSound HD™: A high definition audio experience that delivers surround sound multichannel content, using built-in TV speakers to significantly enhance both the depth and dimension of audio right through the TV for a simulated surround sound experience.

CONNECTIONS

HDMI®: 2

HDMI® (High-Definition Multimedia Interface) is a convenient high quality single cable digital audio/video interface for connecting the TV to a digital cable box, satellite box, DVD & Blu-ray Disc® Player, PC computers, PC portable devices, new generation tablets and devices featuring the HDMI® output.

Ethernet®: 1

USB: 1

Universal Serial Bus (USB) is an industry standard for connecting a variety of computer, audio and video devices to the TV. USB movie capability allows the streaming of video from storage devices, cameras, camcorders and USB drives.

Component in: 1
