

TX-NR3010 9.2-Channel Network A/V Receiver

BLACK

Thrill to the Power of Nine-Channel Entertainment

The ultimate hub for house-wide entertainment, the TX-NR3010 can drive audio in three rooms, output high-resolution video on two displays, and stream audio via DLNA—all controlled by your iPhone® or Android-powered phone. With a total of 11 HDMI® ports (including MHL™ for smart phone) and 11.4-channel pre-outs, the home theater setup possibilities are limited only by your imagination. The receiver boasts Audyssey MultEQ® XT32 room correction and three incredible sound expansion systems—DTS Neo:X™, Audyssey DSX®, and Dolby® Pro Logic® IIz—while a combination of Qdeo™, HQV®, and ISF technology upscales and calibrates video sources to 4K resolution. As an audiophile-spec component, the TX-NR3010 features a massive main transformer, additional transformers for audio and video processing, and separated pre-amp and power amp blocks. Audio signals are jitter-cleaned and converted to analog by 192 kHz/24-bit DACs and VLSC™ circuits before passing through the Three-Stage Inverted Darlington Circuitry. The resulting sound quality is awe-inspiring—and with differential DAC mode and digital crossover processing, bi-amping your front monitors results in even higher performance. Easily set up and controlled using the HDMI-enabled user interface, this THX® Ultra2 Plus™-certified receiver is waiting to reignite your passion for music and cinema.

THX® Ultra2 Plus® Certified

The ultimate benchmark for home audio performance, THX Ultra2 Plus is specified for rooms where the screen-to-seat viewing distance is more than 12 feet and the room volume is 3000 cubic feet or greater. To achieve THX Ultra2 Plus certification, the TX-NR3010 must meet the world's most demanding standards for home theater audio quality and performance, and must play at reference volume levels with minimal distortion.

InstaPrevue™ Technology Makes Switching Sources Easy

The TX-NR3010 incorporates InstaPrevue visual port management technology, making input source selection easier. InstaPrevue technology provides live video thumbnails showing the available content on devices connected via HDMI. You no longer have to remember that your gaming console is connected to Port 4, or your Blu-ray player to Port 1, for example—you can see what's playing and choose accordingly.

World's Best Video Processing

Three of the best video processing and enhancement systems are included to guarantee smooth and accurate images on your HDTV.

HQV® Vida™ VHD 1900

The Vida VHD 1900 upscales analog content to 1080p, and enhances native high-definition sources. The chip employs multi-cadence tracking, expanded 12-bit color processing, and four-field motion-adaptive de-interlacing. Auto HQV™ enhances the incoming image, while HQV StreamClean™ cleans up video from lower-quality online sources by eliminating mosquito and block noise.

Marvell Qdeo™ Technology

Qdeo technology upscales 1080p sources to 4K (4096 x 2160)—even content already upscaled from lower resolutions by the HQV Vida processor. Played back on a compatible 4K display, your high-definition content will look more cinematic than ever.

ISF Video Calibration

ISF (Imaging Science Foundation) video calibration dramatically improves picture quality. Each video input source is independently calibrated to achieve the best possible performance from your connected HDTV.

Onkyo Remote Apps for iPod touch®/iPhone® and Android Phone

The Onkyo remote control apps for iPod touch/iPhone®^{*1} and Android phone®^{*2} both provide intuitive ways to operate Onkyo network A/V receivers. Control input sources, adjust settings, and play audio stored in a smart phone wirelessly (Android phone) using the application's interactive graphical display. The two Remote Apps are available separately as free downloads.

*1 Compatible with iPod touch (3rd generation or later) and iPhone 3GS or later. All models require iOS 4.2 or later. *2 Requires Android OS 2.1 or later.

Three High-Performance Sound Expansion Systems

A nine-channel system provides the ultimate entertainment experience, with additional High and Wide channels convincing you with realistic directional and ambient effects. Audyssey DSX®, Dolby® Pro Logic® IIz, and DTS Neo:X™ expansion systems offer you freedom to choose your preferred speaker setup. Audyssey DSX can expand 5.1-channel sources to incorporate Wide and Height channels. The Dolby system adds Height channels and stereo source expansion, while DTS Neo:X offers Wides and Heights with cinema, music, or game listening modes.

House-wide Audio and Video Entertainment

Now there's a way to share your hi-def content on a second TV—say, a wall-mounted flatscreen in the kitchen or bedroom—without having to buy and connect another Blu-ray player or set-top box. Connect your additional display using the receiver's Zone 2 HDMI output to enjoy the same program, or two different HD sources, in both rooms. Naturally, this receiver also powers audio in two other zones by assigning Front Wide or Front High channel outputs. Playback of audio and video is easily controlled with the main system remote or Onkyo remote control app.

Innovative Design and Quality Construction

This receiver is built to deliver superb sound quality. Processing equipment and amplifier circuits are housed separately to limit electrical interference, while PLL (Phase Locked Loop) jitter cleaning preserves signal integrity by eliminating digital clock noise. The amplifier's Three-Stage Inverted Darlington Circuitry—an enhancement to the core WRAT (Wide Range Amplifier Technology) concept—and VLSC™ system ensures minimal distortion. Quality circuitry dovetails with a heavy-duty power supply and multiple transformers for instantaneous response to signal gains. The resulting sound is reliably pure, even under heavy loads.
