

# TiVo® Premiere 4

## Expand your entertainment horizons.

If you love to be entertained, you'll love the new TiVo Premiere 4. With four tuners, you can record four shows at once. And it's equipped with 75 hours of HD recording capacity, giving you ample room to record all your favorites. Best of all, Premiere 4 was specially designed to serve as the hub to a TiVo whole home setup. So no matter where the entertainment you want is located—on TV or the web—Premiere 4 will find it in just a few clicks, and serve it up whenever you're relaxed and ready. Consider it the base of your entertainment empire.

### Product overview:

- 4 tuners allow you to record up to 4 shows at once
- Up to 75 hours of HD programming
- Easy access to broadband entertainment providers like Netflix, Pandora, Hulu Plus, Amazon and YouTube\*

- Instruction manual and Quick-Start guide
- Cables (includes 6' HDMI, 6' AC power, 6.5' Ethernet, 6' composite video & audio cable)

\*Broadband Internet connection required. Additional fees may apply from content providers.

\*\*CableCARD™ Decoder. A CableCARD decoder is required for your TiVo Premiere 4 DVR to receive any cable programming. The TiVo Premiere 4 is designed for use only with digital cable systems. It does not receive analog programming, including over-the-air, and will not work with an over-the-air antenna. Most of the largest cable providers have "digital simulcast," which means they rebroadcast all their analog channel programming on digital channels as well. This means that all or most of the programs available on analog channels are also available on digital channels when a CableCARD is inserted. Therefore, if your provider has "digital simulcast" and rebroadcasts all of its programming in analog you will not miss any of your cable channel programming with a TiVo Premiere 4. If you are unsure whether your cable operator's service provides digital simulcast of all analog programming, please contact your provider to determine whether it offers all-digital or digital simulcast service. If you plan to relocate to a new area or change your video service provider, please contact your new provider to determine whether it offers all-digital or digital simulcast service for all of its analog programming.

Certain advanced and interactive digital cable services such as video-on-demand, a cable operator's enhanced program guide and data-enhanced television services may require the use of a set-top box. For more information call your cable operator.
