

HT-CT660

Sony® 46" Sound bar & Wireless Subwoofer

Easily add theater-like, high definition¹ sound to any room. Plus, connect and stream music from your favorite mobile device with just one touch². And with the HDMI[®] inputs, you can add up to three high-definition devices in a snap. It's never been so easy to sound so good.

Bullets

- 46" 330W 2.1ch High Definition Sound bar w/wireless subwoofer
- HDMI[®] inputs x 3, analog audio, & digital optical inputs
- Wirelessly stream music from Bluetooth[®] devices w/just one-touch²
- Experience HD sound¹ with Dolby[®] TrueHD & dts[®]-HD Master Audio
- S-Force[®] PRO Front Surround 3D virtual surround sound
- IR emitter to control devices that otherwise would be blocked
- 2-way, 4-driver mica reinforced speakers for exceptional clarity
- Connect to your TV with just one cable
- Easily mount on a wall or place on a TV stand or table top
- Hexagonal design, for convenient placement and optimal sound
- Remote control & digital optical cable included

Features

2.1 channel: 330 watt Sound bar

Bring your TV experience to life with 330 watts of exceptional audio marked by rich, natural sound, incredible clarity and definition that will make any movie, game, or TV program come alive.

Wireless Subwoofer

Hear your sound instead of seeing it. The wireless sub-woofer delivers heart pounding bass without the clutter of cables.

3x HDMI[®] Inputs

Get superior high-definition picture and sound quality from up to three high-definition source devices (ex. Cable box, Blu-ray player, gaming console, etc), with just one cable.

Experience movies as the director intended them to be

Experience movies as the directors intended them to sound like with Dolby[®] TrueHD and dts[®]-HD Master Audio modes that re-produce high definition, discrete sound for uncompromised quality.

Connect & stream music from Bluetooth[®] devices with just one-touch

The easiest and fastest way to start streaming music from your NFC enabled device to your home theater system. Utilizing Near Field Communication and Bluetooth[®], connect and wirelessly stream music from your smartphone, tablet or other Bluetooth & NFC enabled device by touching them together just once². No NFC, no problem...you can still connect and stream music from your smartphone, tablet, or computer via Bluetooth.

S-Force[®] PRO Front Surround 3D

Experience room filling cinematic simulated surround sound with Sony's S-Force PRO Front Surround 3D technology. S-Force[®] PRO Front Surround 3D synchronizes the sound to match the motion and depth of the image on screen, so you can enjoy a fully immersive simulated 3D surround experience without the bother of surround sound speakers.

IR Repeater Pass-thru

While glitzy product photos often show sound bars wall-mounted, most consumers place their sound bar on a TV stand, which can be problematic blocking the TV's remote control sensor, forcing you to stand up and angle your remote to control your TV. With the Sound bar's IR Repeater pass-thru, there's no more standing up and trying to angle your TV remote just right to control the TV if your sound bar is in the way. The sound bar's IR repeater allows other remote control commands to pass-through the front of the sound bar to the TV behind it, eliminating this problem. Therefore you can do less standing and more enjoying!

2-way, 4-driver mica reinforced speaker system for exceptional sound clarity

Experience amazing high and lows in incredible detail and clarity. The poly-mica composite speakers are ridged and durable, yet provide for a big sound and minimal distortion.

Easy-to-use, hassle free installation

Connect the sound bar to your HDTV with just one cable that's included. Simply place it on a table top, or mount the sound bar on any wall without the need for separate mounting brackets.

Hexagonal design for the optimal listening experience

Allows you to easily and conveniently position the sound bar for the optimal listening experience.

Bluetooth® stand-by mode

When a Bluetooth®-enabled mobile device attempts to connect with the Sound bar, the Sound bar will automatically turn-on and start to stream music from your mobile device without any additional steps or having to turn on additional components.
