

Multi-Sync Keyboard – Share Between Multiple Devices

Designed for Your Mac, iPhone and iPad

The Multi-Sync Keyboard was designed specifically for easy navigation of all your Apple devices. Includes Mac/iOS multimedia shortcut keys for instant access to Mission Control and Launchpad as well as a Home button for your iPhone/iPad.

One Touch Quick Switching

Bluetooth keys make it easy for simple switching between devices with the touch of a button. Just pair your device and start toggling. Bluetooth technology means you don't have to take up valuable USB ports with wireless receivers. Easy setup, no installation or drivers required.

USB or Battery Powered

Two options are better than one! The Multi-Sync Keyboard can either be USB Bus-powered or battery operated. Use the provided micro USB cable to save batteries or use two AAA batteries to go cable-free.

Full-sized Keyboard

Includes a full numeric keypad for easy to enter numbers. Arrow keys are convenient for scrolling through documents and playing games. Effortlessly adjust screen brightness, volume, play and pause with single touch function keys.

iPhone/iPad Stand Included

The keyboard comes with a useful little stand to prop up your iPhone or iPad at a convenient angle for typing and viewing.

Did You Know?

The keyboard is compatible with Apple TV and iPod touch.

*Some shortcut keys may not work.
